**Additional information**

DW plc has a financial year end of 31 December. On 31 December 2020 the draft profit for the year was calculated as \$8100 and the draft statement of financial position at that date included the following values.

	\$	
Machinery (at cost)	186 000	
Accumulated depreciation of machinery	91 500	

On 1 January 2021 the directors reviewed the values of all the non-current assets. This indicated that the machinery could be sold for \$87 000. The cost of dismantling the machinery and transporting it to a new owner would amount to \$3000.

The present value of total future estimated net cash flows arising from the use of the machinery was \$90 000.

(a) Calculate the sales revenue of the joint venture.

.....  
.....  
.....  
..... [3]

**Additional information**

- 1 Rent of the market stall, \$420, was paid from the joint venture bank account.
- 2 Amit paid for fittings for the stall, \$180, from his own funds. These were later sold for \$50 and the proceeds paid into the joint venture bank account.
- 3 Barry paid \$1400 of the takings from sales into the joint venture bank account. The remainder he took for his own use.
- 4 At the end of the festival period the profit was calculated and the bank account closed.
