## Cambridge Assessment International Education

Cambridge International General Certificate of Secondary Education

## COMBINED SCIENCE

0653/22
Paper 2 Multiple Choice (Extended)
October/November 2019
45 minutes
Additional Materials: Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

## READ THESE INSTRUCTIONS FIRST

Write in soft pencil.
Do not use staples, paper clips, glue or correction fluid.
Write your name, centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.
DO NOT WRITE IN ANY BARCODES.

There are forty questions on this paper. Answer all questions. For each question there are four possible answers A, B, C and D.
Choose the one you consider correct and record your choice in soft pencil on the separate Answer Sheet.
Read the instructions on the Answer Sheet very carefully.
Each correct answer will score one mark. A mark will not be deducted for a wrong answer.
Any rough working should be done in this booklet.
A copy of the Periodic Table is printed on page 16.
Electronic calculators may be used.

1 A biologist keeps a potted plant in a laboratory.
Which feature of the potted plant shows that it is a living organism?
A It grows larger over time.
B It has green leaves.
C The compost in the pot dries after he waters it.
D The stems contain xylem.

2 Which statement about human gametes is correct?
A Egg cells are much smaller than sperm cells.
B Egg cells are produced in larger numbers than sperm cells.
C Egg cells have a jelly coating that changes after fertilisation.
D The flagellum is an adaptive feature of an egg cell.

3 The diagram shows a cross section of a stem.

Which row shows the correct names and functions of the tissues?

|  | tissue 1 |  | tissue 2 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | name | function | name | function |
| A | phloem | support only | phloem | transport only |
| B | phloem | transport only | xylem | support and transport |
| C | xylem | transport only | phloem | support and transport |
| D | xylem | support only | xylem | transport only |

$41 \mathrm{~cm}^{3}$ of substance $\mathbf{X}$ is added to $10 \mathrm{~cm}^{3}$ starch suspension and mixed. Food tests are carried out immediately after mixing and again after an hour.

The results of the tests are shown in the table.

| test reagent | colour of solution <br> after mixing | colour of solution <br> after one hour |
| :---: | :---: | :---: |
| Benedict's solution | blue | orange |
| iodine solution | blue/black | brown |

What is substance $\mathbf{X}$ ?
A amylase
B protease
C lipase
D sugar

5 The diagram represents the human heart and four blood vessels.
Which blood vessel contains blood at the highest pressure?

6 The diagram shows an alveolus and a blood capillary.

Which two arrows represent gas exchange by diffusion only?
A 1 and 2
B 1 and 3
C 2 and 4
D 3 and 4

7 Which statement about aerobic respiration is correct?
A It exchanges gases through the walls of the alveoli.
B It expels carbon dioxide from the lungs.
C It only produces carbon dioxide and energy.
D It uses oxygen to release energy from glucose.

8 Nitrates in the soil are taken up by the roots of a plant.
What are the nitrates used to make?
A fat
B glucose
C protein
D starch

9 Which statement about sexual reproduction is always correct?
A It involves only one parent.
B It involves the fusion of nuclei.
C It produces genetically identical offspring.
D It takes place only in animals.

10 Which row gives the most suitable characteristics of a wind-pollinated flower?

|  | pollen grains | anthers | stigma |
| :---: | :---: | :---: | :---: |
| A | smooth | few | small |
| B | smooth | many | large |
| C | sticky | few | large |
| D | sticky | many | small |

11 A developing fetus is connected to its mother by an umbilical cord and placenta.
What is the function of the placenta?
A to allow the mixing of the mother's blood with the blood of the fetus
B to exchange nutrients and waste
C to keep the fetus warm
D to stop the fetus from moving

12 The diagram shows a food web.

How could the frog be classed?
A second trophic level and secondary consumer
B second trophic level and tertiary consumer
C third trophic level and secondary consumer
D third trophic level and tertiary consumer

13 The table shows the possible effects of two processes on the concentration of two gases in the atmosphere.

|  | process | concentration of gases in atmosphere |  |
| :---: | :---: | :---: | :---: |
|  |  | carbon dioxide | oxygen |
| 1 | combustion of fossil fuels | decrease | increase |
| 2 | combustion of fossil fuels | increase | decrease |
| 3 | deforestation | decrease | increase |
| 4 | deforestation | increase | decrease |

Which rows show the effects of deforestation and combustion of fossil fuels on the concentration of carbon dioxide and oxygen in the atmosphere?
A 1 and 3
B 1 and 4
C 2 and 3
D 2 and 4

