Paper 2 Business Concepts 2

May/June 2023

MARK SCHEME

Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **34** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED**Social Science-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion).

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer.
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Guidance on using levels-based marking

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2 etc. must be clearly annotated on the response at the point where the level is achieved.

Assessment objectives**AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

AO2 Application

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

AO3 Analysis

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

AO4 Evaluation

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

Annotations and their Use

Annotation	Use
✓	As an indication of relevant and rewardable content. Better to put these in the body of the answer.
NAQ	Used when the answer or parts of the answer are not answering the question asked.
BOD	Used when the benefit of the doubt is given in order to reward a response.
TV	Used when parts of the answer are considered to be too vague.
K	Indicates knowledge and understanding of the concepts and issues relating to the question.
APP	Indicates that there is specific application to the context of the question.
AN	Indicates where the answer has demonstrated analysis.
EVAL	Indicates where the answer has demonstrated evaluation.
REP	This indicates where content has been repeated.
SEEN	Indicates that content has been recognised but not rewarded.
L1, L2, L3	Indicates where the answer reaches the required standard.
1, 2, 3, 4, 5, 6	Indicates the number of K, APP, AN and EVAL marks awarded.

Question	Answer			Marks
1(a)(ii)	Exemplar and annotations	Mark	Rationale	
	Sells products directly to consumers <input type="checkbox"/> rather than businesses <input type="checkbox"/> FM sells instruments to customers <input type="checkbox"/> .	3	An answer which starts with the knowledge and then applies it to FM.	
	Sell to the final user <input type="checkbox"/> known as B2C <input type="checkbox"/> , FM sell musical instruments to musicians and students who are the final users <input type="checkbox"/> .	3	Again, knowledge first, followed by application to a business scenario (B2C) and to a product (musical instruments).	
	Selling musical instruments to students <input type="checkbox"/> not to other businesses <input type="checkbox"/> as musicians and students are the final consumers <input type="checkbox"/> .	3	A different way of answering the question. There is application of both elements of consumer markets (the product and businesses) as well as clear knowledge of the concept by the end of the response (final consumers)	
	Goods sold to end user <input type="checkbox"/> , not sold to other businesses <input type="checkbox"/> .	2	Clear knowledge. Some application to businesses, but not a product.	
	The buyers are the final consumers <input type="checkbox"/> .	1	Not a perfect definition, but enough to award the knowledge mark. No attempt to apply.	
	Market for consumers to buy something and uses branding to promote product to wholesalers <input type="checkbox"/> .	0	Starts with a tautology. No knowledge of consumer market. Too vague.

1(b)(ii)	Accept all valid responses.			
	Exemplar and annotations	Mark	Rationale	
	Non-financial methods such as job enrichment [1], e.g. one of the reasons employees left is lack of promotion [1]. job enrichment would improve their skills and increase their opportunity of promotion [1].	3	A non-financial method explained in the specific context of FM by using the information in Table 1.1 and develops answer to explain a benefit of the method.	
	Increase employee salary [1], 6 employees left FM because of higher pay at a competitor [1] if FM increase wages employees will be more satisfied [1] and less likely to leave.	3	A financial method in this one [1] and there is context from the data in Table 1.1, also how the method given is linked to the issue, so two [1].	
	Some workers are unhappy with the work environment [1]. Group working could be used [1] Group working will ensure a good communications environment [1].	3	Although the [1] appears first, it cannot be awarded until the [1] has been found. However, there is obvious [1], so you can go back and award the [1].	
	Training for new processes [1] because employees are having difficulties in adapting to the new production method [1].	2	Training is a non-financial method [1]. The context of new production method linked to this is reasonable [1], but only one point of application.	
	Increase employee salary [1] because the more workers are paid the more motivated they become [1].	1	Knowledge of a method. The rest of the answer is not applying it to the context so [1] (Not Answering Question).	
	Labour turnover refers to the number of workers leaving over the total number of workers [1] 4 people left for better jobs [1].	0	Although there is some relevant context, there is no knowledge of a method, so no marks can be awarded.

	AO1 Knowledge	AO2 Application	AO3 Analysis	
	There will be an increase in costs [1]. Annotations for the first impact should be placed in the left-hand margin.	FM will deliver the instruments over a longer distance [1].	So, FM will need to pay more in delivery costs [1] as the delivery driver will take a longer time and there will be higher fuel costs [1].	
	It will increase labour costs [1]. Annotations for the second impact should be placed in the right-hand margin.	For example, translation employees [1].	Because the firm may not understand other countries languages [1] and will need advertising and documents in the language of that country [1].

