

**MARK SCHEME for the October/November 2011 question paper
for the guidance of teachers**

9706 ACCOUNTING

9706/43

Paper 4 (Problem Solving – Supplement),
maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	2011		2010		
1) Return on equity	11.7%	(1)	17.1%	(1)	
2) T.R. turnover	91.6 days	(1)	90.4 days	(1)	
3) T.P. turnover	237.8 days	(1)	204.6 days	(1)	
4) Income gearing	3.0 times	(1)	6.1 times	(1)	
5) Gearing ratio	44.9%	(1)	35.4%	(1)	[10]

- (d)** The bank is not likely to authorise the loan. **(1)**
All of the ratios have worsened:
The company is generating less profit from the equity invested. **(1)**
Its collection period has worsened. **(1)**
It is taking longer to pay its debts and the period is now so long that it may lose its credit facilities. **(1)**
Although the company can pay interest 3 times from profits it has deteriorated and if this continued it may be unable to service interest in future. **(1)**
Gearing has increased to further indicate that should profits fall the interest payments may be at risk. **(1)** [4]
(One mark for decision and then maximum three marks for reasons.)
