May/June 2020

MARK SCHEME

Maximum Mark: 75

Published

Students did not sit exam papers in the June 2020 series due to the Covid-19 global pandemic.

This mark scheme is published to support teachers and students and should be read together with the question paper. It shows the requirements of the exam. The answer column of the mark scheme shows the proposed basis on which Examiners would award marks for this exam. Where appropriate, this column also provides the most likely acceptable alternative responses expected from students. Examiners usually review the mark scheme after they have seen student responses and update the mark scheme if appropriate. In the June series, Examiners were unable to consider the acceptability of alternative responses, as there were no student responses to consider.

Mark schemes should usually be read together with the Principal Examiner Report for Teachers. However, because students did not sit exam papers, there is no Principal Examiner Report for Teachers for the June 2020 series.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the June 2020 series for most Cambridge IGCSE™ and Cambridge International A & AS Level components, and some Cambridge O Level components.

This document consists of **13** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
1(a)	<p>1 mark per reason to max 3</p> <p>e.g.</p> <ul style="list-style-type: none"> • Division by zero • Array out of bounds • File does not exist • Stack overflow • Memory leakage • Hardware fault/failure 	3
1(b)	<p>1 mark per bullet point</p> <ul style="list-style-type: none"> • Check if file exist • Reporting appropriate exception <p>Python</p> <pre>try: file = open('MyData.txt')</pre> <p>except: print "No file found"</p> <p>Visual Basic (.net)</p> <pre>Try Dim fileReader As New System.IO.StreamReader("MyData.txt") Catch ex As Exception console.writeline("No file found") End Try</pre> <p>Pascal</p> <pre>try Readln("MyData.txt") except Writeln("No file found") end;</pre>	2

Question	Answer	Marks
2(a)	<p>1 mark per bullet point to max 4</p> <ul style="list-style-type: none">• Declaration of array with 3000 elements• ... of type CustomerRecord• Looping 3000 times• Accessing the username and password for each field• Correct initialisation of values to "" <pre>DECLARE CustomerLogIn : ARRAY[0:2999] OF CustomerRecord FOR x ← 0 TO 2999 CustomerLogIn[x].Username ← "" CustomerLogIn[x].Password ← "" ENDFOR</pre>	4

Question	Answer	Marks
2(b)(i)	<p>1 mark for each correctly filled in space</p> <pre> FUNCTION SearchHashTable(BYVALUE SearchUser : STRING) RETURNS INTEGER DECLARE Index : INTEGER DECLARE Count : INTEGER Index ← Hash(SearchUser) Count ← 0 WHILE (CustomerLogIn[Index].Username <> SearchUser) AND (CustomerLogIn[Index].Username <> "") AND (Count < 2999) Index ← Index + 1 Count ← Count + 1 IF Index > 2999 THEN Index ← 0 ENDIF ENDWHILE IF CustomerLogIn[Index].Username = SearchUser THEN RETURN Index ELSE RETURN -1 ENDIF ENDFUNCTION </pre>	7
2(b)(ii)	<p>1 mark per bullet point to max 2</p> <ul style="list-style-type: none"> • Records if you have checked every record // the number of records checked in the array • ... without finding the search value • ... and stops infinite loop // stopping condition 	2

Question	Answer	Marks
3(a)	1 mark per bullet point <ul style="list-style-type: none"> • Have a base case // stopping condition • Work toward the base case // general case // changes state • Call itself // defined in terms of itself 	3
3(b)	1 mark for each (shown in bold) <pre> FUNCTION IsPalindrome(CheckWord : STRING) RETURNS BOOLEAN IF Length(CheckWord) <= 1 THEN RETURN True ENDIF IF Substring(CheckWord, 0, 1) <> Substring(CheckWord, Length(CheckWord) - 1, 1) THEN RETURN False ELSE RETURN IsPalindrome(Substring(CheckWord, 1, Length(CheckWord) - 2)) ENDIF ENDIF ENDFUNCTION </pre>	5

Question	Answer	Marks
3(c)	<p>1 mark per bullet point</p> <ul style="list-style-type: none">• Function is defined and returns integer with correct parameters• Returns 1 if exponent is 0 // returns base if exponent is 1• Calculates base to power with recursive call ...• ... with correct parameters• Returns result of calculation <p>e.g.</p> <pre>FUNCTION FindPower(Base:INTEGER, Exp: INTEGER) RETURNS INTEGER DECLARE Value : INTEGER IF Exp = 0 THEN RETURN 1 ELSE Value ← Base * FindPower(Base, Exp - 1) RETURN Value ENDIF ENDFUNCTION</pre>	5

Question	Answer	Marks
4(a)	<p>1 mark per bullet point:</p> <ul style="list-style-type: none"> Name, Address and Telephone number beneath Customer details Class Details (or equivalent) below booking form ... with appropriate iteration of entering Class Details Class type, and Date and time beneath Class Details (or equivalent) Cost beneath Class Details (or equivalent) with Bronze, Silver and Gold below it (FT for name and position of Cost) with selection (FT for name and position of B, S, G) <p>e.g.</p>  <pre> graph TD BF[Booking Form] --> CD[Customer Details] BF --> CLD[Class Details *] BF --> TC[Total Cost] CD --> N[Name] CD --> A[Address] CD --> TN[Telephone number] CLD --> CT[Class type] CLD --> D[Date and time] CLD --> C[Cost] C --> B[Bronze] C --> S[Silver] C --> G[Gold] </pre>	7
4(b)	<p>1 mark for each feature to max 2</p> <ul style="list-style-type: none"> Sequence Selection Iteration 	2

Question	Answer	Marks
5(a)	<ul style="list-style-type: none"> • person(gina) • country(cyprus) • visited(gina, cyprus) 	3
5(b)	<p>1 mark for 2 correct, 2 marks for 3 correct</p> <p>william deeraj meghan</p>	2
