# UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

	<b>BIOLOGY</b> Paper 6 Alternative to Practical	0610/06
		October/November 2006
	Candidates answer on the Question Pape No Additional Materials are required	r. <b>1 hour</b>
Candidate Name		
Centre Number		Candidate Number

### READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN THE BARCODE.

DO NOT WRITE IN THE GREY AREAS BETWEEN THE PAGES.

Answer all questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 8 printed pages and 4 blank pages.

UNIVERSITY of CAMBRIDGE International Examinations **1** Fig. 1.1 shows a young plant with its roots submerged in a container filled with a solution containing mineral salts and a coloured dye.

For Examiner's Use

(b) (i)	Name the structures through which most of the solution will be absorbed into the roots.	For Examiner's Use
	[1]	
(ii)	Indicate by means of an arrow on Fig. 1.1, <b>one</b> place where these structures are shown. [1]	
	scribe how you would compare the rate of uptake of the coloured solution by the nt in Fig. 1.1 with another plant that has had its roots cut off.	
	[6]	
	[Total: 11]	

2 Fig. 2.1 shows the upper surface of an animal.

(a) Make a large drawing of the body of this animal and the leg labelled X.Label one of the eyes and two features of the back leg.

For Examiner's Use

Fig. 2.2 Fig. 2.3 Fig. 2.4 [these animals are not all drawn to the same scale] (b) (i) Name the main group (phylum) to which these animals belong. [1] ..... (ii) Describe one feature that is characteristic of all these animals. .....[1] (iii) Complete the table to indicate one special feature which makes each sub-group (class) different from all the others. Fig. 2.3 Fig. 2.4 Fig. 2.2 [3] (iv) Name each sub-group (class). Fig. 2.2 Fig. 2.3 Fig. 2.4 [3] [Total: 14]

5

Figs. 2.2, 2.3 and 2.4, show other examples of the same group (phylum). Each belongs to a

different sub-group (class).

**3** Fig. 3.1 was set up with a number of respiring maggots placed in the large test tube. The apparatus was left for 20 minutes and then a drop of coloured liquid was introduced into the capillary tube as shown.

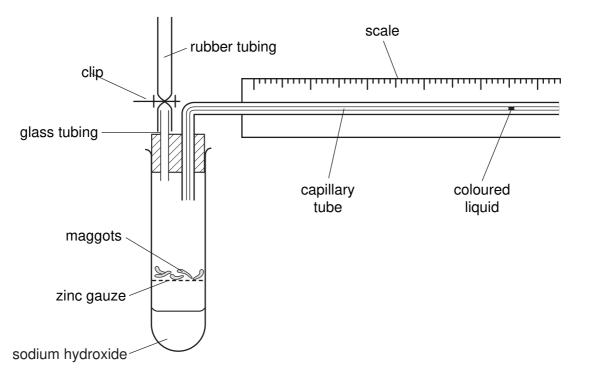

Fig. 3.1

During the next 5 minutes, the drop of coloured liquid moved along the capillary tube. The sodium hydroxide absorbs carbon dioxide.

(a) (i) Explain why the drop of coloured liquid moved towards the test tube.

(ii) Describe a suitable control for this investigation.
[3]

7

**Question 3 continues on page 8** 

8

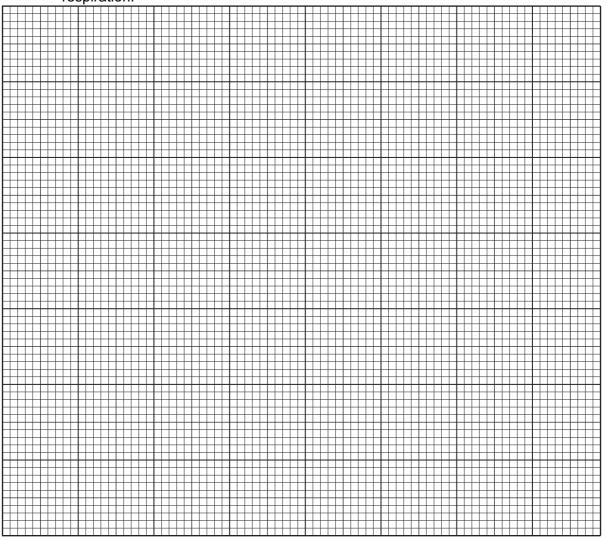

A second sample of maggots was used in an experiment to show the effect of different temperatures on respiration. The distance that the drop of coloured liquid moved along the capillary tube was measured over a period of 60 seconds at each temperature. The drop of coloured liquid was moved back to the start of the capillary tube before each reading was taken. The results are shown in Table 3.1.

Table 3.1

For Examiner's Use

temperature /ºC	distance moved by drop of coloured liquid /mm		
20	41		
25	63		
30	96		
35	168		
40	120		

(b) (i) Using the results given, plot a graph to show the effect of temperature on respiration.

https://xtremepape.rs/

(ii) With reference to your graph, describe the effect of temperature on the respiration of the maggots.
[3]
(iii) Explain the results at 35°C.
[2]
