Paper 2 Key Media Concepts

**May/June 2021**

MARK SCHEME

Maximum Mark: 100

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **15** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation, and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**English & Media subject specific general marking principles**

**(To be read in conjunction with the Generic Marking Principles (and requiring further guidance on how to place marks within levels))**

**Components using level descriptors:**

- We use level descriptors as a guide to broad understanding of the qualities normally expected of, or typical of, work in a level.
- Level descriptors are a means of general guidance and should not be interpreted as hurdle statements.
- Where indicative content notes are supplied for a question, these are *not* a prescription of required content, and must not be treated as such. Alternative correct points and unexpected answers in candidates' scripts must be given marks that fairly reflect the knowledge and skills demonstrated.
- While we may have legitimate expectations as to the ground most answers may occupy, we must at all times be prepared to meet candidates on their chosen ground, provided it is relevant ground (e.g. clearly related to and derived from a relevant passage/text and meeting the mark scheme requirements for the question).

**Components using point-based marking:**

Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term).
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct.
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.).
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities.
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct unless this is part of the test. However, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion).

**Assessment Objectives**

The Assessment Objectives are applied to each question. The assessment objectives for the paper are:

- **AO1** Demonstrate knowledge and understanding of media concepts, contexts, and critical debates, using terminology appropriately. (60%)
- **AO2** Analyse media products, and evaluate their own work, by applying knowledge and understanding of theoretical and creative approaches, supported with relevant textual evidence. (40%)

The Level Descriptors guide examiners to an understanding of the qualities normally expected of, or typical of, work in a band. They are a means of general guidance and must not be interpreted as hurdle statements. For the purposes of standardisation of marking, they are to be used in conjunction with the Standardisation scripts discussed during the coordination meeting and with Team Leaders, as well as the question-specific notes.

The indicative content provided is for general guidance; it is not designed as prescriptions of required content and must not be treated as such. Whilst there are legitimate expectations of the content of most answers, examiners may see responses that include ideas not covered in the indicative content. For these cases, examiners should credit valid responses fairly and not penalise candidates for including valid points outside the mark scheme.

**Using a banded mark scheme**

Place the answer in a level first. Look for the “best fit” of the answer into a level. An answer needs to show evidence of most but not necessarily ALL the qualities described in a level in order to be placed in that band. Then award a mark for the relative position of the answer within the level.

**Higher level** responses (Levels 4 & 5) will demonstrate excellent knowledge and understanding of the key concepts (AO1). They should use a wide range of terminology accurately (AO1). They should show clear understanding of how meaning is created in the text (AO2). They should support their answer with many detailed references to the text (AO2).

**Middle range** responses (Level 3) will demonstrate satisfactory knowledge and understanding of the key concepts – there may be uneven coverage or some misunderstanding (AO1). They should use some terminology, but not always accurately (AO1). They should show some understanding of how meaning is created in the text (AO2). They should support their answer with some references to the text (AO2).

**Basic** responses (Levels 1 & 2) will demonstrate basic knowledge and understanding of the key concepts –misunderstanding might be common (AO1). They might use some terminology, but rarely accurately (AO1). They will have limited understanding of how meaning is created in the text (AO2). They rarely support their answer with references to the text (AO2).

1	<ul style="list-style-type: none"> <li>• VO ‘something’s coming – something hungry for blood’ – bathetic realisation that it’s said by a child playing a game</li> <li>• There is dramatic irony in their deadly serious dialogue about fantasy peril (‘that sound: boom, boom’) The ‘demogorgon’ is produced with a similarly reverberating doom-laden sound as that in the lab – humorous exaggeration of peril, but deadly serious to the players – an expression of its significance to them</li> <li>• Music emerges with mother – synthesized, self-consciously retro – childhood romanticised?</li> <li>• Electrical noise as lights flicker outside the house</li> </ul> <p><b>Mise-en-scene:</b></p> <ul style="list-style-type: none"> <li>• Specific historical caption (date, place) encourages suspension of disbelief (an alternative history?). Second caption invokes the secret histories of the <i>X Files</i> – national labs, US departments</li> <li>• Inside the lab – flickering lights – the iconography of a scientific facility in lockdown</li> <li>• Upside down CU of scientist’s face before he is grabbed by something unseen – emphasising monstrous power off-screen (and an intertextual reference to <i>Alien</i>?)</li> <li>• CU on lawn sprinkler emphasises its ‘violence’ - a link with the machinery of the lab – a bridge between the domestic sphere and lab?</li> <li>• Iconography of 80s basement – low tech, pizza box, Coke cans, paper-based games – a nostalgic evocation of 80s film/TV</li> <li>• lights flicker outside the house – we’ve seen this before – it’s a bad sign</li> </ul>		

Question	Answer	Marks	Guidance
1	<p><b>Editing:</b></p> <ul style="list-style-type: none"> <li>• Rapid cutting from face to feet as the scientist flees – emphasises panic</li> <li>• Cut to lawn sprinkler from lab links the two spaces</li> <li>• Cuts between CUs of boys introduces us to the four characters</li> <li>• Rapid cutting between the boys to emphasise the importance of countering the attack by the demogorgon – disagreement over ‘fireball’ or ‘protection’ – the stakes seem high and depend upon the roll of the dice</li> <li>• Bathetic interruption from mother – no sense of the significance of ‘the campaign’</li> </ul> <p><b>Meaning:</b> The extract introduces us to the four main characters via a deadly serious game of Dungeons and Dragons. Their game clearly resonates with something actually deadly which is occurring in the Hawkins National Lab and the suggestion is that this peril will break into their cosy adolescent lives. The affectionate portrayal of the four boys is matched by what seems to be a contemporary affection for the 1980s communicated through the attention to detail in the mise-en-scène and music. There is a romanticism and nostalgia built in – even within the fictional world, given that the boys are already wistful about a time four years ago when Nancy was ‘cool’. Adults vs children, evocation of nostalgia, Spielbergian, innocence of youth/boys, hopeless/untrustworthy adults, nerdiness, classic American suburb, girls unattainable/the other</p>
