**9709/71**

Paper 7 Probability & Statistics 2 (**S2**)

**May/June 2018**

**1 hour 15 minutes**

Candidates answer on the Question Paper.

Additional Materials: List of Formulae (MF9)

**READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name in the spaces at the top of this page.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer **all** the questions in the space provided. If additional space is required, you should use the lined page at the end of this booklet. The question number(s) must be clearly shown.

Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question.

The use of an electronic calculator is expected, where appropriate.

You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

The total number of marks for this paper is 50.

This document consists of **12** printed pages.

4 The volume, in millilitres, of a small cup of coffee has the distribution  $N(103.4, 10.2)$ . The volume of a large cup of coffee is 1.5 times the volume of a small cup of coffee.

(i) Find the mean and standard deviation of the volume of a large cup of coffee. [3]

.....

.....

.....

.....

.....

.....

.....

(ii) Find the probability that the total volume of a randomly chosen small cup of coffee and a randomly chosen large cup of coffee is greater than 250 ml. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- 6 The time, in minutes, taken by people to complete a test is modelled by the continuous random variable  $X$  with probability density function given by

$$f(x) = \begin{cases} \frac{k}{x^2} & 5 \leq x \leq 10, \\ 0 & \text{otherwise,} \end{cases}$$

where  $k$  is a constant.

- (i) Show that  $k = 10$ . [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (ii) Show that  $E(X) = 10 \ln 2$ . [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(iii) Find  $P(X > 9)$ .

[3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(iv) Given that  $P(X < a) = 0.6$ , find  $a$ .

[3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

7 The number of absences by girls from a certain class on any day is modelled by a random variable with distribution  $Po(0.2)$ . The number of absences by boys from the same class on any day is modelled by an independent random variable with distribution  $Po(0.3)$ .

(i) Find the probability that, during a randomly chosen 2-day period, the total number of absences is less than 3. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(ii) Find the probability that, during a randomly chosen 5-day period, the number of absences by boys is more than 3. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(iii) The teacher claims that, during the football season, there are more absences by boys than usual. In order to test this claim at the 5% significance level, he notes the number of absences by boys during a randomly chosen 5-day period during the football season.

(a) State what is meant by a Type I error in this context. [1]

.....  
.....  
.....

(b) State appropriate null and alternative hypotheses and find the probability of a Type I error. [3]

.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....

(c) In fact there were 4 absences by boys during this period. Test the teacher's claim at the 5% significance level. [3]
