

## Activity 7

### Practical activity for 9700

**Aim:**

The intention of this activity is to provide you with an opportunity to experience the demands that a learner encounters when they undertake Paper 3. It is **not** to assess your practical abilities; instead, the group discussion that follows the task will be better informed if you have had the hands-on experience yourself.

**Equipment and documents required:**

Paper 33 script from June 2015, practical equipment required for Question 1.

**Instructions:**

On your own, attempt **Question 1**. This should take you 45 minutes to 1 hour. When you have finished, ask the trainer for a copy of the mark scheme for this question and then self-assess your work. In addition, make a note below of any aspects of the activity that you feel learners would find challenging, and why.
