1 EGT produces many teas of different flavours. It uses batch production. Tea leaves, the main raw materials, are grown by local farmers. Factory space is limited so EGT is unable to use an automated production line. The old machines used in the factory often break down. One worker is responsible for quality control. EGT does not benefit from economies of scale. The Human Resources manager knows that low motivation is a problem with its 80 employees. She plans to use her knowledge of Maslow’s hierarchy of needs to improve motivation. The owners would like to increase the level of output but cannot afford to move EGT to a new location.

Factory life in country C

You can see why many retailers are buying from country C. 15-hour days for wages of \$2 a week. A spokesperson for one pressure group said: 'Today I saw 8-year-old children sewing buttons onto suits and it is legal in this country.'
