GEOGRAPHY 9696/33

Paper 3 Advanced Physical Geography Options

May/June 2022

1 hour 30 minutes

You must answer on the enclosed answer booklet.

You will need: Answer booklet (enclosed)

Insert (enclosed)

INSTRUCTIONS

Answer four questions in total:

Answer questions from two options.

For **each** option, follow the instructions inside on which questions to answer.

- Follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.
- Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.
- You should make reference to appropriate examples studied in the field or the classroom, even where such examples are not specifically requested by the question.

INFORMATION

- The total mark for this paper is 60.
- The number of marks for each question or part question is shown in brackets [].
- The insert contains all the resources referred to in the questions.

This document has 4 pages. Any blank pages are indicated.

Answer questions from **two** different options.

Tropical environments

If answering this option, answer Question 1 and either Question 2 or Question 3.

- **1** Fig. 1.1 shows a typical profile of an oxisol/latosol.
 - (a) Describe the main features of the profile shown in Fig. 1.1.
 - (b) Explain **two** ways in which climate is likely to have influenced the profile features you described in (a). [6]

[4]

[4]

- 2 Assess the relative importance of conditions influencing varying characteristics of tropical karst landforms. [20]
- **3** To what extent are air masses the most significant factor affecting tropical climates? [20]

Coastal environments

If answering this option, answer Question 4 and either Question 5 or Question 6.

- 4 Fig. 4.1 shows rates of salt weathering near Prawle Point, Devon, UK, 1980–84.
 - (a) Describe the variations in rates of salt weathering shown in Fig. 4.1.
 - (b) Suggest reasons for the variations you described in (a). [6]
- 5 Using a case study, assess the extent to which problems of sustainably managing a stretch or stretches of coastline have been solved. [20]
- **6** 'Wave energy is the most important factor influencing the formation of erosional landforms in coastal environments.'

How far do you agree? [20]

Hazardous environments

If answering this option, answer Question 7 and either Question 8 or Question 9.

- **7** Fig. 7.1 shows reported intensity of ground shaking produced by the 2014 South Napa earthquake, USA.
 - (a) Describe the pattern of reported intensity of ground shaking shown in Fig. 7.1. [4]
 - (b) Suggest two reasons for the pattern you described in (a). [6]
- 8 'Flooding is the most significant hazard from large-scale atmospheric disturbances.'

How far do you agree with this view?

[20]

9 Using a case study, evaluate the attempted or possible solutions to the problems of sustainable management of a hazardous environment. [20]

Hot arid and semi-arid environments

If answering this option, answer Question 10 and either Question 11 or Question 12.

- **10** Fig. 10.1 shows the hydrological regime of a small stream in an arid environment in Arizona, USA, 2013–14.
 - (a) Describe the hydrological regime shown in Fig. 10.1.

[3]

- (b) Suggest reasons for the characteristics of the hydrological regime you described in (a). [7]
- **11** Assess the relative importance of the causes of low biomass productivity in hot arid environments. [20]
- **12** To what extent do the global distributions of hot arid and semi-arid environments differ? [20]
