Paper 7
MARK SCHEME
Maximum Mark: 50
$\square$

## Mark Scheme Notes

Marks are of the following three types:
M Method mark, awarded for a valid method applied to the problem. Method marks are not lost for numerical errors, algebraic slips or errors in units. However, it is not usually sufficient for a candidate just to indicate an intention of using some method or just to quote a formula; the formula or idea must be applied to the specific problem in hand, e.g. by substituting the relevant quantities into the formula. Correct application of a formula without the formula being quoted obviously earns the M mark and in some cases an M mark can be implied from a correct answer.

A Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. Accuracy marks cannot be given unless the associated method mark is earned (or implied).

B Mark for a correct result or statement independent of method marks.

- When a part of a question has two or more "method" steps, the $M$ marks are generally independent unless the scheme specifically says otherwise; and similarly when there are several B marks allocated. The notation DM or DB (or dep*) is used to indicate that a particular M or B mark is dependent on an earlier $M$ or $B$ (asterisked) mark in the scheme. When two or more steps are run together by the candidate, the earlier marks are implied and full credit is given.
- The symbol $\checkmark$ implies that the A or B mark indicated is allowed for work correctly following on from previously incorrect results. Otherwise, A or B marks are given for correct work only. A and B marks are not given for fortuitously "correct" answers or results obtained from incorrect working.

Note: B2 or A2 means that the candidate can earn 2 or 0.
B2/1/0 means that the candidate can earn anything from 0 to 2 .

The marks indicated in the scheme may not be subdivided. If there is genuine doubt whether a candidate has earned a mark, allow the candidate the benefit of the doubt. Unless otherwise indicated, marks once gained cannot subsequently be lost, e.g. wrong working following a correct form of answer is ignored.

- Wrong or missing units in an answer should not lead to the loss of a mark unless the scheme specifically indicates otherwise.
- For a numerical answer, allow the A or B mark if a value is obtained which is correct to 3 s.f., or which would be correct to 3 s.f. if rounded ( 1 d.p. in the case of an angle). As stated above, an A or B mark is not given if a correct numerical answer arises fortuitously from incorrect working. For Mechanics questions, allow A or B marks for correct answers which arise from taking $g$ equal to 9.8 or 9.81 instead of 10 .

The following abbreviations may be used in a mark scheme or used on the scripts:
AEF Any Equivalent Form (of answer is equally acceptable)
AG

| BOD | Answer Given on the question paper (so extra checking is needed to ensure that the detailed working leading to the result is valid) |
| :--- | :--- |
| CAO | Correct Answer Only (emphasising that no "follow through" from a previous error is allowed) |
| CWO | Correct Working Only - often written by a 'fortuitous' answer |
| ISW | Ignore Subsequent Working |
| MR | Misread |
| PA | Premature Approximation (resulting in basically correct work that is insufficiently accurate) |
| SOSSee Other Solution (the candidate makes a better attempt at the same question) |  | lity of a solution may not be absolutely clear)

SR Special Ruling (detailing the mark to be given for a specific wrong solution, or a case where some standard marking practice is to be varied in the light of a particular circumstance)

## Penalties

[^0]| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 1 | $\lambda=(1.2+2.3) \div 2$ | 1 | M1 | Attempt combined mean, allow $1.2+2.3$ |
|  | $=1.75$ | 1 | A1 | Correct mean |
|  | $\mathrm{e}^{-1.75}\left(\frac{1.75^{2}}{2}+\frac{1.75^{3}}{3!}\right)$ | 1 | M1 | Allow incorrect mean. |
|  | $=0.421$ (3 sf) | 1 | A1 | Allow end errors (1 and/or 4) |
|  |  | 4 |  |  |
| 2(i) | $\frac{6}{\sqrt{120}} \quad$ oe seen | 1 | B1 | Or $6^{2 / 120}$ oe seen |
|  | $\frac{30-29}{\left(\frac{6}{\sqrt{120}}\right)} \quad(=1.826)$ | 1 | M1 | $\pm$ <br> Allow without $\sqrt{ } 120$. No sd/var mix |
|  | $\mathrm{P}\left(z>{ }^{\prime} 1.826\right.$ ' $)=1-\Phi\left({ }^{\prime} 1.826\right.$ ) | 1 | M1 | Correct tail consistent with their working |
|  | $=0.034(2 \mathrm{sf})$ | 1 | A1 | 0.0339 |
|  |  | 4 |  |  |
| 2(ii) | No <br> $n$ is large $(\geqslant 30)$ | 1 | B1 | $1^{\text {st }} \mathrm{B} 1$ for either comment |
|  | Sample mean is (appr) normally distrib or The CLT applies oe | 1 | B1 | $2^{\text {nd }}$ B1 for'No' with $2^{\text {nd }}$ comment (No mark for 'No' alone) |
|  |  | $2$ |  |  |

| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 3(i) | $\frac{3420}{60}(=57)$ | 1 | B1 |  |
|  | $\frac{60}{59}\left(\frac{195200}{60}-' 57^{\prime 2}\right) \quad(=4.40678)$ | 1 | M1 | Oe |
|  | $=4.41$ (3 sf) | 1 | A1 | As final answer |
|  |  | 3 |  |  |
| 3(ii) | $' 57 ' \pm z \sqrt{\frac{\text { '4.40678' }}{60}}$ | 1 | M1 |  |
|  | $z=2.326$ | 1 | B1 | $2.326-2.329$ (accept 2.33 if no better seen) |
|  | [56.4 to 57.6] (3 sf) | 1 | A1 | NB: use of biased variance in (ii) can score in full |
|  |  | 3 |  |  |
| 4(i) | $k \int_{1}^{2}(3-x) d x=1$ | 1 | M1 | Attempt $\int \mathrm{f}(x)=1$, ignore limits or $\frac{k}{2}\left(\mathrm{~h}_{1}+\mathrm{h}_{2}\right)=1$ |
|  | $k\left[3 x-\frac{x^{2}}{2}\right]_{1}^{2}=1$ | 1 | A1 | Correct integration \& limits or $\frac{k}{2}(2+1)=1$ |
|  | $(k(6-2-(3-0.5))=1)$ <br> $k \times 1.5=1$ or $k \times \frac{3}{2}=1$ or $k=\frac{1}{1.5}$ oe $k=\frac{2}{3} \mathbf{A G}$ | 1 | A1 | No errors seen |
|  |  | 3 |  |  |

| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 4(ii) | $\frac{2}{3} \int_{1}^{m}(3-x) d x=0.5$ oe $\int$ from m to 2 | 1 | M1* | Attempt Int $\mathrm{f}(x)=0.5$, ignore limits oe Or use of area of trapezium |
|  | $\begin{aligned} & \left(\frac{2}{3}\left[3 x-\frac{x^{2}}{2}\right]_{1}^{m}=0.5\right) \\ & \frac{2}{3}\left[3 m-\frac{m^{2}}{2}-2.5\right]=0.5 \end{aligned}$ | 1 | DM1 | Sub of correct limits into their integral. Or trapezium using 1 and $\mathrm{m} / \mathrm{m}$ and 2 Any correct 3-term $\mathrm{QE}=0$ or $(\mathrm{m}-3)^{2}=2.5$ |
|  | $m^{2}-6 m+6.5=0$ oe | 1 | A1 |  |
|  | $\begin{aligned} & \left(\begin{array}{l} \left.m=\frac{6 \pm \sqrt{36-4 \times 6.5}}{2}=1.42 \text { or } 4.58\right) \\ m=1.42(3 \mathrm{sf}) \end{array}\right. \end{aligned}$ | 1 | A1 | or $\frac{6-\sqrt{10}}{2}$ oe; single correct ans |
|  |  | 4 |  |  |
| 5(i) | $\mathrm{Po}(1.6)$ stated or implied | 1 | M1 |  |
|  | $\mathrm{P}(X>3)=1-\mathrm{e}^{-1.6}\left(1+1.6+\frac{1.6^{2}}{2}+\frac{1.6^{3}}{3!}\right)$ | 1 | M1 | Allow M1 for $1-\mathrm{P}(X \leqslant 3)$, incorrect $\lambda$ and allow one end error |
|  | $=0.0788$ (3 sf) | 1 | A1 | SR Use of Bin scores B1 only for 0.0788 |
|  |  | 3 |  |  |

| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 5(ii) | $\lambda=\frac{n}{2500}$ | 1 | B1 | Alt method 1: $e^{-\mu}<0.05$ M1 Alt method 2: $\frac{2499}{2500}$ B1 |
|  | $\mathrm{e}^{-\frac{\mathrm{n}}{2500}}<0.05 \quad \begin{array}{ll} \text { Allow }= \\ & \text { Allow incorrect } \lambda \end{array}$ | 1 | M1 | Alt method 2: $\left(\frac{2499}{2500}\right)^{n}<0.05$ M1 |
|  | $\begin{aligned} & -\frac{n}{2500}<\ln 0.05 \text { Attempt } \ln \mathrm{bs} \\ & n>7489.3(1 \mathrm{dp}) \end{aligned}$ | 1 | M1 | Alt method 1: $-\mu<\ln 0.05$ $(\mu>2.9957) \quad \text { M1 }$ <br> Alt method 2: $n \ln \frac{2499}{2500}<\ln 0.05 \quad$ M1 |
|  | Smallest $n=7490$ | 1 | A1 | $\begin{aligned} & \text { Alt method 1: } n=\mu \times 2500 \\ & \text { Smallest } n=7490 \quad \text { A1 } \\ & \text { Alt method 2: Smallest } n=7488 \quad \text { A1 } \end{aligned}$ |
|  |  | 4 |  |  |
| 6(i) | $\mathrm{E}(T)=9 \times 78+7 \times 66 \quad(=1164)$ | 1 | B1 | Or $9 \times 78+7 \times 66-1200$ |
|  | $\operatorname{Var}(T)=9 \times 7^{2}+7 \times 5^{2} \quad(=616)$ | 1 | B1 |  |
|  | $\frac{1200--^{\prime} 1164^{\prime}}{\sqrt{616}} \quad(=1.450)$ | 1 | M1 | $\pm$ Allow without $\sqrt{ }$ |
|  | $\mathrm{P}(z<1.450)=\Phi(1.450)$ | 1 | M1 |  |
|  | $=0.927$ ( 3 sf ) | 1 | A1 | Correct tail consistent with their mean |
|  |  | 5 |  |  |

| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 6(ii) | $\mathrm{E}(\mathrm{D})=66-78 \quad(=-12)$ | 1 | B1 | Both needed |
|  | $\begin{array}{ll} \operatorname{Var}(D)=7^{2}+5^{2} & (=74) \\ \frac{0-\left('^{\prime}-12^{\prime}\right)}{\sqrt{74}} & (=1.395) \end{array}$ | 1 | M1 | $\pm$ Allow without $\sqrt{ }$ |
|  | $\mathrm{P}(\mathrm{D}>0)=1-\Phi\left({ }^{\prime} 1.395\right.$ ' | 1 | M1 | Correct tail consistent with their mean |
|  | 0.0815 (3 sf) | 1 | A1 | Similar scheme for $\mathrm{P}(\mathrm{M}-\mathrm{W})<0$ |
|  |  | 4 |  |  |
| 7(i) | Prob could be different later in day or on a different day oe | 1 | B1 | or any explanation why not random or "Not random" or "Not representative" |
| 7(ii) | Looking for decrease (or improvement) | 1 | B1 | oe |
|  | $\begin{aligned} & \mathrm{H}_{0}: \mathrm{P}(\text { not arrive })=0.2 \\ & \mathrm{H}_{1}: \mathrm{P}(\text { not arrive })<0.2 \end{aligned}$ | 1 | B1 | Allow " $p=0.2$ " |
|  |  | 2 |  |  |
| 7(iii) | Concluding that prob has decreased (or publicity has worked) when it hasn't oe | 1 | B1 | In context |

| Question | Answer | Marks | Partial Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| 7(iv) | $\mathrm{P}(X=0)$ and $\mathrm{P}(X=1)$ attempted | 1 | M1 | B(30, 0.2) Not nec' $y$ added <br> May be implied by calc $\mathrm{P}(X \leqslant 2)$ or $\mathrm{P}(X \leqslant 3)$ |
|  | $\begin{gathered} \mathrm{P}(X \leqslant 2)=0.8^{30}+30 \times 0.8^{29} \times 0.2+ \\ { }^{30} \mathrm{C}_{2} \times 0.8^{28} \times 0.2^{2} \\ (=0.0442) \end{gathered}$ | 1 | M1 | Attempt $\mathrm{P}(X \leqslant 2)$ |
|  | $\begin{array}{r} \mathrm{P}(X \leqslant 3)=0.8^{30}+30 \times 0.8^{29} \times 0.2+ \\ { }^{30} \mathrm{C}_{2} \times 0.8^{28} \times 0.2^{2}+{ }^{30} \mathrm{C}_{3} \times 0.8^{87} \times 0.2^{3} \\ =0.123 \end{array}$ | 1 | B1 | Or '0.0442' ${ }^{30} \mathrm{C}_{3} \times 0.8^{27} \times 0.2^{3}=0.123$ |
|  | cr is $X \leqslant 2$ | 1 | A1 |  |
|  | P (Type I) $=0.0442(3 \mathrm{sf})$ | 1 | A1 |  |
|  |  | 5 |  |  |
| 7(v) | 3 is outside cr | 1 | M1 | Comparison of 3 with their cr or $\mathrm{P}(X \leqslant 3)=0.123$ which is $>0.05$ |
|  | No evidence that $p$ has decreased (or that publicity has worked) | 1 | A1 $\checkmark$ | Correct conclusion. No contradictions |
|  |  | 2 |  |  |

Page 10 of 10

[^0]:    MR -1 A penalty of MR-1 is deducted from $A$ or $B$ marks when the data of a question or part question are genuinely misread and the object and difficulty of the question remain unaltered. In this case all $A$ and $B$ marks then become "follow through $\sqrt{ }$ " marks. MR is not applied when the candidate misreads his own figures - this is regarded as an error in accuracy. An MR -2 penalty may be applied in particular cases if agreed at the coordination meeting.

    PA -1 This is deducted from A or B marks in the case of premature approximation. The PA -1 penalty is usually discussed at the meeting.