1(d)	<p>AO4 Evaluation</p> <p>Limited evaluation [1] [2] unsupported judgement and/or a weak attempt at evaluative comment.</p> <p>Developed evaluation [3] [4] supported judgement and/or reasonable evaluative comment.</p> <p>Developed evaluation in context [3] [4] supported judgement in context and/or reasonable evaluative comment in context.</p> <ul style="list-style-type: none"> • Weighing up of risks v reward • Short term costs v long term costs • Costs v benefits • Judgement on stakeholder(s) it will most likely impact • Judgement on overall impact on a stakeholder(s) <p>Accept all valid responses.</p> <p>Exemplar and annotations</p> <p>A change from batch production to mass customisation will have different impacts on FM's stakeholders, such as customers, employees, suppliers, and shareholders [1].</p> <p>Shareholders [3] are the owners of FM who invest their money in the company [1]. They may benefit from mass customisation if it increases the sales and profits of FM [2] by attracting more customers and creating a competitive advantage [3]. Mass customisation may also increase the value and reputation of FM as a customer-oriented and innovative company [3]. However, mass customisation may also reduce the returns and dividends for shareholders [1] [2] if it increases the cost and risk of production for FM [1] [2]. Mass customisation may also require more investment in research and development, technology, and marketing for FM [1] [2], which may reduce the cash flow and liquidity for shareholders [1] [2] and may also result in a decrease their returns. [1] [2]</p> <p>To conclude, mass customisation can have both positive and negative impacts on FM's shareholders. Therefore, FM should carefully weigh the benefits and costs of this change and implement it in a way that maximises the value, profits and dividends for the shareholders [1] [2].</p> <p>AO1 – 2 marks AO2 – 2 marks AO3 – 2 marks AO4 – 6 marks TOTAL – 12 marks</p>

Question	Answer		Marks
2(a)(ii)	Explain the term <i>just in time</i> (JIT).		3
AO1 Knowledge and understanding 1 mark		AO2 Application 2 marks	
		2 marks Developed application of one relevant point to a business context.	
1 mark Knowledge of one relevant point is used to answer the question.		1 mark Limited application of one relevant point to a business context.	
0 marks No creditable response.		0 marks No creditable response.	
<p>Indicative content</p> <p>AO1 Knowledge and understanding. Just-in-time production minimises the time, labour, and materials in a manufacturing process. It does so by only producing goods as they are needed. The desired outcome is a streamlined production system that maintains a minimal amount of on-site raw materials, minimal wait times in the production process and small batch sizes.</p> <p>Knowledge of JIT  may include:</p> <ul style="list-style-type: none"> • Inventory control system/production system • Buying inventory occurs when needed for production rather than using buffer stock (production). • JIT conditions need to be met e.g., reliable suppliers. <p>AO2 Application</p> <p>Limited application  applies knowledge of JIT to</p> <ul style="list-style-type: none"> • An example of inventory OR an example of when it is needed. <p>Developed application  +  applies knowledge of JIT to</p> <ul style="list-style-type: none"> • An example of inventory AND an example of when it is needed.

Question	Answer			Marks
2(a)(ii)	<p><i>Application can be made to GD or any other scenario/context/business.</i></p> <p>Accept all valid responses.</p>			
Exemplar and annotations		Mark	Rationale	
<p>Order raw materials when needed . For example, a manufacturer requires 1000 pieces of wood to produce a product would order when there is 1000 pieces of wood left . This could reduce waste and employees would know that there is not any spare materials so they can't make mistakes. </p>		3	An answer which starts with the knowledge and then applies it to a business context.	
<p>Holding zero buffer inventories . Components for making desks will be ordered when GD needs them . This will reduce storage costs for GD .</p>		3	In the context of the business, GD.	
<p>Inventory would come just when needed , but the company may need expensive IT systems to manage orders .</p>		2	Clear knowledge. Some application but not developed.	
<p>Not keeping any inventory, just ordering when needed. .</p>		1	A reasonable definition but no application.

