Paper 3 Advanced Practical Skills 1

**October/November 2022**

**MARK SCHEME**

Maximum Mark: 40

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2022 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **6** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Science-Specific Marking Principles**

1 Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.

2 The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.

3 Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).

4 The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

5 'List rule' guidance

For questions that require *n* responses (e.g. State **two** reasons ...):

- The response should be read as continuous prose, even when numbered answer spaces are provided.
- Any response marked *ignore* in the mark scheme should not count towards *n*.
- Incorrect responses should not be awarded credit but will still count towards *n*.
- Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should **not** be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response.
- Non-contradictory responses after the first *n* responses may be ignored even if they include incorrect science.

**6** Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form (e.g.  $a \times 10^n$ ) in which the convention of restricting the value of the coefficient ( $a$ ) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

**7** Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

**Mark scheme abbreviations:**

;	separates marking points
/	alternative answers for the same marking point
<b>R</b>	reject
<b>A</b>	accept
<b>I</b>	ignore
AVP	any valid point
AW	alternative wording (where responses vary more than usual)
ecf	error carried forward
<u>underline</u>	actual word underlined must be used by candidate (grammatical variants accepted)
max	indicates the maximum number of marks that can be given
ora	or reverse argument

Question	Answer	Marks
1(a)(i)	1 states 35, 40, 45 ;	1
1(a)(ii)	1 contents of the test-tubes reaching the temperature of the water in the water-bath ;	1
1(a)(iii)	1 heading for independent variable: temperature / °C <b>and</b> before heading for dependent variable <b>and</b> no units in body of table and heading for dependent variable: time / seconds ; 2 records times for all temperatures ; 3 for the highest temperature the fastest time ; 4 records repeats ; 5 records to the nearest whole second ;	5
1(a)(iv)	1 states independent variable as temperature ;	1
1(a)(v)	1 uses boiled and cooled enzyme or replaces enzyme with water ;	1
1(a)(vi)	1 standardise temperature by using a stated temperature ; 2 uses at least five concentrations of milk ; 3 uses proportional or serial dilution (as appropriate) ;	3
1(b)(i)	1 1. x-axis: % enzyme concentration <b>and</b> y-axis: activity of enzyme (/) au ; 2 scale on x-axis: 0.05 to 2 cm, labelled at least every 2 cm <b>and</b> scale on y-axis: 20 to 2 cm, labelled at least every 2 cm ; 3 correct plotting of all five points using small crosses or dots in circles ; 4 five plots joined with thin line passing through all points and line is either smooth curve or joined plot to plot ;	4
1(b)(ii)	1 correct estimate based on candidate's graph ; 2 shows intercepts on the graph ;	2
1(b)(iii)	1 as enzyme concentration increases the enzyme activity increases_;	1
1(b)(iv)	1 more enzyme present, more active sites ; 2 more enzyme substrate complexes form / more ESCs ;	2

Question	Answer	Marks																		
2(a)(i)	1 minimum size <b>and</b> number of tissue layers ; 2 draws a quarter of the stem <b>and</b> no cells ; 3 draws minimum number of vascular bundles ; 4 vascular bundle subdivided ; 5 label line <b>and</b> label to xylem ;	<b>5</b>																		
2(a)(ii)	1 lines continuous, thin and sharp and no shading ; 2 draws only four cells each one touching two others ; 3 two lines around each cell <b>and</b> three lines where cells touch ; 4 both cells beneath the epidermis deeper than the cells in the epidermis ; 5 label line and label to cell wall ;	<b>5</b>																		
2(b)	1 organises comparison into 2 / 3 columns ; 2 three correct differences ;;; any <b>three</b> from: <table border="1" data-bbox="338 719 1357 1114"> <thead> <tr> <th data-bbox="338 719 781 783">feature</th> <th data-bbox="781 719 1173 783">K1</th> <th data-bbox="1173 719 1357 783">Fig. 2.2</th> </tr> </thead> <tbody> <tr> <td data-bbox="338 783 781 847">number of vascular bundles</td> <td data-bbox="781 783 1173 847">fewer</td> <td data-bbox="1173 783 1357 847">more ;</td> </tr> <tr> <td data-bbox="338 847 781 911">location of vascular bundles</td> <td data-bbox="781 847 1173 911">in a ring towards periphery</td> <td data-bbox="1173 847 1357 911">scattered ;</td> </tr> <tr> <td data-bbox="338 911 781 975">arrangement of xylem / phloem</td> <td data-bbox="781 911 1173 975">inner xylem / outer phloem</td> <td data-bbox="1173 911 1357 975">random ;</td> </tr> <tr> <td data-bbox="338 975 781 1038">pith</td> <td data-bbox="781 975 1173 1038">present</td> <td data-bbox="1173 975 1357 1038">absent ;</td> </tr> <tr> <td data-bbox="338 1038 781 1102">trichomes</td> <td data-bbox="781 1038 1173 1102">present</td> <td data-bbox="1173 1038 1357 1102">absent ;</td> </tr> </tbody> </table>	feature	K1	Fig. 2.2	number of vascular bundles	fewer	more ;	location of vascular bundles	in a ring towards periphery	scattered ;	arrangement of xylem / phloem	inner xylem / outer phloem	random ;	pith	present	absent ;	trichomes	present	absent ;	<b>4</b>
feature	K1	Fig. 2.2																		
number of vascular bundles	fewer	more ;																		
location of vascular bundles	in a ring towards periphery	scattered ;																		
arrangement of xylem / phloem	inner xylem / outer phloem	random ;																		
pith	present	absent ;																		
trichomes	present	absent ;																		
2(c)(i)	1 shows counting on photomicrograph ; 2 correct number of vascular bundles counted ; 3 shows number of vascular bundles in quarter multiplied by 4 ; 4 correct answer ;	<b>4</b>																		
2(c)(ii)	1 helps to transport water etc. or helps support stem_;	<b>1</b>
