

**MARK SCHEME for the May/June 2010 question paper**  
**for the guidance of teachers**

**0417 INFORMATION AND COMMUNICATION  
TECHNOLOGY**

**0417/12** Paper 12 (Written), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

<b>10 (a)</b>	<b>Three</b> from: Humidity Moisture Temperature Light pH CO <sub>2</sub>		<b>3</b>												
<b>(b)</b>	Sensors feed back analogue data Computers can only work with digital/binary data/cannot read analogue		<b>1</b> <b>1</b>												
<b>(c)</b>	<table border="1"> <tr> <td>Computer readings are more accurate.</td> <td>✓</td> </tr> <tr> <td>Students always forget to take readings</td> <td></td> </tr> <tr> <td>Students might be unavailable to take readings during school holidays.</td> <td>✓</td> </tr> <tr> <td>Computers can record data for later use.</td> <td></td> </tr> <tr> <td>Computers can analyse the results.</td> <td></td> </tr> <tr> <td>Computers can react to changes in the conditions immediately.</td> <td>✓</td> </tr> </table>	Computer readings are more accurate.	✓	Students always forget to take readings		Students might be unavailable to take readings during school holidays.	✓	Computers can record data for later use.		Computers can analyse the results.		Computers can react to changes in the conditions immediately.	✓		<b>1</b> <b>1</b> <b>1</b>
Computer readings are more accurate.	✓														
Students always forget to take readings															
Students might be unavailable to take readings during school holidays.	✓														
Computers can record data for later use.															
Computers can analyse the results.															
Computers can react to changes in the conditions immediately.	✓														
<b>(d)</b>	<b>Two</b> from: Earth/chemical particles will not affect its performance. It can operate without needing to refill the paper as regularly/can work on continuous paper. Running costs are low.		<b>2</b>												
<b>(e)</b>	<b>Two</b> from: It will be cheaper to buy. Print outs will be clearer. It is more compact.		<b>2</b>												
<b>11 (a)</b>	4		<b>1</b>												
<b>(b)</b>	5		<b>1</b>												
<b>(c)</b>	Relational database		<b>1</b>												
<b>(d)</b>	<b>Two</b> from: Data does not have to be typed in twice/referential integrity. Quicker to enter new data. So fewer errors are likely. So less memory/storage capacity is used. So it is easier to edit data.		<b>2</b>												
<b>(e)</b>	Code		<b>1</b>												
<b>(f)</b>	Book Borrowed		<b>1</b>												
<b>(g)</b>	Cost		<b>1</b>												
<b>(h)</b>	Date		<b>1</b>												
<b>(i)</b>	Range check		<b>1</b>												
<b>(j)</b>	Format/picture/input mask		<b>1</b>

12	<p><b>A router</b> – so that data can be transferred from one network to another</p> <p><b>A browser</b> – to access the (world wide) web /view web pages/surf the net</p> <p><b>Email</b> – so that he can send messages to people <u>outside the</u> network/home</p> <p><b>An ISP</b> – in order that he can access the internet/email/to provide internet service</p>	1	1	1	1																								
13 (a)	<table border="1"> <tr> <td>Data encryption techniques are easy to crack.</td> <td></td> <td></td> </tr> <tr> <td>Data can be accessed without being in the building where it is stored.</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Data thieves do not leave physical signs of robbery.</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Data passwords are easy to guess.</td> <td></td> <td></td> </tr> </table>	Data encryption techniques are easy to crack.			Data can be accessed without being in the building where it is stored.	✓	1	Data thieves do not leave physical signs of robbery.	✓	1	Data passwords are easy to guess.																		
Data encryption techniques are easy to crack.																													
Data can be accessed without being in the building where it is stored.	✓	1																											
Data thieves do not leave physical signs of robbery.	✓	1																											
Data passwords are easy to guess.																													
(b)	<table border="1"> <tr> <td>Make backups of the data.</td> <td></td> <td></td> </tr> <tr> <td>Users should write down their password in case they forget it.</td> <td></td> <td></td> </tr> <tr> <td>Have a firewall connected to the network.</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Have different levels of access to the data.</td> <td>✓</td> <td>1</td> </tr> </table>	Make backups of the data.			Users should write down their password in case they forget it.			Have a firewall connected to the network.	✓	1	Have different levels of access to the data.	✓	1																
Make backups of the data.																													
Users should write down their password in case they forget it.																													
Have a firewall connected to the network.	✓	1																											
Have different levels of access to the data.	✓	1																											
14 (a)	<table border="1"> <thead> <tr> <th></th> <th>True (✓)</th> <th>False (✓)</th> <th></th> </tr> </thead> <tbody> <tr> <td>Examining documents has to be done in the presence of all the workers.</td> <td></td> <td>✓</td> <td>1</td> </tr> <tr> <td>Appointments have to be made with a worker in order to complete a questionnaire.</td> <td></td> <td>✓</td> <td>1</td> </tr> <tr> <td>It is possible to change questions in the course of an interview.</td> <td>✓</td> <td></td> <td>1</td> </tr> <tr> <td>Observing the current system can provide a detailed view of the workings of the system.</td> <td>✓</td> <td></td> <td>1</td> </tr> </tbody> </table>		True (✓)	False (✓)		Examining documents has to be done in the presence of all the workers.		✓	1	Appointments have to be made with a worker in order to complete a questionnaire.		✓	1	It is possible to change questions in the course of an interview.	✓		1	Observing the current system can provide a detailed view of the workings of the system.	✓		1								
	True (✓)	False (✓)																											
Examining documents has to be done in the presence of all the workers.		✓	1																										
Appointments have to be made with a worker in order to complete a questionnaire.		✓	1																										
It is possible to change questions in the course of an interview.	✓		1																										
Observing the current system can provide a detailed view of the workings of the system.	✓		1																										
(b)	<table border="1"> <tr> <td>Inputs to the current system</td> <td></td> <td></td> </tr> <tr> <td>User and information requirements</td> <td></td> <td></td> </tr> <tr> <td>Data capture forms</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Validation routines</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Problems with the current system</td> <td></td> <td></td> </tr> <tr> <td>File structure</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Report layouts</td> <td>✓</td> <td>1</td> </tr> <tr> <td>Limitations of the system</td> <td></td> <td></td> </tr> </table>	Inputs to the current system			User and information requirements			Data capture forms	✓	1	Validation routines	✓	1	Problems with the current system			File structure	✓	1	Report layouts	✓	1	Limitations of the system						
Inputs to the current system																													
User and information requirements																													
Data capture forms	✓	1																											
Validation routines	✓	1																											
Problems with the current system																													
File structure	✓	1																											
Report layouts	✓	1																											
Limitations of the system
