9702/31

Paper 31 Advanced Practical Skills 1

October/November 2008

CONFIDENTIAL INSTRUCTIONS

Great care should be taken to ensure that any confidential information given does not reach the candidates either directly or indirectly.

No access to the Question Paper is permitted in advance of the examination.

If you have any problems or queries regarding these Instructions, please contact CIE
by e-mail: International@cie.org.uk,
by phone: +44 1223 553554,
by fax: +44 1223 553558,
stating the Centre number, the nature of the query and the syllabus number quoted above.

This document consists of **6** printed pages and **2** blank pages.

Preparing apparatus

These instructions detail the apparatus required for the experiments in the Question Paper. It is essential that absolute confidentiality is maintained in advance of the examination: the contents of these instructions must not be revealed either directly or indirectly to candidates.

No access is permitted to the Question Paper in advance of the examination.

If you have problems or queries regarding these instructions, please contact CIE:

by e-mail: international@cie.org.uk,
or by telephone: +44 1223 553554,
or by fax: +44 1223 553558,

stating the nature of the query and quoting the syllabus and paper numbers (9702/31).

It is assumed that the ordinary apparatus of a Physics laboratory will be available.

Number of sets of apparatus

The number of sets of apparatus provided for each experiment should be $\frac{1}{2}N$, where N is the number of candidates taking the examination. There should, in addition, be a few spare sets of apparatus available in case problems arise during the examination.

Organisation of the examination

Candidates should be allowed access to the apparatus for each experiment for one hour only. After spending one hour on one experiment, candidates should change over to the other experiment. The order in which a candidate attempts the two experiments is immaterial.

Assistance to Candidates

Candidates should be informed that, if they find themselves in real difficulty, they may ask the Supervisor for practical assistance, but that the extent of this assistance will be reported to the Examiner, who may make a deduction of marks.

Assistance should only be given:

when it is asked for by a candidate,
or as directed in the Notes sections of these instructions,
or where apparatus is seen to have developed a fault.

Assistance should be restricted to enabling candidates to make observations and measurements. Observations and measurements must not be made for candidates, and no help should be given with data analysis or evaluation.

All assistance given to candidates must be reported on the Supervisor's Report Form.

Faulty apparatus

In cases of faulty apparatus (not arising from a candidate's mishandling) that prevent the required measurements being taken, the Supervisor may allow extra time to give the candidate a fair opportunity to perform the experiment as if the fault had not been present. The candidate should use a spare copy of the Question Paper when the fault has been rectified or when working with a second set of apparatus.

Supervisor's Report

The Supervisor should complete the Supervisor's Report Form on pages 7 and 8 and enclose it in the envelope containing the answers of the candidates. If more than one envelope is used, a copy of the report must be enclosed in each envelope.

Question 1**Apparatus requirements (per candidate)**

Two pendulum bobs.

Two 0.8 m lengths of thin string.

One stand of height at least 75 cm, two bosses and two clamps.

Four small blocks of wood. The blocks will be used to grip the strings in the clamps.

Metre rule with a millimetre scale.

Stopwatch reading to 0.1 s or better.

Wooden rod, diameter about 1 cm, length about 15 cm (a pencil would be suitable).

Notes

- 1 Attach a pendulum bob to one end of each string.
- 2 If the apparatus is to be used by a second candidate, it should be dismantled.

Information required by Examiners

None.

Question 2

Apparatus requirements (per candidate)

Coil constructed from (see Note 1): 12 cm length of plastic or cardboard tube between 40 mm and 60 mm in diameter.

Length of 36 swg (diameter about 0.19 mm) bare constantan wire.

Sellotape.

Ammeter (0 – 1A) digital or analogue.

Voltmeter (0 – 5V) digital or analogue.

1.5V dry cell in holder.

Five connecting leads. At least two of them should terminate in 4 mm plugs.

Access to a micrometer.

Access to a plotting compass.

30 cm rule with a millimetre scale.

Notes

- 1 Use the tube, constantan wire and sellotape to construct the 4-turn coil (shown in Fig. 2.1) as follows:
 - Wrap the wire tightly around the tube with a coil spacing of about 1 cm. Secure the turns with strips of Sellotape, leaving gaps between the strips so that a contact can be made with the wire.
 - Cut off excess wire.
 - Check that the wire is not short-circuited by the turns of the coil touching each other.

Fig. 2.1

- 2 If the apparatus is to be used by a second candidate, it should be dismantled and the coil checked again for short-circuits.

Information required by Examiners

None.

This form should be completed and sent to the Examiner with the scripts.

SUPERVISOR'S REPORT FORM

General Certificate of Education Advanced Subsidiary Level and Advanced Level

October/November Session 2008

The Supervisor's Report should give full details of:

- (a) any help given to a candidate (including the nature of the help given and the name and candidate number of the candidate);
- (b) any cases of faulty apparatus (including the nature of the problem, the action taken to rectify it, any additional time allowed, and the name and candidate number of the candidate);
- (c) any accidents that occurred during the examination;
- (d) any other difficulties experienced by candidates, or any other information that is likely to assist the Examiner, especially if this information cannot be discovered in the scripts.

Cases of individual hardship, such as illness, bereavement or disability, should be reported direct to CIE on the normal Special Consideration form.

Information required by Examiners

Question 1: None.

Question 2: None.

Supervisor's Report

Supervisor's Report (continued)

Declaration

(to be signed by the Supervisor)

The preparation of this practical examination has been carried out so as to maintain fully the security of the examination.
