Paper 2 Reading and Writing (Extended)

May/June 2020

2 hours

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- Dictionaries are **not** allowed.

INFORMATION

- The total mark for this paper is 80.
- The number of marks for each question or part question is shown in brackets [].

This document has **16** pages. Blank pages are indicated.

Exercise 1

Read the article about the Guinness World Records, and then answer the following questions.

Guinness World Records

The Guinness Book of Records began as a book of facts which people could refer to if they wanted to check a world record.

Content removed due to copyright restrictions.

However, they say it's to give students an unforgettable memory – which the 3875 students who achieved the record for the largest water pistol fight in 2013 will certainly have!

- 1 What question led to the idea of producing the first Guinness Book of Records?
..... [1]
- 2 Who wrote the first Guinness Book of Records?
..... [1]
- 3 In which year was the first Guinness Book of Records published?
..... [1]
- 4 Why are some proposals for setting new records rejected? Give **two** details.
.....
..... [2]
- 5 What was the world's largest T-shirt made from?
..... [1]
- 6 What do you receive if you break a record?
..... [1]
- 7 What reasons does a Californian university give for attempting to break a world record every year? Give **two** details.
.....
..... [2]
- 8 What does the Guinness World Records organisation hope to do by publishing world records? Give **four** details.
.....
.....
.....
..... [4]

[Total: 13]

Exercise 2

Read the article about four people (A–D) who decided to stop using their mobile phones for a week. Then answer Question 9 (a)–(j).

Could you live without your phone for a week?

Four students accept the challenge!

A Gina Freeman

I've had a smartphone since I was twelve, so I regard it as a really important part of my life. However, I'm also aware that I'm possibly too dependent on it, so when my friend read about a week-long challenge to stop using your phone, and suggested we give it a go, I thought it wouldn't be a bad idea. The rules for the week build up from simply leaving your phone outside your bedroom on the first night, to switching it off and putting it away completely for the final two days. If I'd had to do that on day one, I don't think I could've managed it! One thing I noticed during the week was that I started talking to my friend on the bus to college – usually I'd be on social media or trying out a new app. The other thing was that I didn't bother wearing make-up for the last two days, I guess because I wasn't posting any selfies!

B Karl Schultz

Some of my friends are on social media all the time, which doesn't bother me, but I'm not like that. Although there are a few websites and apps that I find really useful, I'm not permanently looking at my phone, and actually I don't always take it with me when I go out. So when my dad suggested this challenge, I did have my doubts about whether it'd be worth it, even though I didn't think I'd find it that hard to do. Anyway, I actually quite enjoyed the first couple of days. Waking up and not immediately looking at my phone let me think about the day ahead and decide what I wanted to do. Towards the end though, I kept reaching for where my phone would usually be, then realising it wasn't there – I found that hard to deal with. It's made me think about doing the whole thing again next month. Perhaps it'll be easier if I know what to expect?

C Deniz Osman

I didn't realise quite how much I used my mobile phone until I downloaded an app which measures the time you spend looking at your screen and how often you pick up your phone each day. That's when I decided I should try this challenge! I followed the rules for the week, and although it might sound easy, I actually found the whole experience quite hard to cope with. For example, knowing you can't check social media and find out what's going on makes you feel like you're missing something, even though I know I'd just be wasting time looking at pictures posted by people who I hardly even know. Having completed the challenge, I thought I'd be able to cut down on my phone use, even if it was only slightly. However, I discovered the opposite happened. One friend suggested I should do the challenge again, though once was enough for me!

D Stanley Harrison

My parents persuaded the whole family to try this 'no mobile phone' challenge last month. I think they expected we'd all need a bit of persuading to take part, but I just thought, why not? It's only a week, after all. Although my phone's always with me, and there's a new app that I'm really into, it's not as if I'm always using it. Some people hardly look at your face when you talk to them, as they're constantly staring at their screens. I sometimes feel like grabbing their phone and throwing it away! Anyway, I didn't find the challenge too much of a problem, even the last two days when our phones were switched off completely. We went to visit my grandparents that weekend, which was fine, apart from getting there and back which seemed to take forever. That's when I really wanted to listen to some music or have a look on social media to help pass the time.

9 For each question, write the correct letter A, B, C or D on the line.

Which person ...

- (a) suggests they may repeat the challenge another time? [1]
- (b) mentions an app that provided unexpected information? [1]
- (c) found the gradual introduction to the challenge helpful? [1]
- (d) was initially unsure about taking part in the challenge? [1]
- (e) was surprised they spent more time on their phone after the challenge? [1]
- (f) suggests they disliked travelling without a mobile phone? [1]
- (g) paid less attention to their appearance because of the challenge? [1]
- (h) gets irritated by people who use their phones all the time? [1]
- (i) mentions they struggled more with the challenge as it progressed? [1]
- (j) has mixed feelings about social media? [1]

[Total: 10]

Exercise 3

Read the article about Beach Schools, and then complete the notes.

Teach on the beach

It is lunchtime, and a class of children from a local primary school are sitting on the beach, chatting happily and eating their sandwiches. There aren't any desks, blackboards or iPads in sight, but instead the children are surrounded by piles of shells, seaweed and sticks, and bags of what looks like rubbish. Welcome to a day's learning with Beach Schools, on Point Beach, for Fawcett Primary's Year 5 class.

