Paper 2 Case Study

**May/June 2025**

MARK SCHEME

Maximum Mark: 80

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

---

This document consists of **19** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Annotations guidance for centres**

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

**Annotations**

<b>Annotation</b>	<b>Meaning</b>
	Correct point.
	Incorrect point.
<b>BOD</b>	Used when the benefit of the doubt is given in order to reward a response.
<b>TV</b>	Used when parts of the answer are considered to be too vague to be given credit.
<b>REP</b>	Indicates where content has been repeated.
<b>NAQ</b>	Used when the answer or parts of the answer do not answer the question asked.
<b>APP</b>	Indicates appropriate reference to the information in the stem.
<b>OFR</b>	If a mistake is made in a calculation, and the incorrect figure that results from the mistake is used for subsequent calculations.
<b>SEEN</b>	Indicates that the page or content has been seen by examiner, but no credit given.
<b>L1</b>	Level 1 – Used in part (b) questions to indicate where a response includes limited knowledge and/or understanding.
<b>L2</b>	Level 2 – Used in part (b) questions to indicate where a response has a more detailed discussion and contains some evidence of justification.
<b>L3</b>	Level 3 – Used in part (b) questions to indicate where a response includes a well-justified recommendation.

Question	Answer	Marks
1(a)	<p><b>Explain <u>two</u> advantages and <u>two</u> disadvantages to Jemi of buying a franchise.</b></p> <p>Award 1 mark for each advantage/disadvantage (max 2 advantages/max 2 disadvantages). Award a maximum of 1 additional mark for <b>each</b> explanation of the advantage/disadvantage of buying a franchise which <b>must be applied to this context</b>.</p> <p>Relevant advantages might include:</p> <ul style="list-style-type: none"> <li>• Risk of business failure to the franchisee is much reduced – because the brand is well-known with people who like eating vegan meals</li> <li>• The franchisor pays for national advertising – reducing the costs of promotion for the restaurant</li> <li>• Supplies are obtained from central sources / quality will be assured as already checked by the franchisor – less need to research suppliers of plant-based ingredients</li> <li>• Fewer decisions to be made</li> <li>• Training for employees and management is provided/arranged by the franchisor</li> <li>• Banks may be more willing to lend as risk of failure is lower</li> </ul> <p>Relevant disadvantages might include:</p> <ul style="list-style-type: none"> <li>• Less independence than when operating a non-franchise business / franchisor will impose strict controls over what is allowed – which meals to sell</li> <li>• May be unable to make decisions to suit the local areas – and some local vegetables may be more popular than others nationally</li> <li>• Licence fee must be paid to the franchisor – costs \$50 000</li> <li>• Local advertising will still have to be paid for by the franchisee</li> <li>• Royalty payment made to franchisor each year</li> </ul> <p>For example: The risk of business failure is much reduced (1) because the brand is well-known with people who like eating vegan meals (app).</p> <p><b>Application</b> could include: restaurant; vegan target market; plant-based ingredients; meals; fruit and vegetables; \$50 000; chefs; working 40 hours a week; 12 employees; increasing trend for people eating vegan meals; eating less meat is good for the environment; menus; recipes.</p>	8

Question	Answer		Marks
2(b)	Relevant points might include:		
		<p style="text-align: center;"><b>Advantages</b></p>	<p style="text-align: center;"><b>Disadvantages</b></p>
	Location A	<ul style="list-style-type: none"> <li>• May be able to charge a higher price for meals – area visited by large number of <b>tourists</b> – higher revenue</li> <li>• On a main road in the city centre makes it easily accessible – likely to have good transport links may enable a wider range of potential employees as can easily get to the restaurant</li> <li>• May attract <b>workers in the city</b> – as in the centre which makes it easily accessible as near to where they work</li> </ul>	<ul style="list-style-type: none"> <li>• May be seasonal demand from <b>tourists</b> – high revenue at certain times of the year but lower at other times of the year – may cause cash flow problems</li> <li>• High rent in city centre leads to higher costs</li> <li>• <b>High competition</b> in the area so may have to keep prices lower – could reduce revenue and increased costs may mean this is a less profitable location</li> <li>• <b>Low unemployment</b> – may make it more difficult to recruit employees</li> </ul>
	Location B	<ul style="list-style-type: none"> <li>• <b>No other restaurants</b> in the mall so no competition – may be able to charge higher prices – leading to higher revenue</li> <li>• <b>Many families visit</b> the shopping mall leading to many potential customers – larger groups increasing revenue</li> <li>• <b>Low unemployment</b> – people have more income to spend – increases demand for meals in restaurants</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Only open 06:00 to 18:00</b> each day so limited opening hours for the restaurant – may reduce revenue as fewer customers</li> <li>• No restaurants in the mall so people may not expect to eat there</li> </ul>

