Paper 1 Short Answer/Data Response

**May/June 2025**

MARK SCHEME

Maximum Mark: 80

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

---

This document consists of **25** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**PUBLISHED****Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Annotations guidance for centres**

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

**Annotations**

<b>Annotation</b>	<b>Meaning</b>
	Correct point.
	Incorrect point.
<b>BOD</b>	Used when the benefit of the doubt is given in order to reward a response.
<b>TV</b>	Used when parts of the answer are considered to be too vague to be given credit.
<b>REP</b>	Indicates where content has been repeated.
<b>NAQ</b>	Used when the answer or parts of the answer do not answer the question asked.
<b>K</b>	Indicates knowledge and understanding of the concepts and issues relating to the question.
<b>APP</b>	Indicates appropriate reference to the information in the stem.
<b>AN</b>	Indicates where the answer has demonstrated analysis.
<b>EVAL</b>	Indicates where the answer has demonstrated evaluation (part (e) questions only).

<b>Annotation</b>	<b>Meaning</b>
<b>OFR</b>	If a mistake is made in a calculation, and the incorrect figure that results from the mistake is used for subsequent calculations.
<b>SEEN</b>	Indicates that the page or content has been seen by examiner, but no credit given.

Question	Answer	Marks	Guidance
4(d)	<p><b>Explain <u>two</u> diseconomies of scale which might affect PKN as it grows.</b></p> <p>Award 1 mark for identification of each relevant diseconomy (max 2). Award 1 mark for each relevant reference to this business (max 2). Award 1 mark for each relevant explanation (max 2).</p> <p>Points might include:</p> <ul style="list-style-type: none"> <li>• <u>Low</u> morale/motivation/lack of loyalty [k] leading to higher labour turnover / more workers leaving [an] among its 27 000 employees [app]</li> <li>• <u>Poor</u> communication [k] leading to mistakes [an] when making glass [app]</li> <li>• <u>Weak/lack</u> of co-ordination [k] leading to the wrong decisions [an] at the factory [app]</li> <li>• <u>Lack of</u> control [k] leading to higher average costs [an]</li> </ul> <p>Other appropriate responses should be credited.</p>	<b>6</b>	<p>To use words from the stem as application, the reference must be appropriate (i.e. make sense) in relation to the point being made.</p> <p>The following words are likely to be appropriate for this question:</p> <ul style="list-style-type: none"> <li>• Glass</li> <li>• Factory/Factories</li> <li>• Manufacturer</li> <li>• 30 countries</li> <li>• 27 000 employees</li> <li>• Globalisation</li> <li>• Sustainable development</li> <li>• Source of finance</li> </ul> <p>Other appropriate examples can be credited.</p> <p>Some analysis points can be used for any diseconomy but only award once e.g. higher average/unit costs.</p>

Question	Answer	Marks	Guidance
4(e)	<p><b>Do you think the advantages of using retained profits to fund business expansion are greater than the disadvantages? Justify your answer.</b></p> <p>Award up to 2 marks for identification of relevant points. Award up to 2 marks for relevant development of points. Award up to 2 marks for a justified decision as to whether the advantages of using retained profits to fund business expansion are greater than the disadvantages.</p> <p>Points might include:</p> <p>Advantages:</p> <ul style="list-style-type: none"> <li>• No need to repay [k] so does not increase level of debt/liabilities [an]</li> <li>• No interest to pay [k] so no additional cash outflows/expenses [an]</li> <li>• Easy/quick to obtain [k]</li> </ul> <p>Disadvantages:</p> <ul style="list-style-type: none"> <li>• Takes time to generate sufficient funds [k] which could <u>delay</u> the expansion [an]</li> <li>• May not have sufficient/any funds [k] so must <u>limit the size</u> of expansion [an]</li> <li>• (Keep more profit in the business) reduces payment/reward to owners [k] which may deter further investment [an]</li> </ul> <p>Other appropriate responses should be credited.</p>	<b>6</b>	<p>This is a general question so there are no marks for application.</p> <p>Some analysis could apply to more than one point, but only award once.</p>

Question	Answer	Marks	Guidance
4(e)	Justification might include: An advantage is there is no interest to pay [k] so no additional cash outflows [an]. However, it may take time to generate these funds [k] delaying expansion [an]. The disadvantages are greater because expansion is likely to need a large amount of finance which the business may not have [eval]. Delay could mean the opportunity is missed [eval].
