Paper 3 Structured Questions

May/June 2017

MARK SCHEME

Maximum Mark: 150

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

© IGCSE is a registered trademark.

This document consists of **14** printed pages.

Question	Answer	Marks
3(d)	<p>Treatment of compensation (reference IAS 37) (1) There is a 90% probability(1) of losing the case. Therefore a provision for compensation (\$29 000) should be shown as a current liability/other payable (1)</p> <p>Treatment of trade receivables Z Limited only recovered \$21 000 in the form of non-current assets. (1) The remaining \$9000 which is irrecoverable debt should be written off as bad debt (or a specific provision) against retained earnings (1). The full \$30 000 has been deducted from trade receivables (1).</p> <p>Treatment of machinery (reference IAS 36) (1) According to IAS 36, an asset is impaired when its carrying amount (\$40 000) is more than its recoverable amount (\$32 500). (1). Recoverable amount is the higher of its fair value (\$32 500) and value in use (\$19 500)(1). The impaired loss of the piece of machinery is \$7500 (\$40 000–\$32 500) which has to be written off against retained earnings. (1)</p> <p>Max 2 marks for each adjustment</p>	6
3(e)	<p>Advantages</p> <ul style="list-style-type: none"> • increase the credibility/reliability of accounts • maybe helpful if Jack wants to apply for a bank loan/investment from 3rd parties • help identify weaknesses in the internal procedures <p>Disadvantages</p> <ul style="list-style-type: none"> • high cost of audit fee • no segregation of ownership and management in Jack's business • no need for audit as sole trader <p>Max 3 marks for the advantages and Max 2 marks for the disadvantages</p>	5

$\$125\,000 - \$99\,000 = \$26\,000 / \$90\,000 = 0.288 \times 12 \text{ mth} = 3.47 \text{ mth}$ Answer: 4 years (1)OF 4 months (1)OF																																																																									
6(c)	<p>Simple to calculate/understand. Uses cash flows not profits so not corrupted by accounting methods. Reduces risk by preferring early cash flows/short term projects. Useful as a first screening tool. Useful for capital rationing decisions to identify those projects that generate cash quickly. Better for liquidity—prefers early cash flows.</p> <p>(1 mark) × any 3 reasons, Max 3</p>	3
