BUSINESS**9609/22**

Paper 2 Business Concepts 2

May/June 2026**MARK SCHEME**Maximum Mark: 60

Published

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

This document consists of **38** printed pages.

General marking principles

All examiners must apply these marking principles when marking candidate responses.

1	Examiners must award marks for each response in line with: - the specific content defined in the mark scheme - the specific skills defined in the mark scheme or in the level descriptions - the standard of response required as exemplified by the standardisation scripts.
2	Examiners must award whole marks (not half marks, or other fractions).
3	Examiners must award marks positively . This means that: - marks are not deducted for errors or omissions - marks are awarded for correct/valid answers as defined in the mark scheme and also for other valid answers which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate - the quality of spelling, punctuation and grammar are judged only when the mark scheme indicates that these features are specifically assessed in the question. However, the meaning of all responses must be unambiguous.
4	Examiners must consistently apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.
5	Examiners must use the full range of marks defined in the mark scheme, unless limited by the quality of the candidate responses seen.
6	Examiners must award marks according to the mark scheme and must not award marks with grade thresholds or grade descriptions in mind.

**Social Sciences-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. corrasion/corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	For objective points that are right or wrong.
	For objective points that are wrong.
	When there is a misunderstanding in a response.
	When the candidate has attempted something, but the mark/skill has not been awarded.
Highlighter Or Underline	To highlight a point or section of an answer that justifies the mark/annotation.
	When the candidate has attempted something, and the mark/skill has been awarded.
On page comment	To communicate with the supervisor.
	When the context has not been used.

PUBLISHED

Annotation	Meaning
SEEN	To show a page/section has been seen/read.
NAQ	When the response is not focussed on answering the question.
REP	The repetition of a previous point in a response or candidate is copying the case study/data.
OFR	The own figure rule applies – acts as a mark/tick.
K	When AO1 has been awarded. Number of Ks should match the mark awarded.
APP	When AO2 has been awarded. Number of APPs should match the mark awarded.
AN	When AO3 at Level 1 has been awarded.
DEV	When AO3 at Level 2 has been awarded.
EVAL	When AO4 at Level 1 has been awarded.
E	When AO4 at Level 2 has been awarded.
EE	When AO4 at Level 3 has been awarded.

Guidance on using levels-based marking

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2 etc. must be clearly annotated on the response at the point where the level is achieved.

Assessment objectives**AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

AO2 Application

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

AO3 Analysis

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

AO4 Evaluation

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

PREPARATION FOR MARKING

- 1 Make sure that you have completed the relevant training and have access to the *RM Assessor Guide*.
- 2 Make sure that you have read and understand the question paper, which you can download from <https://support.rm.com/ca>
- 3 Log in to RM Assessor then mark and submit the required number of practice and standardisation scripts. You will need to mark the standardisation scripts to the required accuracy in order to be approved for marking live scripts. You may be asked to re-mark them, or to mark a second sample, if you do not meet the required accuracy on your first attempt.

MARKING PROCESS

- 1 Mark strictly to the FINAL mark scheme, applying the criteria consistently and the general marking principles outlined on the previous page.
- 2 If you are in doubt about applying the mark scheme, consult your Team Leader.
- 3 Mark at a steady rate through the marking period. Do not rush, and do not leave too much until the end. If you anticipate a problem in meeting the deadline, contact your Team Leader immediately and the Examiners' Helpdesk.
- 4 Examiners will prepare a brief report on the performance of candidates to send to their Team Leader via email by the end of the marking period. The Examiner should note strengths seen in answers and common errors or weaknesses. Constructive comments on the question paper, mark scheme or procedures are also appreciated.

MARKING SPECIFICS**Crossed out work**

- 1 **All of a candidate's answers, crossed out or not, optional or not, must be marked.**
- 2 The only response not to be marked is one that has been crossed out and replaced by another response for that exact same question.
- 3 Consequently, if a candidate has crossed out their response to an optional question and gone on to answer a different optional question then both attempts must be marked. The higher mark will be awarded by the system according to the rubric.

0 (zero) marks or NR (no response)

- 1 Award **NR** if there is nothing at all written in answer to that question (often the case for optional questions).
- 2 Award **NR** if there is a comment which is not an attempt at the question (e.g. 'can't do it' or 'don't know' etc.)
- 3 Award **NR** if there is a symbol which is not an attempt at the question, such as a dash or question mark.
- 4 Award **0** (zero) if there is any attempt at the question which does not score marks. This includes copying the question onto an Answer Booklet.