14 The chromatogram of a black ink containing three dyes is shown.

What is the $R_{\mathrm{f}}$ value of the purple ink?
A 0.2
B 0.4
C 0.6
D 1.67

15 A white solid X is formed when magnesium reacts with oxygen.
What is X ?
A a compound
B a mixture
C an alloy
D an element

16 The fertiliser ammonium sulfate has the formula $\left(\mathrm{NH}_{4}\right)_{2} \mathrm{SO}_{4}$.
How many atoms of each element are present in the formula?

|  | number of <br> hydrogen atoms | number of <br> nitrogen atoms | number of <br> oxygen atoms | number of <br> sulfur atoms |
| :---: | :---: | :---: | :---: | :---: |
| A | 4 | 1 | 1 | 1 |
| B | 4 | 2 | 4 | 1 |
| C | 8 | 1 | 4 | 1 |
| D | 8 | 2 | 4 | 1 |

17 Element X is a non-metal used in the treatment of the water supply.
It is made during the electrolysis of a metal salt.
What is the colour of X and at which electrode is it made?

|  | colour | electrode |
| :---: | :---: | :---: |
| A | red | anode |
| B | red | cathode |
| C | yellow-green | anode |
| D | yellow-green | cathode |

18 The energy level diagram for a reaction is shown.

Which statement is correct?
A X is the energy change of the reaction.
B Y is the activation energy of the reaction.
C The energy change of the reaction is larger than the activation energy of the reaction.
D The reaction is exothermic.

19 Dilute hydrochloric acid reacts with excess calcium carbonate.
The amount of carbon dioxide made in one minute is recorded.
The experiment is repeated using the same volume of more concentrated hydrochloric acid.
How does the volume of carbon dioxide collected in one minute and the frequency of collisions of reacting particles change?

|  | volume of <br> carbon dioxide | frequency <br> of collisions |
| :---: | :---: | :---: |
| A | decreases | decreases |
| B | decreases | increases |
| C | increases | decreases |
| D | increases | increases |

20 Copper sulfate is a soluble salt.
How are pure crystals of copper sulfate prepared?
A Mix copper chloride solution with sodium sulfate solution, filter, rinse and dry.
B React copper oxide with excess dilute sulfuric acid, evaporate, cool, filter, rinse and dry.
C React excess copper carbonate, with dilute sulfuric acid, filter, evaporate, cool, filter, rinse and dry.

D React excess copper with dilute sulfuric acid, filter, evaporate, cool, filter, rinse and dry.

21 Which row describes the reactivity and the electronic structure of a noble gas?

|  | reactivity | electronic structure |
| :---: | :---: | :---: |
| A | reactive | full outer shell |
| B | reactive | incomplete outer shell |
| C | unreactive | incomplete outer shell |
| D | unreactive | full outer shell |

22 Which statement about alloys is correct?
A They are made from metals because metals are poor electrical conductors.
B They are mixtures of compounds that contain metals.
C They have all the same properties as the metals from which they are made.
D They have different properties to the metals from which they are made.

23 Which statement about the extraction of iron in a blast furnace is not correct?
A Carbon dioxide reduces iron oxide.
B Carbon monoxide is oxidised by iron oxide.
C Carbon reduces carbon dioxide.
D The high temperatures required are produced by reacting carbon with oxygen.

24 What is the composition of clean air?
A $78 \%$ nitrogen, $21 \%$ carbon dioxide and small amounts of other gases
B $78 \%$ nitrogen, $21 \%$ oxygen and small amounts of other gases
C 78\% oxygen, $21 \%$ carbon dioxide and small amounts of other gases
D 78\% oxygen, $21 \%$ nitrogen and small amounts of other gases

25 Which two gases cause an enhanced greenhouse effect when their concentrations in the atmosphere increase?

A carbon monoxide and carbon dioxide
B carbon dioxide and methane
C methane and sulfur dioxide
D sulfur dioxide and carbon monoxide

26 Gasoline is one fraction obtained from petroleum.
Which row describes the boiling point of the compounds and the molecules in this fraction?

|  | boiling point | molecules |
| :---: | :---: | :---: |
| A | they have different boiling points | they contain different <br> numbers of carbon atoms |
| B | they have different boiling points | they contain the same <br> number of carbon atoms |
| C | they have the same boiling point | they contain different <br> numbers of carbon atoms |
| they have the same boiling point | they contain the same <br> number of carbon atoms |  |

