Paper 1 Short Answer/Data Response

**October/November 2024**

MARK SCHEME

Maximum Mark: 80

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

---

This document consists of **27** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**PUBLISHED****Social Science-Specific Marking Principles  
(for point-based marking)****1. Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a. DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b. DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c. DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d. DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e. DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f. DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g. DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2. Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3. Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4. Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**PUBLISHED****0450/7115/0986 Business Studies - Paper 1 Annotations**

<b>Annotation</b>	<b>Description</b>	<b>Use</b>
<b>Tick</b>	Tick	Indicates a point which is relevant and rewardable.
<b>X</b>	Cross	Indicates a point which is inaccurate/irrelevant and not rewardable.
<b>BOD</b>	Benefit of doubt	Used when the benefit of the doubt is given in order to reward a response.
<b>TV</b>	Too vague	Used when parts of the answer are considered to be too vague.
<b>REP</b>	Repetition	Indicates where content has been repeated.
<b>NAQ</b>	Not answered question	Used when the answer or parts of the answer are not answering the question asked.
<b>K</b>	Knowledge	Indicates knowledge and understanding of the concepts and issues relating to the question.
<b>APP</b>	Application	Indicates appropriate reference to the information in the stem.
<b>AN</b>	Analysis	Indicates where the answer has demonstrated analysis.
<b>EVAL</b>	Evaluation	Indicates where the answer has demonstrated evaluation (part (e) questions only).
<b>OFR</b>	Own figure rule	If a mistake is made in a calculation, and the incorrect figure that results from the mistake is used for subsequent calculations.
<b>SEEN</b>	Noted but no credit given	Indicates that content has been recognised but not rewarded.

Question	Answer	Marks	Notes
1(e)	<p><b>Explain <u>two</u> factors a manufacturing business should consider when relocating its operations to another country. Which factor is likely to be the most important? Justify your answer.</b></p> <p>Award up to 2 marks for identification of relevant points. Award up to 2 marks for relevant development of points. Award up to 2 marks for a justified decision as to which factor is likely to be the most important for a manufacturing business when relocating its operations to another country.</p> <p>Points might include:</p> <ul style="list-style-type: none"> <li>• Access to raw materials [k] as without materials it can delay/stop production [an] so not able to meet orders [an]</li> <li>• Labour issues e.g. cost/access to suitable/skilled/enough employees [k] as lower wage rates could help lower labour costs [an] increasing its profit margin [an]</li> <li>• Land issues e.g. availability/cost of suitable land [k] which could increase/lower fixed costs [an]</li> <li>• Trade restrictions such as tariffs/quotas [k] as quotas could limit the amount of goods allowed into a country [an]</li> <li>• Availability of government grants / rates of taxation [k] which could reduce the amount of finance needed [an]</li> <li>• Legal controls [k] as this could stop/determine where the business can operate [an]</li> <li>• Infrastructure (accept only once) e.g. access to utilities, communications [k] as without suitable power it would be difficult to operate (efficiently) [an]</li> <li>• Available market/demand for the product/level of competition [k] which may reduce transport costs [an]</li> <li>• Language/cultural problems [k]</li> </ul>	6	<p>This is a general question so there are no marks for application.</p> <p>Some analysis could be used for different points, but only award once.</p> <p>Accept costs [k] once if there is no specific reason for the costs given.</p>

Question	Answer	Marks	Notes
1(e)	<p>Other appropriate responses should be credited.</p> <p>Justification might include:            Access to raw materials [k] without materials there may be delays in production [an]. Another factor is employees [k] as a lack of skills could lead to lower quality products [an].            Access to raw materials is the most important because without materials there is nothing to sell, lowering potential revenue [eval]. However, a business could train employees to produce quality products [eval].</p>		