Question	Answer		Marks	
2(b)	Location C	<p style="text-align: center;"><b>Advantages</b></p> <ul style="list-style-type: none"> <li>• Likely to be less competition than in the city centre</li> <li>• <b>High unemployment</b> may make it easier to recruit staff – at lower wage rate – lower wage costs overall</li> <li>• Likely to have lower rent as in a town not a city</li> </ul>	<p style="text-align: center;"><b>Disadvantages</b></p> <ul style="list-style-type: none"> <li>• Local people are main customers – may not be high number of customers – lower revenue</li> <li>• <b>High unemployment</b> may mean incomes are lower in the town – leading to lower demand for restaurant meals</li> <li>• Several restaurants in the town so competition in the area – may lead to lower prices and/or lower revenue</li> </ul>	
	Recommendation	<p>Justification might include:</p> <ul style="list-style-type: none"> <li>• Location A should be chosen as it is likely to have the highest number of customers as it is in a <b>tourist area</b> and in the city centre. Location B has limited opening hours so will reduce revenue earned and location C is in a small town reducing the likely number of customers.</li> <li>• Location B should be chosen as it is <b>in a shopping mall</b> and is visited by families. Therefore, there are likely to be many families wanting to eat at the restaurant as meals containing fruit and vegetables were reported to be <b>healthier for children</b> leading to larger groups and high revenue.</li> <li>• Location C should be chosen as it is <b>visited by people who live in the town</b> and should have customers all year round and the hours it can open are not limited so can open later in the evening to serve more customers and gain more revenue.</li> </ul>

Profitability ratios	<ul style="list-style-type: none"> <li>• Shows the measure of profit made for the value of sales achieved – profit is just a measure of amount made from sales – but profitability can show the amount of profit made on each <b>meal</b> sold</li> <li>• Can use gross profit margin which can show if the business is keeping its cost of <b>ingredients</b> under control or if Jemi needs to manage her cost of sales more carefully</li> <li>• Can use profit margin to show whether the <b>restaurant business</b> is keeping expenses under control</li> <li>• Can be used to compare with other businesses – to see why there are differences</li> <li>• Compare with different years to see if the business will be operating more or less profitably – how well costs are being managed over time</li> <li>• Can be used to compare the profit relative to the capital of <b>\$50 000 to buy the franchise</b> invested in the business using the measure of ROCE – is an indicator for Jemi whether the business is worth investing in or not</li> </ul>					
Liquidity ratios	<ul style="list-style-type: none"> <li>• Shows the ability of the <b>restaurant</b> to pay back its short-term debts – if these debts cannot be paid back then the business may be illiquid and may have to cease trading</li> <li>• Measured using the current ratio to show the amount of current assets to current liabilities – ratio should be about 1.5 to 2 to be at a satisfactory level so the business has up to twice as many current assets to current liabilities and can comfortably pay its short-term debts such as to <b>suppliers of ingredients</b></li> <li>• Can also be measured using the acid test ratio to show an ability of a business to pay its short-term debts not including inventory – a measure around or just below 1 is a satisfactory level that shows that a business should be able to pay its short-term debts even if it cannot quickly turn inventories into cash</li> <li>• It can be used to indicate whether the business needs to hold less inventory if it has a low acid test ratio then it may be holding too much inventory</li> <li>• It can also be used if Jemi needs to borrow as banks can assess the risk of lending to the <b>vegan restaurant</b> and whether it is likely to repay the loan / whether to grant the loan</li> </ul>					

Question	Answer		Marks
3(b)	Conclusion	Justification might include: <ul style="list-style-type: none"> <li>• Profitability will be most important as it will tell Jemi if she is getting a good return for her investment in the <b>vegan restaurant</b> business. If the return is low, then she may be better saving her money in the bank where there will be less risk of losing it all. As long as she manages her cash flow forecast carefully then liquidity should not be a problem and will be less important.</li> <li>• Liquidity will be most important as if the business is not liquid then Jemi will not be able to pay her debts and trade payables will force her to close the <b>restaurant</b> and sell the assets to repay the debts owed.</li> </ul>	

Question	Answer	Marks
4(a)	<p><b>Explain <u>two</u> ways the information in the government report outlined in Appendix 3 might affect Jemi’s restaurant.</b></p> <p>Award 1 mark for each way (max 2). Award a maximum of 3 additional marks for <b>each</b> explanation of the way the information in the government report might affect Jemi’s restaurant – <b>one of which must be applied to this context.</b></p> <p>Relevant ways it could affect the restaurant might include:</p> <ul style="list-style-type: none"> <li>• Increase in number of families demanding vegan meals – because the report suggests that eating more fruit and vegetables is healthy – especially for children and therefore may attract more families to the restaurant</li> <li>• Increase in demand for vegan food from the general population – as increased from 10% to 25% of the population eating only vegan meals – trend forecast to increase in the future so likely for demand to keep increasing leading to growth in the market</li> <li>• May increase competition with other restaurants adding vegan meals to their menus / new restaurants opening up – which may lead to fewer sales for Jemi’s restaurant</li> <li>• Finding suppliers of fruit and vegetables may become more difficult – increased transport costs from buying from suppliers further away – more time taken to fetch deliveries</li> <li>• Increased demand from more restaurants serving vegan meals increased demand for ingredients – possibly higher prices for ingredients – higher costs / higher prices</li> </ul> <p>For example: Increase in the number of customers (1) as there is likely to be an increase in demand for vegan meals (app) because the government report suggests that eating more fruit and vegetables is healthy (1) especially for children and therefore may attract more families to the restaurant resulting in an increase in revenue (1).</p> <p><b>Application</b> could include: vegan target market; plant-based ingredients; meals; fruit and vegetables; \$50 000; chefs; working 40 hours a week; 12 employees; increasing trend for people eating vegan meals; good for the environment; menus; recipes.</p>	8
