

**MARK SCHEME for the October/November 2011 question paper
for the guidance of teachers**

**9713 APPLIED INFORMATION TECHNOLOGY AND
COMMUNICATION TECHNOLOGY**

9713/12

Paper 1 (Written A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

1 (a) **Four** descriptions and **four** advantages from:

Use – satellite navigation system/GPS to find her way to the stores
 Advantage – more up to date maps/easier to locate route/can find alternative route avoiding traffic jams/don't have to stop or get distracted by trying to use a map as GPS has audio capability/more robust than an atlas

Use – a laptop/PDA/handheld computer to store her appointments
 Advantage – quicker/easier to search for information/can set meeting alerts

Use – a laptop/PDA/handheld computer/mobile phone for storing phone numbers.
 Advantage – quicker/easier to search for information

Use – mobile phone to contact the store she is visiting (when in traffic jams)/contact office
 Advantage – can be used wherever you are

Use – an MP3 player to listen to her music/for entertainment
 Advantage – more portable than a CD player/a number of CDs/stores more tracks

Use – a laptop to type up reports
 Advantage – easier to edit/format text

Use – Laptop + internet connection to email reports
 Advantage – report is with head office/manager more quickly

Use – Digital camera to take photos to include in report
 Advantage – can upload images directly/quickly into report

[8]

2 Maximum of **two** ways with **two** marks awarded for each way thus –

Two from:

graphs/charts can be produced
 comparison of student's chart with target grades
 comparison of student's chart with class average
 comparison of student's chart with previous scores
 gradient of the graph shows whether there is improvement or not

Two from:

conditional formatting is used:
 to colour cells red for below average progress
 to colour cells orange for average
 to colour cells green for above average progress

Two from:

separate sheets to store scores for different classes/groups
 graphs/charts produced to compare progress of different groups/classes

Two from

calculate average score of student
 comparison of student's score with average
 comparison of student's score with target grades

[4]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

3 (a) Four from:

- Examples of how to use the system e.g. (screenshots/video tutorial of how to) print/load/save/install etc.
- The purpose of the system
- The input and output formats
- The hardware and software needed to run the system
- Examples of sample runs of the system
- What to do when errors occur/meaning of error messages
- Troubleshooting (guide)/frequently asked questions [4]

(b) Two from:

- Saves computer company time in the long run as they will not be contacted on a regular basis
- Saves computer company time in the long run as they will not need to visit users to show them how to use the system
- Save money as they won't need to employ as many customer support staff [2]

4 (a) Condensing unit [1]

- One from: [1]
- Allows refrigerant to cool/cool gas to form liquid
- Is situated at rear of refrigerator [1]

Evaporation unit [1]

- One from: [1]
- Absorbs heat from surrounds thereby cooling it
- Is situated inside refrigerator [1]

(b) Two from:

- Sensor to monitor temperature inside refrigerator
- Contact switch/pressure sensor to check if the door is closed
- Number pad/touch pad/touch screen to input required temperature
- LED display/screen to indicate current temperature inside the refrigerator
- Actuator to activate buzzer/Buzzer if door is left open
- Actuator to activate compressor
- Actuator to activate valve [2]

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

- (c) **Four** from:
- required temperature is input/set
 - microprocessor reads temperature from sensor
 - Data from the sensor converted to digital/using an ADC
 - temperature of refrigerator/value read by sensor/current temperature is compared to pre-set value
 - if greater than preset value microprocessor activates/sends a signal to actuator
 - if greater than preset value microprocessor/actuator switches compressor on
 - if greater than preset value microprocessor/actuator opens valve
 - if it is below the preset value microprocessor activates/sends a signal to actuator
 - if below the preset value actuator/microprocessor switches compressor off
 - if below the preset value actuator/microprocessor switches valve off
 - microprocessor sends data to LEDs indicating the current refrigerator temperature
 - microprocessor compares data from pressure sensor with zero/checks contact switch
 - if it is zero/contact broken microprocessor sends a signal to the actuator
 - if it is zero/contact broken actuator/microprocessor switches the buzzer on
- [4]

5 (a) Data flow diagrams [1]

One from:

Uses terminators, processes, flow arrows and stores
Represents inputs, outputs and processing [1]

System flowcharts [1]

One from:

Uses particular input, output, storage and processing symbols
Represents inputs, outputs and processing (only if not used for DFDs) [1]

(b) **Five** from:

- Helps identify problems with the current system
- Detail of the diagrams will reveal any weaknesses in the current system.
- easier to see where there is job duplication
- helps identify suitable hardware/software (for a new system)
- establishing inputs, outputs and processing requirements
- identifies storage requirements
- helps identify volume of data.
- helps identify the user/information requirements
- can see exactly what job each worker is doing

[5]

6 (a) Five from:

- Consists of a number of (separate) tables
- For example, a customer records table and a sales table
- Tables are linked to each other
- using a primary/key field
- For example, the customer number
- this field is part of other table(s)
- Data from one table can be combined with data from other table(s) when producing reports.
- Can select different fields from each table for output
- SQL is used for queries and producing reports
- Relationships can be one to one, one to many, many to one, many to many

[5]

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

(b) Three from:

- Data is not repeated
- less storage capacity needed
- If data was duplicated hackers would have easier access to data
- Easier to expand
- Data only needs to be amended once
- Easier to produce reports with cross-tabular data rather than separate files

[3]

(c) Four from, Customer data must be:

- Kept secure
- fairly and lawfully processed
- processed for limited purposes
- adequate/relevant/not excessive
- accurate and up to date
- not kept longer than necessary
- processed in accordance with the individual's rights/not passed to third parties without their permission.
- not transferred to countries outside that country unless it has adequate protection for the individual interests of the individual or another person

[4]

7 (a) Five from:

- Web authoring package to create web site
- Word-processing package for typing text/tables etc.
- DTP for creating pages for website
- Spreadsheet to create statistical tables/graphs for inclusion in the website
- Communications software to connect to Internet
- Web browser to see how the web site appears to users
- Graphics software/image editing software for editing/creating images
- Animation software to edit/create animations for inclusion in the website
- Video editing software to edit videos for inclusion in the website
- Sound editing software to edit sound for inclusion in the website
- Presentation software to create slideshows

[5]

(b) Four from:

- type in/enter website(address)/select shop website from favourites
- Browse product categories
- browse products
- place selected products in shopping basket
- go to the/click on checkout.
- enter/log on using username and password
- enter billing address
- enter shipping address
- customers who are not previously registered must type in personal details
- choose method of payment.
- Enter bank/credit card account details
- choose method/speed of delivery
- confirm order
- Click on log off

[4]

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

(c) Three from:

Items are usually cheaper as staff costs are lower/rental/running costs are lower
Customers can spend time comparing products and prices without being rushed
can shop at time of their own choice
don't have to spend time queuing/going around different shops/travelling to shop/can avoid traffic congestion
disabled people don't have to leave house
can look at wide range of shops all around the world/can use price comparison websites
No travelling expenses/don't waste fuel
Don't feel embarrassed showing certain products to a cashier/lacks confidence talking to a cashier

[3]

(d) Three from:

security concerns about data transmitted over internet such as hacking, phishing, pharming, spyware, viruses, malware
description of phishing
description of pharming
can order goods and they don't get delivered
goods are not to the same standard as those ordered/can't check the standard of goods before buying
may be hidden costs such as delivery charges
description of viruses
Expense of buying a computer with a broadband internet connection

[3]

8 (a) Two from:

Phone operators will be paid less
Buildings needed to house call centres will be cheaper to buy/rent
Call centre opening during normal hours in some countries would be unsociable hours in UK leading to a lower wage bill.
The operators would be better qualified
The operators would be more motivated

[2]

(b) Two from:

The operator might not understand UK dialects
The customer might not understand operator's accent
Operators might have difficulty with UK culture
Operators may be inclined to stick to script/may be unable to answer out of the ordinary questions

[2]

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2011	9713	12

(c) Two matched pairs from:

Too many plugs connected to a socket/overheating of computers can be a fire hazard
 Make sure there are enough sockets in the room/don't overload sockets/CO₂ fire extinguisher/use LCD monitors/have adequate ventilation/don't place computers too close together/make sure ventilation holes are not blocked

Bare wires/spilt drinks can cause electrocution
 Don't allow food and drink inside room/ensure all wires are fully insulated

Trailing cables can cause tripping
 Ensure adequate trunking is in place/place cables under carpet/use WiFi devices

heavy equipment may fall and injure somebody
 ensure desks or tables are large enough and sturdy [4]

9 (a) *Part time working* – working a limited number of hours/working less than the normal working hours of a full time employee [1]

Flexible working hours – workers choose the time of day they want to work (but work the same number of hours every week) [1]

Job sharing – two (or more) workers doing the job of one worker (working full time) [1]

Compressed hours – working for same number of hours as a normal working week but over fewer days [1]

(b) Four from:

Part time working/job sharing

Helps to retain and attract staff

When fully trained staff are retained no need to train new workers

Stores open in the evening so part time staff can be used for unsociable hours

Workers can be fresher and more creative

can use a number of employees at busier times/fewer at quieter times

Flexible working hours/ Compressed hours

Shops can be open for longer periods

Allowing for individual workers' needs improves absenteeism/punctuality

Appeals to employees so helps recruitment and retention of staff

Employers can match employees' working hours with busy and not so busy times

Job sharing

Employer gets two sets of skills for the cost of employing one worker [4]
