UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the June 2005 question paper

0680 ENVIRONMENTAL MANAGEMENT

0680/01

Paper 1 (Alternative to Coursework), maximum mark 60

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Grade thresholds for Syllabus 0680 (Environmental Management) in the June 2005 examination.

	maximum	minimum mark required for grade:					
	mark available	А	С	Е	F		
Component 1	60	43	26	19	15		

The threshold (minimum mark) for B is set halfway between those for Grades A and C.

The threshold (minimum mark) for D is set halfway between those for Grades C and E.

The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A* does not exist at the level of an individual component.

June 2005

IGCSE

MARK SCHEME

MAXIMUM MARK: 60

SYLLABUS/COMPONENT: 0680/01

ENVIRONMENTAL MANAGEMENT (Alternative to Coursework)

	Page 1		Mark Scheme		Paper
			IGCSE – JUNE 2005	0680	1
1	(a)	(i)	Two countries correctly plotted; 2 x 1 = Allow a little leeway esp on income.		[2]
		(ii	The higher the income per head, the higher the ene higher domestic use of energy/higher industrial us because of (e.g.) more domestic machinery/greater owtte.	e; (developm	nent)
	•		Allow answers that refer to developed and undeveloned and undeveloped and unde	•	s as [3]
	(b)		<u>Advantage:</u> Very little natural resource/uranium needed (relatively) abundant)/waste limited/waste easily disp (air) pollution/; ® cheap, but acc. Cheap to run.	(allow reso losed of/little	
			<u>Disadvantage:</u> Waste around for a long time/risk of major disaster to set up/nor safe; ® cause a lot of pollution.	(owtte)/exper	isive [2]
	(c)		Increased efficiency in use; insulation/recycling/po minimise use in transport by walking/cycling/car sha etc.		
			and/or		
			new technology/renewable/alternative; wind/tidal/wa 3 marks, they must mention at least 2 ways, bu strategies is ok.		
			® just decrease use without how, vague ref. to laws	to stop use.	[3]
					[Total: 10]
2	(a)	(i)	Because the pollution can be trapped in the valley, o	wtte.	[1]
	(ii) (b) (i)		Soil erosion/mudslides down the valley sides; beca trees to hold the soil together increased floor off/reduced farming opportunity.		
			(i) Disease spreads/eutrophication (stated or explained)/death of fish/ water poisoned.		
		(ii	Laws to prevent pollution/fines on pollution, owtte; before disposal; water treatment after disposal; educ use; filter water; chlorinate water.		
	(c)		Landscaping/restoration/reclamation/waste manage Allow development marks, so that one well-explain get all 3 marks. Such points as afforestation/growin topsoil/neutralise soil/liming of fresh water.	ed strategy c	ould
					[Total: 10]

			IGCSE – JUNE 2005	0680	1		
3	(a)	(i)	Correct way round (warm then cold).		[1]		
	(ii) Two systems of circulation; one (system) in the North Atlantic and one in the South Atlantic; named currents within the circulation; Give one, or two marks for a description of correct details. Circular/clockwise/anticlockwise.			and [3]			
		<i>/</i> ····\		·· ·· ·			
		(iii)	Reduce temperatures in (summer); reduce precipitation from winds coming from over the sea; may cause coastal fog; examples.				
	(b)	(i)	Fish a body of water so extensively as to exhaust the supply of fish/more than they should owtte ® catch more feed than needed etc				
		(ii)	Fishermen stand to lose out in the short term if there are restrictions, so they will be unwilling to comply; if they are controlled in coastal waters, they are likely to go further into international waters; where international action is the only solution.				
					[Total: 10]		
					[·····		
4	(a)	(i)	The heavy rain.		[1]		
	(ii)		Deaths much higher in Bangladesh/or give figures.				
		(iii)	Homelessness/house destroyed/large area flooded/	® diseases.	[1]		
(b)			Basically, the difference between a developed and a developing country: USA can afford better flood defences; (credit examples); USA is likely to have better flood warnings; means of evacuating people when warnings are given; population more dense/higher in Bangladesh. Better medical/infrastructure. Reverse arguments can be credited.				
	(c) (d)		Helps farming by either flooding the land when you need it to grow rice/The floods may deposit fertile silt/water washes away sewage ® chance to build better house eq				
			(d) Accept yes or no answers; though 'no' is more likely. Marks for reasons only:				s for
			Yes ; is about enabling people to have longer to get of flood warning is given well in advance	out of the way	y if a		
			<u>Or</u>				
			No , is largely about the fact that in a developing conneed better infrastructure (roads; communication) if evacuated. People in poor country may ignore warn because need to carry on farming for life.	people are t	o be		
			Credit arguments which give both reasons for yes an	id no.	[3]		

[Total: 10]

Pa	age 3		Mark Scheme	Syllabus	Paper	
			IGCSE – JUNE 2005	0680	1	
5	(a)	 a) (i) Introduction of high yielding/hybrid varieties of rice and/or wheat; into developing countries; use of pesticides/herbicides; improved management; increased use of mechanisation/machinery/modernisation of farming. 				
		(ii)	One mark for correctly drawn axes; two marks for correctly plotted figures. One major mistake loses one mark. If axes wrong way round still credit correct plotting with axes candidate has drawn. Can be either bar chart or line graph.			
		(iii) General upward trend; drop between 1931 and 1961/slow increase at first/doubled.			se at [2]	
	(b) Yes: good because then the full benefits of increased yields can be felt; many plots of land far too small; to be efficient <u>And/or</u>				n be	
			No : unemployment; less technology; bad because poorer farmers may lose their land; thus all the benefits of land ownership; such as secured food for family/profits for own use.			
			Allow credit for answers which give arguments for bo	oth yes and n	o. [3]	
					[Total: 10]	
6	(a)	(i)	Algae/mosquito larvae/crayfish/raccoon/female moso less 1; arrows not drawn <u>or</u> drawn in wrong direction		ror [3]	
	(ii) The sun/lig		The sun/light owtte.		[1]	
	(b)	(i)	<u>Any</u> suitable strategy plus development. For the two e.g.	:		
			• pour oil on water; kill larvae owtte;			
			drain ponds etc.; remove mosquito habitat			
			 pesticides; kill adults introduce natural enemies (e.g. increase from 	a		
			nos. by introductions; eat adults)	5		
			(A) use of chemicals that kill but <u>not</u> just chemicals.		[2]	
	(ii)	Loss of mosquitoes leads to effects on other or discussed for two, 2 marks each discussion. e.g. Raccoon nos. go down; loss of larvae <u>as</u> for down; reduction in crayfish; frog nos. go down mosquitoes as food small fish go up; more algae to e Any species in the web would be affected, for man correct direction with suitable explanation. Accept e	od hawk nos n; loss of i eat etc. rk effect mus	s. go male st be	

Allow credit for discussion of food chain effect.