Question	Answer	Marks										
2(b)(i)	Refer to Table 2.1. Calculate Zorba’s capital expenditure when he set up ZF. <i>Capital expenditure is the money a business spends to buy, maintain, or improve its non-current assets, such as buildings, vehicles, equipment, or land</i> <table><tr><td>Answer</td><td>Guidance</td></tr><tr><td> Knowledge of capital expenditure (1) <table><tr><td>Expenditure</td><td>Amount (\$)</td></tr><tr><td>Fixtures and fittings for the shop</td><td>10 000</td></tr><tr><td>Delivery vans (each)</td><td>20 000</td></tr></table> (1) \$10 000 + \$20 000 = \$30 000 (1) Answer = \$30 000 </td><td> Award 3 marks for correct answer of \$30 000 (with or without \$ sign). </td></tr></table>	Answer	Guidance	Knowledge of capital expenditure (1) <table><tr><td>Expenditure</td><td>Amount (\$)</td></tr><tr><td>Fixtures and fittings for the shop</td><td>10 000</td></tr><tr><td>Delivery vans (each)</td><td>20 000</td></tr></table> (1) \$10 000 + \$20 000 = \$30 000 (1) Answer = \$30 000	Expenditure	Amount (\$)	Fixtures and fittings for the shop	10 000	Delivery vans (each)	20 000	Award 3 marks for correct answer of \$30 000 (with or without \$ sign).	3
Answer	Guidance											
Knowledge of capital expenditure (1) <table><tr><td>Expenditure</td><td>Amount (\$)</td></tr><tr><td>Fixtures and fittings for the shop</td><td>10 000</td></tr><tr><td>Delivery vans (each)</td><td>20 000</td></tr></table> (1) \$10 000 + \$20 000 = \$30 000 (1) Answer = \$30 000	Expenditure	Amount (\$)	Fixtures and fittings for the shop	10 000	Delivery vans (each)	20 000	Award 3 marks for correct answer of \$30 000 (with or without \$ sign).					
Expenditure	Amount (\$)											
Fixtures and fittings for the shop	10 000											
Delivery vans (each)	20 000											

Question	Answer		Marks
2(b)(i)	Exemplar and annotations		
	Marks		
	3 marks	Correct answer \$30 000	Working and \$ does not matter. Must be three ✓ to denote the three marks.
	2 marks	Both of the following: • Correct knowledge of capital expenditure (explanation) • Correct identification of both capital expenditures OR • An incorrect answer with both capital expenditures and ONE revenue expenditure, correctly added up for OFR.	To award two marks, there must be • Two ✓ and a ✗ OR • One ✓, one ✗ and one OFR
	1 mark	One of the following: • Correct knowledge of capital expenditure (explanation) • Correct identification of both capital expenditures OR • An incorrect answer with both capital expenditures and TWO revenue expenditure, correctly added up for OFR.	To award one mark, there must be: • One ✓ and two ✗ • Two ✗ and one OFR
	0 marks	No creditable content.	To award zero marks, there must be • One ✗

Question	Answer			Marks
2(b)(i)	Examples of incorrect responses	Mark	Rationale	
	10 000 + 5 000 + 20 000 = 35 000	2	Two capital expenditures have been identified with one revenue expenditure also included (one error). The answer is correct based on OFR.	
	10 000 + 3 000 + 7 000 + 20 000 = 40 000	1	The two capital expenditures have been identified. However, there are two revenue expenditures also included (two errors). The answer is correct based on OFR.	
	Spending on long-term assets.	1	Knowledge of capital expenditure shown.	
	10 000 + 5 000 + 3 000 + 7 000 + 20 000 = 45 000	0	Although the two capital expenditures have been identified, there are three errors here (three revenue expenditures added), so this must be 0 marks.	
	10 000 + 5 000 = 15 000	0	Both capital expenditures have not been identified, and no knowledge of capital expenditure shown.

Question	Answer			Marks
2(b)(ii)	Exemplar and annotations	Mark	Rationale	
	Ask suppliers for more time to pay K so that Zorba can sell the flowers before he has to pay for APP the \$7 000 of inventory APP .	3	A way identified, explained and in context, so all 3 marks.	
	Take out an overdraft K because he does not have any savings left APP .	2	A way identified, and in context for ZF.	
	Zorba could return some of the flowers to the supplier K but he may not have enough to sell APP	2	A way identified and explained.	
	Delay payment K so he can check the flowers for any damage	1	A way identified – however the context has nothing to do with managing trade payables.	

Question	Answer				Marks
2(c)	Analyse <u>one</u> benefit and <u>one</u> limitation to Zorba of using a business plan when setting up ZF.				8
	Level	AO1 Knowledge and understanding 2 marks	AO2 Application 2 marks	AO3 Analysis 4 marks	
	2			3–4 marks Developed analysis - Developed analysis that identifies connections between causes, impacts and/or consequences of two points. - Developed analysis that identifies connections between causes, impacts and/or consequences of one point.

Question	Answer	Marks
2(c)	AO3 Analysis Limited analysis of a benefit of using a business plan AN, – developed analysis DEV, including: • To review ideas: allows the owner to see their ideas as a whole and make better business decisions – increase chances of success. • To get an overview of the business: to be able to plan better for the future and increase sales revenue – increasing profit. • Reduces risk: by identifying possible risks, ZF can make better decisions – increases profitability. • Allows the owner to measure success: gives specific quantitative and qualitative benchmarks for the owner to measure the success of the business – allows owners to decide whether to continuing investing or not. • To gain finance: most lenders require the owner to have planned for the future and therefore more likely to gain finance – increased chances of success. • To set objectives: better SMART objectives leading to better chance of success – more profit. • To quantify success: gives benchmarks for the owner to measure the success of the business – allows owners to decide whether to continuing investing or not. Limited analysis of a limitation of using a business plan AN, – developed analysis DEV, including: • Uncertainty of the future: a plan written at a certain point in time cannot cover every eventuality, making the plan useless – poor decision making in the future. • Lack of experience: the less established a business is, the less chance of a business plan being correct – unlikely to be successful. • Does not account for change: uncertain future events may affect sales – reduce profits. • Does not take into account external influences: changing factors outside of the business' control can mean the plan is out of date – poor decision making. • Does not guarantee success: some entrepreneurs assume a well-written plan ensures success, however it gives no guarantee and can lead to poor decision making – lower sales. • Takes time and effort: increases business costs – reduces profitability. • Costly: leading to an increase in operating costs – reduced profitability. • May miss new opportunities: reduces potential sales – lower profit. Accept all valid responses.
