Paper 5 Probability & Statistics 1

October/November 2022

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has **16** pages. Any blank pages are indicated.

3 The times, t minutes, taken to complete a walking challenge by 250 members of a club are summarised in the table.

| | | | | | | |
|---------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Time taken (t minutes) | $t \leq 20$ | $t \leq 30$ | $t \leq 35$ | $t \leq 40$ | $t \leq 50$ | $t \leq 60$ |
| Cumulative frequency | 32 | 66 | 112 | 178 | 228 | 250 |

(a) Draw a cumulative frequency graph to illustrate the data.

[2]

(b) Use your graph to estimate the 60th percentile of the data.

On another occasion, one of the fair 4-sided spinners is spun repeatedly until a 3 is obtained. The random variable Y is the number of spins required to obtain a 3.

(c) Find $P(Y = 6)$. [1]

.....

.....

.....

.....

.....

.....

.....

.....

.....

(d) Find $P(Y > 4)$. [2]

5 Company *A* produces bags of sugar. An inspector finds that on average 10% of the bags are underweight.

10 of the bags are chosen at random.

(a) Find the probability that fewer than 3 of these bags are underweight. [3]

The weights of the bags of sugar produced by company *B* are normally distributed with mean 1.04 kg and standard deviation 0.06 kg.

(b) Find the probability that a randomly chosen bag produced by company *B* weighs more than 1.11 kg. [3]
