Cambridge International General Certificate of Secondary Education

MARK SCHEME for the May/June 2015 series

**0417 INFORMATION AND COMMUNICATION
TECHNOLOGY**

0417/21

Paper 2 (Practical Test A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

COARSE FISHING IN THE UK

Beginners guide by: Candidate Name

Angling is the sport of catching fish with a rod, reel, line and a wide range of baits or lures such as artificial flies. It is one of the most popular sports in the UK. Anglers must be aware of the conventions, rules, licensing restrictions and local laws. Anglers must become familiar with these.

Data entry 100% accurate, centre aligned 1 mark
16pt serif, italic, underlined (no other emphasis) 1 mark

Fishing is a means of providing food for survival. Throughout the history of fishing, various fishing methods and species of fish. These fishing variations have developed into technical skills that may be specific to the type of water in which an angler will be fishing or the kind of fish targeted.

Replace 3 instances of **regulations** with **rules** 1 mark

2 columns, 2cm col spacing 1 mark

Types of Angling

PERMISSION TO FISH

Coarse fishing is the most common type of angling in the UK.

A rod licence does not give the automatic right to fish on any river, lake or canal. Permission must be obtained from whoever owns or rents the fishing rights. This is usually the adjacent landowner or an angling club. Not all owners allow fishing on their waters and some restrict fishing to certain times of the year.

Body text
Section break above heading 1 mark
11pt, sans-serif font 1 mark
Single line space, fully justified 1 mark

All Subheadings
Centre aligned, 14pt, serif, underlined 1 mark

Table
3x8 table, correct position within column width 1 mark
Data entry 100% accurate 2 mark
Top row cells merged, heading centred 1 mark
Top row only bold and underlined 1 mark
Second row only, italic, right aligned, text wrapped, no split words 1 mark
Text matches body text 1 mark
Text on one line (rows 3-8), numbers right aligned 1 mark
No gridlines displayed 1 mark

Close Season

The close season is from 15 March to 15 September. This applies to all rivers, streams and canals. The close season does not apply to most stillwaters. Changes in the close season mean that the coarse fishing close season does not apply to most canals. Anglers and angling clubs are free to fish during the close season through their club or organisation. Check with individual clubs.

ROD LICENCE PRICES

Fish Welfare

	Freshwater fish	Salmon and sea trout
Full season	£27.00	£72.00
Seniors	£18.00	£48.00
Juniors (12 to 16)	£5.00	£5.00
Children under 12	Free	Free
8 day	£10.00	£23.00
1 day	£3.75	£8.00

Getting Started

All fish are covered with a protective layer of slime which acts as a defence against parasitic infections, bacteria and other diseases that a fish may contract. To avoid removing this protective coating always wet your hands before handling the fish and never use a cloth to hold a fish.

Never throw a fish back into the water. Get close to the water to release the fish and let it swim away. If it is a large fish such as Barbel, it may have tired itself out whilst being caught. In this case, hold the fish in the water facing the current until it is ready to swim away. Moving the fish backwards and forwards can aid its recovery.

Beginners should start with a stillwater pond or lake for their first fishing trip with a fishing depth of around 6 feet. Most fishing waters have an owner or are controlled by a fishing club and you must have permission to fish the water. Many angling clubs allow you to purchase a day permit which can cost from £3.00 upwards. Suitable starter venues include:

Location	Venue_Name	Day_Permit
CLEVELAND	CHARLTON'S PONDS	£3.50
KENT	HAYSDEN LAKE	£3.80
SOMERSET	MARSTON LAKE	£4.00
EAST LONDON	ORNAMENTAL POND	£4.20
EAST LONDON	PERCH POND	£4.30
OXON	HEYFORD LAKES	£4.35
LANCASHIRE	ABBAY LAKE	£4.50

Freshwater Fish

Common types of freshwater fish include:

- Barbel
- Bream
- Carp
- Eels
- Perch
- Pike
- Roach
- Tench

Bullets

- List sorted alphabetically 1 mark
- Bullets applied to list 1 mark
- Bullets indented to 2cm 1 mark

to follow a the fishery rules, return all water and all your litter home with your fishing gear. All soon be hooked!

Canals usually contain a variety of freshwater fish and are suitable for 'mixed coarse fish'. Pike and carp are common species, and some larger fish such as pike and carp are called 'predators' because they eat smaller fish. Ponds and reservoirs are stocked with fish for angling often with a few species such as carp, bream and tench.

Non-native fish pose a real threat to the wider environment. Some species, such as the well-known carp, have been introduced to provide an additional attraction for anglers. Where these are legally stocked in the right waters they can have a devastating effect on the native catch any non-native species and remove them immediately.

Database extract

- Inserted in correct place as table with no title 1 mark
- Venue_Name contains Lake or Pond 1 mark
- Day_Permit is <=£4.50 1 mark
- Depth is <6 1 mark