Question	Answer	Marks	Notes
2(a)	<p><b>Define ‘entrepreneur’.</b></p> <p>Award 2 marks for a full definition. 2(d)	<p><b>Explain how the market research data in Chart 1 and Chart 2 in Fig. 2.1 could help Mitchell when making decisions.</b></p> <p>Award 1 mark for identification of how the data in each chart can be used when making decisions (max 2). Award 1 mark for each relevant reference to this business (max 2). Award 1 mark for each relevant explanation (max 2).</p> <p>Points might include:</p> <p>Chart 1:</p> <ul style="list-style-type: none"> <li>Decide the target market [k] as children read the most [app] which could help increase sales/revenue [an]</li> <li>Decide where to advertise [k] to attract most customers [an]</li> </ul> <p>Chart 2:</p> <ul style="list-style-type: none"> <li>Decide which type to sell [k] as only 15 million hardbacks are sold [app] which could help reduce the amount of unsold inventory [an]</li> <li>To decide how many of each type of book he will sell [k] therefore he must have more of these in stock [an]</li> </ul> <p>Other appropriate responses should be credited.</p>	6	<p>To use words from the stem as application, the reference must be appropriate (i.e. make sense) in relation to the point being made.</p> <p>The following words are likely to be appropriate for this question:</p> <ul style="list-style-type: none"> <li>Allow book/books once as application.</li> </ul> <p>Chart 1:</p> <ul style="list-style-type: none"> <li>27%/Older people</li> <li>35%/Children</li> <li>20%/adults</li> <li>18%/students</li> </ul> <p>Chart 2:</p> <ul style="list-style-type: none"> <li>Audio /10 million</li> <li>Paperback/50 million</li> <li>Hardback/15 million</li> <li>Other 20 million</li> </ul> <p>Other appropriate examples can be credited.</p> <p>Do not award: Answers which simply state what chart shows e.g. 'Type of books are sold' as this is repetition.</p>

Question	Answer	Marks	Notes
2(e)	<p><b>Do you think the opportunities of ecommerce for a new business are greater than the threats? Justify your answer.</b></p> <p>Award up to 2 marks for identification of relevant points. Award up to 2 marks for relevant development of points. Award up to 2 marks for a justified decision as to whether the opportunities of ecommerce for a new business are greater than the threats.</p> <p>Points might include:</p> <p>Opportunities:</p> <ul style="list-style-type: none"> <li>• More potential customers/sales/widen market [k] which can increase market share [an]</li> <li>• No/fewer shops needed [k] so less rent/lower fixed costs [an] which increases its profit margin [an]</li> <li>• Fewer employees needed [k] lower labour/wage costs [an]</li> <li>• Easy to update [k]</li> </ul> <p>Threats:</p> <ul style="list-style-type: none"> <li>• Increased competition [k] so may have to spend more on advertising / have to set lower prices [an]</li> <li>• Potential customers do not trust online business / risk of fraud/hacking [k] therefore they are less likely to purchase [an]</li> <li>• Not everyone has access to the internet [k] which could reduce potential customer base [an]</li> <li>• Lack of personal service/no face-to-face contact [k] so difficult to maintain customer loyalty [an]</li> <li>• Increased costs of postage/distribution [k] which could lead to higher prices [an]</li> <li>• Cost to set up/maintain website [k] which business might not be able to afford [an]</li> </ul>	6	<p>This is a general question so there are no marks for application.</p> <p>Lower costs may be [k] or [an] but allow only once.</p>

Question	Answer	Marks	Notes
2(e)	<p>Other appropriate responses should also be credited.</p> <p>Justification might include:            One opportunity is more potential customers [k] increasing market share [an]. However, there may be increased competition [k] increasing promotional costs [an]. The opportunity is greater because more customers could increase revenue which is likely to cover the additional costs [eval] increasing the chances of a new business being successful. [eval]</p>		

Question	Answer	Marks	Notes
3(a)	<p><b>Define ‘capital employed’.</b></p> <p>Award two marks for a full definition. Question	Answer	Marks	Notes
3(e)	Justification might include: Increasing prices could increase revenue [k] if sales stay the same [an]. Reducing the cost of raw materials could increase the profit margin [k] but lower the quality [an]. Increasing prices is a better way to increase profit because lower quality products could damage their reputation [eval] and higher prices if linked to quality may attract more customers [eval]		

Question	Answer	Marks	Notes
4(a)	<b>Define 'external costs'.</b>  Award 2 marks for a full definition. Award 1 mark for a partial definition. 4(e)	<ul style="list-style-type: none"> <li>• Does not encourage all workers to be responsible for quality [an]</li> <li>• Does not improve quality as only reduces chance of selling poor quality products [an]</li> <li>• Not possible to check all products [an] damaging reputation [an]</li> </ul> <p>Other appropriate responses should be credited.</p> <p>Justification might include: Quality assurance allows for errors to be spotted earlier in the process [k], so less time is spent on rework [an]. An advantage of quality control [k] is not everyone needs to be trained to check quality [an]. Quality assurance is the best way because the extra training provided is also likely to motivate employees leading to fewer mistakes anyway, and this should hopefully cover the additional cost of training.