Question	Answer		Marks
2(b)(ii)	Explain <u>one</u> disadvantage to GD's employees of it being a co-operative.		3
AO1 Knowledge and understanding 1 mark		AO2 Application 2 marks	
		2 marks Developed application of one relevant point to a business context.	
1 mark Knowledge of one relevant point is used to answer the question.	1 mark Limited application of one relevant point to a business context.		
0 marks No creditable response.	0 marks No creditable response.		
<p>Indicative content</p> <p>AO1 Knowledge and understanding Knowledge of a disadvantage  may include:</p> <ul style="list-style-type: none"> • Complex decisions = uncertainty = poor performance • Workers and worker directors might not have skills for decisions • Management roles unclear and therefore inefficiencies can occur • Unpredictable income for employees • Conflict/disagreements between employees <p>AO2 Application <i>Limited application</i> , <i>applies knowledge to GD once.</i> <i>Developed application</i>  +  <i>applies knowledge to GD twice.</i></p> <ul style="list-style-type: none"> • Ownership by workers who may be more interested in high profits. • Low wages compensated by profit share. • Poor decision making by manager. • Take decisions on votes not valid arguments. 			

Question	Answer			Marks
2(b)(ii)	Accept all valid responses.			
	Exemplar and annotations	Mark	Rationale	
	They may have limited capital [C] as need \$2m to open their own retail shop [LPP], as the members (employees) accept low salaries [LPP] and the investment may mean a lower share of profits for each of them.	3	A disadvantage using the context of opening a retail shop and that members accept low wages.	
	They may face conflicts among members, as all have a vote, due to differences in opinions [C], interests or planning, especially regarding the plan to open their own retail shop [LPP] or the management style of Steve [LPP].	3	Conflict is reasonable [C] and two references to the case study for 2 [LPP]s.	
	Part of the income employees earn comes from profit-share. [LPP] This may mean that the employees could face lower income if sales fall or costs rise. [C]	2	As there is knowledge of a disadvantage so can go back and award the APP.	
	They may lack secrecy as the affairs of the co-operative are open to all members [C] and sometimes to the public, which may expose them to competition.	1	Lack of secrecy a reasonable disadvantage, but the rest is not specifically related to GD.	
	They may have inefficient management [TV] as Steve, the Managing Director, spends too much time trying to make people happy rather than solving problems and responds to opinions rather than setting long-term plans. [NAO]	0	Although there is some relevant context, there is no knowledge of a disadvantage specific to a co-op (inefficient management could be in any business structure), so no marks can be awarded.	

Question	Answer			Marks	
2(c)	Analyse <u>two</u> sources of finance GD could use to open its new shop.			8

Question	Answer	Marks
2(d)	<p>Exemplar and annotations</p> <p>Steve’s management style seems to be a democratic one [1] [1], which is a type of participative management style [1]. This means that he values the input and opinions of his employees [1] and tries to involve them in decision-making and problem-solving. He also tends to be flexible, adaptable, and responsive to feedback which might suit a co-operative organisation [1].</p> <p>Some of the advantages of this management style are that it can increase employee engagement, motivation, creativity, and satisfaction [1]. It can also foster a positive work culture, where employees feel respected and valued [1]. It can also lead to better decisions, as more perspectives and ideas are considered [1] [1].</p> <p>However, some of the disadvantages of this management style are that it can be time-consuming, inefficient, and confusing [1] [1]. It can also create conflicts among employees, or between employees and managers. It can also make it difficult to implement changes or deal with crises, as there may be too much debate or uncertainty [1] [1]. It can also undermine the authority and credibility of the manager, if they appear indecisive, weak, or dependent on others [1] [1].</p> <p>Therefore, Steve’s management style may not contribute to GD’s future success, unless he can balance it with other styles when needed. For example, he may need to adopt a more authoritative or persuasive style when he needs to set clear goals, communicate expectations, or motivate employees to achieve results [1] [1]. He may also need to adopt a more transformational or visionary style when he needs to inspire employees with a shared vision, foster innovation, or cope with change. He may also need to adopt a more coaching style when he needs to develop the skills and potential of his employees.</p> <p>In conclusion, Steve’s management style has its strengths and weaknesses, but it may not be enough to ensure GD’s future success. He should be able to adapt his style according to the situation, the goals, and the people involved [1] [1].</p> <p>AO1 – 2 marks AO2 – 2 marks AO3 – 2 marks AO4 – 6 marks TOTAL – 12 marks</p>