For the past few years, a company called Beach Schools has been travelling to various parts of the country to enable children of all backgrounds to experience outdoor learning. The idea is based on that of the well-established Forest Schools, where children leave their classroom to visit woods and natural spaces. 'What we offer is different from normal daily school,' explains one of Beach Schools' teachers, Jane Strong. 'We are mobile, so we can take our programme to any beach. And the great thing about it is that children learn without realising it.'

That morning, the children found out more about pollution in the oceans. It's something they have been studying in class recently, but on the beach the children can see the problem of pollution for themselves. We are interrupted by ten-year-old Jeremy, who races over to show us the plastic bottle and bag he's just picked out from the sea. He looks very worried. 'It might have been eaten by a dolphin,' he says. Jane explains that the beach is one of the best learning environments. 'As well as teaching skills like how to make a fire, you can also focus on topics such as the effect of the moon on the sea. Being outdoors also has a really positive effect on children's behaviour. I never have any problems out here, whereas you'd expect that much more in a classroom situation.'

Today is rather cloudy and cool, and it looks like it might rain soon. But that doesn't seem to worry anyone here. Jane explains that it doesn't matter what the weather is like. 'Obviously we're more in demand in the summer months, but we run Beach Schools throughout the year. We've only had to cancel a day out two or three times in the past couple of years.' One popular activity this class is about to do is discover how to build an emergency shelter. Then, if it rains, the children can keep themselves dry while continuing to learn.

All of the Beach Schools' activities relate to the national curriculum, and they have adaptable lesson plans for children up to the age of 16. The older ones might spend time working out how to identify plants, whereas younger ones might discover why the sea is so important to us.

It isn't just Beach Schools who believe in outdoor learning – there's plenty of research on the issue to support them. It's also widely recognised by education experts that outdoor learning helps to increase children's confidence. In fact, I can't think of a single reason why these children shouldn't be here today, instead of sitting behind their desks in a classroom.

You are going to give a talk about Beach Schools to your class at school. Prepare some notes to use as the basis for your talk.

Make short notes under each heading.

10 Reasons why having lessons outdoors is better than learning in classes at school:

Exercise 4

12 Read the article about research into what makes people in a country happy.

Write a summary about what makes people in a country happy, according to this research.

Your summary should be about 100 words long (and no more than 120 words long). You should use your own words as far as possible.

You will receive up to 8 marks for the content of your summary, and up to 8 marks for the style and accuracy of your language.

How happy is your country?

Chances are that if you live in Scandinavia, you would answer this question in fairly positive terms. For several years, Finland, Denmark and Norway have been ranked as the happiest countries in the world, according to the World Happiness Report.

This annual report, produced by the United Nations, is based on a survey of the inhabitants of more than 150 countries. To complete this survey, over 1000 people in each country are asked to imagine a ladder, with steps numbered from zero at the bottom to ten at the top. The top of the ladder represents the best possible life, and the bottom of the ladder represents the worst possible life. Each person is then asked which step of the ladder they feel they are currently standing on. The average result is the country's score, which in 2018 ranged from 7.6 in the happiest country, to 2.9 in the least happy.

The report also uses statistics to explain why one country is happier than another. These focus on a range of factors, one of which is having the freedom to make choices in life. Interestingly, the nation's wealth does not seem to relate closely to its level of happiness. Finland, for example, has a lower gross domestic product (GDP – the statistic which measures the size and health of a nation's economy) than its neighbours, and a much lower one than that of the United States, which came eighteenth in the 2018 report. Researchers believe that other factors, such as Finland being one of the safest countries in the world, are more relevant.

Interestingly, people in the countries at the top of the list pay much higher levels of tax. This in itself does not explain happiness; instead it is thought to be the fact that people know this money is used to improve the quality of life for everyone. Free healthcare, for example, is commonly quoted as a reason for satisfaction in life, as is free university education.

Other possible explanations have also been put forward. One is simply that if you have lower expectations in life, you are more likely to be content. Another is that there may be a particular gene that is associated with good mood, and this gene is much more common in people from some countries (for example, Denmark) than others.

Another annual survey, the Global Emotions Report, produced rather different results. In 2017, Paraguay appeared at the top of the list, despite only being ranked 70th in the World Happiness Report, and also being one of the poorer countries in terms of GDP. This survey relies on a different set of questions, and traditionally Latin American countries rank highest. It is believed that this is due to the presence of strong family networks in these countries. It is also thought that people there attach greater importance to family relationships. Another suggestion is that having a mixture of people from different ethnic backgrounds living alongside each other contributes to the overall happiness levels of a country.

Exercise 5

13 You love music, and you have recently joined a band at school.

Write an email to a friend about the band.

In your email, you should:

- describe the other people in the band
- say why you have enjoyed playing in the band so far
- explain what plans the band has for the future.

The pictures above may give you some ideas, and you can also use some ideas of your own.

Your email should be between 150 and 200 words long.

You will receive up to 8 marks for the content of your email, and up to 8 marks for the language used.

Exercise 6

14 In class, you have been discussing whether or not people should keep pets.

Here are two comments from your classmates:

Having a pet can
be good fun.

It's expensive to own a pet.

Write an article for your teacher, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 150 and 200 words long.

You will receive up to 8 marks for the content of your article, and up to 8 marks for the language used.
