**0653/51**

Paper 5 Practical Test

**May/June 2016**

**CONFIDENTIAL INSTRUCTIONS**

**Great care should be taken to ensure that any confidential information given does not reach the candidates either directly or indirectly.**

---

**The Supervisor's attention is drawn to the form on page 8 which must be completed and returned with the scripts.**

If you have any problems or queries regarding these Instructions, please contact CIE

by e-mail: info@cie.org.uk

by phone: +44 1223 553554

by fax: +44 1223 553558

stating the nature of the query and the syllabus number quoted above.

---

This document consists of **6** printed pages and **2** blank pages.

## Instructions for preparing apparatus

These instructions detail the apparatus, reagents and specimens required by each candidate for each experiment in this paper. A summary of the questions that will be presented to the candidates is included, where appropriate, to allow the teacher to test the apparatus appropriately. **No access is permitted to the question paper in advance of the examination session.**

It is assumed that the ordinary apparatus of a science laboratory will be available, including a supply of purified water (distilled or deionised).

If arrangements are made for different sessions for different groups of candidates, care must be taken to ensure that the different groups of candidates are effectively isolated so that **no information passes between them.**

**All specimens should carry only the code letters and numbers as indicated and their identity should not be revealed to the candidates.**

Supervisors should ensure that all specimens have the correct identity attached to the specimen and that these are **not** removed during the examination.

If a candidate breaks any of the apparatus, or loses any of the material supplied, the matter should be rectified and a note made in the Supervisor's Report.

Supervisors are advised to remind candidates that **all** substances in the examination should be treated with caution. Only those tests described in the Question Paper should be attempted. Pipette fillers and safety goggles should be used where necessary.

In accordance with COSHH (Control of Substances Hazardous to Health) Regulations, operative in the UK, a hazard appraisal of the examination has been carried out.

The following codes are used where relevant.

**C** = corrosive substance

**F** = highly flammable substance

**H** = harmful or irritating substance

**O** = oxidising substance

**T** = toxic substance

**N** = harmful to the environment

The attention of Centres is drawn to any local regulations relating to safety, first-aid and disposal of chemicals.

'Hazard Data Sheets', relating to materials used in this examination, should be available from your chemical supplier.

The Supervisor should make sure the Supervisor's Report is fully completed and a copy is enclosed with each packet of scripts.

Centres are reminded that they are **not** permitted to open the question paper envelopes before the examination. Centres are also referred to the Handbook for Centres, the Security of Question Papers and Examination Materials section and the Practical Examinations in Science Subjects section.

If there are difficulties with any aspect of setting up this practical examination that the Centre is not able to resolve, it is essential, for Centres to contact the Product Manager as soon as possible by e-mail to [info@cie.org.uk](mailto:info@cie.org.uk), by phone to +44 1223 553554 or by fax to +44 1223 553558.

**Question 1**

Each candidate will require:

- (i) two small beakers, each containing approximately 50g apple puree, in a water-bath at 35 °C labelled **apple** (see note 1)
- (ii) two 25 cm<sup>3</sup> measuring cylinders
- (iii) two filter funnels
- (iv) two filter papers
- (v) stirring rod
- (vi) a beaker containing 5 cm<sup>3</sup> pectinase enzyme solution, in a water-bath at 35 °C labelled **enzyme** (see note 2)
- (vii) two 2 cm<sup>3</sup> syringes without needles
- (viii) stopclock
- (ix) means of labelling glassware
- (x) distilled water labelled **distilled water**
- (xi) access to paper towels.

**Notes**

1. The apple puree may be tinned.
2. The pectinase solution can be provided in a beaker. The concentration of pectinase should be 2%. 50 cm<sup>3</sup> can be shared by up to 10 candidates.

**Question 2**

Each candidate will require:

- [H]
- (i) approximately 20 cm<sup>3</sup> 2.0 mol dm<sup>-3</sup> hydrochloric acid labelled **C**
  - (ii) approximately 20 cm<sup>3</sup> 0.5 mol dm<sup>-3</sup> hydrochloric acid labelled **D**
  - (iii) approximately 20 cm<sup>3</sup> 1.0 mol dm<sup>-3</sup> hydrochloric acid labelled **E**
  - (iv) 3 pieces of magnesium ribbon, each 1 cm in length on paper labelled **magnesium**
  - (v) stirring rod
  - (vi) 3 test-tubes (125 mm × 15 mm)
  - (vii) 10 cm<sup>3</sup> measuring cylinder
  - (viii) stopclock.

**Question 3**

Each candidate will require:

- (i) metre rule with a millimetre scale (see note 1)
- (ii) triangular block to act as a pivot for the metre rule. The block is to stand on the bench
- (iii) 100 g load labelled L.

**Notes**

1. Check that the metre rule balances on the pivot when the 50.0 cm mark is approximately over the pivot.

**Action at Changeover**

Place the pivot, rule and load separately on the bench.

Spare materials and equipment should be available and can be provided without penalty. **Candidates should be made aware of this.**

*Information required from the Supervisor:*

**The Supervisor is asked to carry out the experiments and to enter the results on a spare copy of the examination paper, clearly marked 'Supervisor's Results' and showing the Centre number. This should be done, out of sight of the candidates, using the same solutions, reagents, specimens and apparatus as the candidates.**

**A copy of the 'Supervisor's Results' should be returned with each packet of scripts. Failure to do so may cause the candidates to be penalised.**

**This form must be completed and returned in the envelope with the scripts together with the seating plan and the Supervisor's Results as mentioned on page 5.**

**May/June 2016**

*General*

The Supervisor is invited to give details of any difficulties experienced by particular candidates giving their names and candidate numbers. These should include reference to:

- (a) difficulties due to faulty apparatus;
- (b) accidents to apparatus or materials;
- (c) physical handicaps, e.g. short sight, colour blindness;
- (d) any other information that is likely to assist the Examiner, especially if this cannot be discovered in the scripts;
- (e) any help given to a candidate.

*The Supervisor is asked to supply the following information:*

Plan of work benches, giving details by candidate numbers of the places occupied by the candidates for each session and a copy of the 'Supervisor's Results'.
