Paper 2 Structured Questions

**May/June 2025**

MARK SCHEME

Maximum Mark: 90

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

---

This document consists of **28** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**PUBLISHED****Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Annotations guidance for centres**

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

**Annotations**

<b>Annotation</b>	<b>Meaning</b>
	Uncertain what the candidate means – an illogical line of thought
	Benefit of the doubt
	Blank page
	Caret – a word is missing.
	Confused
	Cross
Highlighter	Highlight
	Nothing creditworthy

Annotation	Meaning
<b>L1</b>	Level 1
<b>L2</b>	Level 2
<b>L3</b>	Level 3
<b>MAX</b>	MAX
<b>NAQ</b>	Not answered question
<b>NE</b>	Not established – a statement made without any support
<b>REP</b>	Repetition
<b>SEEN</b>	SEEN
	Tick – a credit worthy point
<b>TV</b>	Too vague
On-page comment	To be used when a candidate has misidentified a question they have answered e.g.: This is an answer to <b>Q4(c)</b> and not <b>Q5(c)</b> .

Question	Answer	Mark	Guidance
1(a)	<b>Calculate the number of people who are in poverty in Egypt.</b>  30.69 million	<b>1</b>	30 690 000  Accept 30.7 million.
1(b)	<b>Identify <u>two</u> of Egypt's primary sector exports.</b>  Two from: oil (1), citrus fruits (1), gold (1)	<b>2</b>	Accept any two
1(c)	<b>Explain how building a new city can reduce unemployment.</b>  Building a new city requires labour / creates job opportunities / increases demand for labour (1) to work in construction / build new buildings (1).	<b>2</b>	Only one mark if not linked to building.
1(d)	<b>Explain why tourism is a good source of economic growth for Egypt.</b>  Logical explanation which might include:  Egypt has many ancient / human-made attractions and buildings (1) not found in many parts of the world / that tourists want to visit (1) creating more employment / tax revenue (1). Egypt has natural attractions, such as beautiful beaches / warm climate / good weather (1) these attract tourists / low government spending required / low investments required (1). Egypt has good infrastructure (1) this can attract tourists as its easier to travel to the country or attractions / can attract investors with lower cost of production (1). Egypt has good security (1) tourists feel safe / investors are confident in the security of their investments (1). Egypt has experienced a fall its currency value (1) making holidays more affordable (1).	<b>4</b>	Award a maximum of 2 marks for just identification of points without explanation.

Question	Answer	Mark	Guidance
1(e)	<p><b>Draw a demand and supply diagram to show the likely effect of falling incomes on the market for housing in the new city.</b></p> <p>D&amp;S diagram:</p> <p>Axes correctly labelled – price and quantity or p and q (1).</p> <p>Original demand and supply curves correctly labelled (1).</p> <p>New demand curve shifted to the left (1).</p> <p>Equilibriums – shown by lines <math>P_1</math> and <math>Q_1</math> and <math>P_2</math> and <math>Q_2</math> or equilibrium points marked as <math>E_1</math> and <math>E_2</math> (1).</p>	4

5(d)	<p><b>Discuss whether or not an increase in government spending will benefit an economy.</b></p> <p>In assessing each answer, use the table opposite.</p> <p>Why it might:</p> <ul style="list-style-type: none"> <li>• increase total demand</li> <li>• some forms of government spending e.g. education / healthcare may increase productivity</li> <li>• reduce unemployment</li> <li>• increase economic growth</li> <li>• reduce inequality</li> <li>• increase access to merit goods</li> <li>• provide public goods</li> </ul> <p>Why it might not:</p> <ul style="list-style-type: none"> <li>• increased inflation</li> <li>• increase a current account deficit if spent on e.g. imported capital goods</li> <li>• increased taxation to pay for increased spending</li> <li>• increase government debt</li> <li>• government spending may be inefficient – the private sector may be more efficient</li> </ul>	8	Level	Description	Marks
			3	A reasoned discussion which accurately examines both sides of the economic argument, making use of economic information and clear and logical analysis to evaluate economic issues and situations. One side of the argument may have more depth than the other, but overall both sides of the argument are considered and developed. There is thoughtful evaluation of economic concepts, terminology, information and/or data appropriate to the question. The discussion may also point out the possible uncertainties of alternative decisions and outcomes.	6–8
			2	A reasoned discussion which makes use of economic information and clear analysis to evaluate economic issues and situations. The answer may lack some depth and development may be one-sided. There is relevant use of economic concepts, terminology, information and data appropriate to the question.	3–5
