Paper 3 Theory (Core)

March 2020

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2020 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **12** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Science-Specific Marking Principles

- 1 Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.
- 2 The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.
- 3 Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).
- 4 The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

5 'List rule' guidance (see examples below)

For questions that require *n* responses (e.g. State **two** reasons ...):

- The response should be read as continuous prose, even when numbered answer spaces are provided
- Any response marked *ignore* in the mark scheme should not count towards *n*
- Incorrect responses should not be awarded credit but will still count towards *n*
- Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should **not** be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response
- Non-contradictory responses after the first *n* responses may be ignored even if they include incorrect science.

6 Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form, (e.g. $a \times 10^n$) in which the convention of restricting the value of the coefficient (*a*) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

7 Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

mark scheme abbreviations

- ; separates marking points
- / alternatives
- **R** reject
- **A** accept (for answers correctly cued by the question, or guidance for examiners)
- **I** ignore as irrelevant
- **AW** alternative wording (where responses vary more than usual)
- **AVP** alternative valid point
- **ora** or reverse argument
- underline actual word given must be used by candidate (grammatical variants excepted)

Question	Answer	Marks	Guidance
1(a)(i)		5	6 correct = 5 marks 4 or 5 correct = 4 marks 3 correct = 3 marks 2 correct = 2 marks 1 correct = 1 mark
1(a)(ii)	a group of organisms ; that reproduce to produce fertile offspring ;	2	
1(b)	<i>Chamaeleo</i> ;	1	
1(c)	<i>ticks in the boxes for:</i> fertilisation is internal ; lay eggs ;	2	R each additional tick
1(d)	<i>any two from:</i> genetic material ; cytoplasm ; cell membrane ; AVP ;;	2	apply list rule

Question	Answer	Marks	Guidance
2(a)(i)	student A has an overall lower breathing rate (for all activities) / student A 's breathing rate increased less than the class average (for all activities) / AW ; biggest difference in breathing rate is, walking / running ; data quote with units ;	2	
2(a)(ii)	67(%) ;;	2	MP1 – correct calculation MP2 – correct rounding to a whole number
2(b)	<i>any two from:</i> contains more oxygen ; contains less carbon dioxide ; contains less water (vapour) ;	2	apply list rule
2(c)	correctly labelled diagram ;;; <i>left side in this order:</i> bronchus bronchiole alveoli <i>right side in this order:</i> trachea diaphragm	3	5 correct = 3 marks 3 or 4 correct = 2 marks 1 or 2 correct = 1 mark
2(d)	<i>any two from :</i> thin ; ventilated ; good blood supply ; AVP ;; e.g. small diffusion distance / moist / AW	2	

Question	Answer	Marks	Guidance									
3(a)(i)	<table border="1" data-bbox="349 252 1010 456"> <thead> <tr> <th></th> <th>cat A</th> <th>cat B</th> </tr> </thead> <tbody> <tr> <td>phenotype</td> <td>long hair</td> <td><u>short</u> hair ;</td> </tr> <tr> <td>genotype</td> <td><u>hh</u> ;</td> <td>HH or <u>Hh</u> ;</td> </tr> </tbody> </table>		cat A	cat B	phenotype	long hair	<u>short</u> hair ;	genotype	<u>hh</u> ;	HH or <u>Hh</u> ;	3	
	cat A	cat B										
phenotype	long hair	<u>short</u> hair ;										
genotype	<u>hh</u> ;	HH or <u>Hh</u> ;										
3(a)(ii)	HH ;	1										
3(a)(iii)	100 (%) ;	1										
3(b)	C D D ;;	2	all 3 correct = 2 marks 2 or 1 correct = 1 mark									
3(c)	similarities ; kingdom ;	2	apply list rule either order									

Question	Answer	Marks	Guidance												
4(a)(i)	<table border="1"> <tr> <td>example of birth control</td> <td>category</td> </tr> <tr> <td>abstinence</td> <td>natural ;</td> </tr> <tr> <td>contraceptive injection</td> <td>chemical ;</td> </tr> <tr> <td>femidom</td> <td>barrier ;</td> </tr> <tr> <td>IUS</td> <td>chemical</td> </tr> <tr> <td>vasectomy</td> <td>surgical ;</td> </tr> </table>	example of birth control	category	abstinence	natural ;	contraceptive injection	chemical ;	femidom	barrier ;	IUS	chemical	vasectomy	surgical ;	4	
example of birth control	category														
abstinence	natural ;														
contraceptive injection	chemical ;														
femidom	barrier ;														
IUS	chemical														
vasectomy	surgical ;														
4(a)(ii)	abstinence and vasectomy ;	1													
4(a)(iii)	abstinence ; femidom ;	2	apply list rule either order												
4(b)	sexually ; virus ; blood ; injecting ; AIDS ;	5													

Question	Answer	Marks	Guidance
5(a)	mammal(s) ;	1	
5(b)(i)	1100 ;	1	
5(b)(ii)	$(2450 - 1900) = 550$ (giant pandas) ;	1	A 540 to 560

Question	Answer	Marks	Guidance
5(c)	climate change / e.g. of effect ; habitat destruction ; hunting / specimen collection ; pollution / e.g. of ; introduced species ; disease ; AVP ;; e.g. lack of food / natural disasters / war / (increased or new) predation	4	
5(d)	monitoring / protecting, species ; protecting habitat ; education ; captive breeding programmes ; zoos / wildlife parks ; AVP ;; e.g. providing food / legislation / laws to protect species / ban hunting	3	

Question	Answer	Marks	Guidance
6(a)	evaporation ; mesophyll ; stomata / stoma ;	3	
6(b)(i)	line drawn under existing trend line ; in the same pattern ;	2	
6(b)(ii)	as humidity increases the rate of transpiration decreases ; ora	1	
6(c)(i)	as a solvent ; (a reactant for) photosynthesis ; to support cells / plant ;	2	A transport nutrients
6(c)(ii)	xylem ;	1	
6(c)(iii)	root <u>hair</u> (cell) ;	1	

Question	Answer	Marks	Guidance
7(a)		6	<p>for each column of lines: 5 correct links = 3 marks 3 or 4 correct links = 2 marks 1 or 2 correct links = 1 mark</p> <p>R any additional lines</p>
7(b)	colon ; rectum ;	2	apply list rule
7(c)	mouth / stomach / A / C ;	1	
7(d)	carbohydrate ; (named) vitamins ; (named) minerals ; water ; fibre / roughage ;	3	<p>apply list rule I examples, e.g. sugar</p>

Question	Answer	Marks	Guidance
8(a)	<p>Intensive livestock farming</p> <ul style="list-style-type: none"> conditions increase the risk of spread of disease. enables natural selection to take place. involves keeping livestock in their natural environment. results in lots of animal waste which can pollute water. <p>;</p>	1	both correct for 1 mark R additional lines
8(b)	methane ; carbon dioxide ; AVP ; e.g. water vapour	2	apply list rule
8(c)	climate change / global warming / <u>enhanced</u> greenhouse effect / AVP ;	1	A examples e.g. melting of ice caps or altered weather patterns or extinction of organisms
