Paper 5 Practical Test

**October/November 2024**

### **CONFIDENTIAL INSTRUCTIONS**

**This document gives details of how to prepare for and administer the practical exam.**

**The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.**

**The supervisor must complete the report at the end of this document and return it with the scripts.**

---

### **INSTRUCTIONS**

- If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.  
email      [info@cambridgeinternational.org](mailto:info@cambridgeinternational.org)

This document has **8** pages. Any blank pages are indicated.

## General information about practical exams

Centres must follow the guidance on science practical exams given in the *Cambridge Handbook*.

### Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

<b>C</b>	corrosive	<b>MH</b>	moderate hazard
<b>HH</b>	health hazard	<b>T</b>	acutely toxic
<b>F</b>	flammable	<b>O</b>	oxidising
<b>N</b>	hazardous to the aquatic environment		

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

### Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

### During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor **must** perform the experiments and record the results as instructed. This must be done **out of sight** of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

### After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
  - the scripts of the candidates specified on the bar code label provided
  - the supervisor's results relevant to these candidates
  - the supervisor's reports relevant to these candidates
  - seating plans for each practical session, referring to each candidate by candidate number
  - the attendance register.

## Specific information for this practical exam

During the exam, the supervisor (**not** the invigilator) must do the experiments in Question 1 and record the results on a spare copy of the question paper, clearly labelled “supervisor’s results”.

### Question 1

Each candidate should be provided with:

hazard	materials and apparatus	quantity per candidate
	1% starch suspension in a beaker labelled <b>starch</b>	20 cm <sup>3</sup>
<b>[MH][HH][C]</b>	1% amylase solution in a beaker labelled <b>amylase</b>	20 cm <sup>3</sup>
	tea in a beaker labelled <b>tea</b>	20 cm <sup>3</sup>
	iodine solution in a bottle with dropper labelled <b>iodine solution</b>	20 cm <sup>3</sup>
	white tile at least 15 cm × 15 cm	1
	standard test-tubes (125 mm × 15 mm)	6
	test-tube rack to hold six standard test-tubes	1
	dropping pipettes	3
	empty 250 cm <sup>3</sup> beaker labelled <b>water-bath</b>	1
	supply of hot water at approximately 50 °C Candidates will raise their hand when they are ready for hot water.	approximately 150 cm <sup>3</sup>
	2 cm <sup>3</sup> syringes	3
	glass rod	1
	permanent marker pen	1
	stop-clock	1
	paper towels	5
	gloves	1 pair
	eye protection	1

## Question 2

Each candidate should be provided with:

hazard	materials and apparatus	quantity per candidate
	30 cm ruler with a mm scale	1

### Preparation of materials

#### *1% starch suspension*

Add a few drops of distilled water to 1 g of soluble starch in a beaker and mix to form a smooth paste. Add 80 cm<sup>3</sup> of distilled water and heat until the solution clears. Make up to 100 cm<sup>3</sup> with more distilled water. Allow to cool to room temperature.

This can be prepared the day before the exam and stored in a refrigerator overnight. It must be at room temperature when supplied to candidates.

#### *1% amylase solution [MH][HH][C]*

Add 80 cm<sup>3</sup> of distilled water to 1.0 g of amylase powder [MH][HH][C]. Stir well until dissolved. Make up to 100 cm<sup>3</sup> with more distilled water. Alternatively, commercially available amylase solution can be used by adding 1 cm<sup>3</sup> of amylase solution to 99 cm<sup>3</sup> of distilled water.

#### *tea*

Add 200 cm<sup>3</sup> of recently boiled distilled water to 5 g of black tea. Leave to infuse for 10 minutes, stir and then filter to remove the solid tea.

This should be prepared immediately before the exam and be at room temperature when given to candidates.

#### *iodine solution*

A commercially prepared iodine solution that can be used for standard food tests is suitable.

**Supervisor's report**

Syllabus and component number

					/		
--	--	--	--	--	---	--	--

Centre number

--	--	--	--	--

Centre name .....

Time of the practical session .....

Laboratory name/number .....

**Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).**

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

**Declaration**

- 1 Each packet that I am returning to Cambridge International contains all of the following items:
  - the scripts of the candidates specified on the bar code label provided
  - the supervisor's results relevant to these candidates
  - the supervisor's reports relevant to these candidates
  - seating plans for each practical session, referring to each candidate by candidate number
  - the attendance register.
- 2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor's results, supervisor's reports and seating plans with the time and laboratory name/number for each practical session.
- 3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.
- 4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a *special consideration form*.