27 Which hydrocarbons belong to the same homologous series?
A $\mathrm{C}_{2} \mathrm{H}_{2}, \mathrm{C}_{2} \mathrm{H}_{4}, \mathrm{C}_{2} \mathrm{H}_{6}$
B $\mathrm{CH}_{4}, \mathrm{C}_{2} \mathrm{H}_{4}, \mathrm{C}_{3} \mathrm{H}_{4}$
C $\mathrm{C}_{2} \mathrm{H}_{4}, \mathrm{C}_{3} \mathrm{H}_{6}, \mathrm{C}_{4} \mathrm{H}_{8}$
D $\mathrm{C}_{2} \mathrm{H}_{4}, \mathrm{C}_{3} \mathrm{H}_{8}, \mathrm{C}_{4} \mathrm{H}_{10}$

28 A measuring cylinder contains liquid.
More liquid is now poured into the measuring cylinder.
The diagrams show the measuring cylinder before and after the liquid is poured into it.

after

What volume of liquid is poured into the measuring cylinder?
A $3.5 \mathrm{~cm}^{3}$
B $4.0 \mathrm{~cm}^{3}$
C $4.5 \mathrm{~cm}^{3}$
D $8.0 \mathrm{~cm}^{3}$

29 The graph shows how the speed of a car changes with time. The car travels at constant speed, then accelerates, and finally brakes to a stop.

The car travels 60 m while it brakes to a stop.
What is the average speed of the car while it is braking?
A $3.0 \mathrm{~m} / \mathrm{s}$
B $4.0 \mathrm{~m} / \mathrm{s}$
C $6.0 \mathrm{~m} / \mathrm{s}$
D $12 \mathrm{~m} / \mathrm{s}$

30 A spring obeys Hooke's law until it reaches its limit of proportionality.
A load is hung from the spring. The load is gradually increased and the spring is stretched beyond its limit of proportionality.

Which is the extension-load graph for the spring?

31 The diagram shows a load attached to a spring.

The load is pulled down and then released so that it oscillates between point $P$ (highest point) and point Q (lowest point).

Which form of energy does the load have at point $P$ ?
A gravitational potential energy only
B kinetic energy only
C kinetic energy and gravitational potential energy
D neither kinetic energy nor gravitational potential energy

32 Liquids consist of molecules that are constantly moving.
Which row describes the motion of the molecules in a liquid and compares the forces between them to the forces between molecules in a gas?

|  | motion of molecules | forces between molecules |
| :---: | :---: | :---: |
| A | random | stronger than in a gas |
| B | random | weaker than in a gas |
| C | vibrating about fixed positions | stronger than in a gas |
| D | vibrating about fixed positions | weaker than in a gas |

33 A circular bowl in a room contains water.
Which two factors both ensure that the smallest quantity of water evaporates in a day?

|  | temperature <br> of room | diameter <br> of bowl |
| :---: | :---: | :---: |
| A | high | large |
| B | high | small |
| C | low | large |
| D | low | small |

34 In which process is thermal energy transferred by molecular vibrations?
A conduction
B convection
C evaporation
D radiation

35 The diagram shows light striking a plane mirror.

What is the angle of reflection of the ray when it is reflected from the mirror?
A $40^{\circ}$
B $50^{\circ}$
C $80^{\circ}$
D $100^{\circ}$

36 A student measures the speed of sound. He claps his hands and the sound reflects from a wall that is 100 m away from him.

An electronic timer next to the student detects the echo of the sound 0.60 s after it is made.
Which calculation gives the speed of sound?
A $\quad \frac{200}{0.30} \mathrm{~m} / \mathrm{s}$
B $\quad \frac{200}{0.60} \mathrm{~m} / \mathrm{s}$
C $\quad \frac{100}{0.60} \mathrm{~m} / \mathrm{s}$
D $\quad \frac{100}{1.2} \mathrm{~m} / \mathrm{s}$

37 The diagram represents a sound wave travelling in air.

Which numbered points are at the centre of a compression and which numbered points are at the centre of a rarefaction?

|  | centre of a <br> compression | centre of a <br> rarefaction |
| :---: | :---: | :---: |
| A | 1 and 5 | 2 and 4 |
| B | 1 and 5 | 3 and 6 |
| C | 3 and 6 | 1 and 5 |
| D | 3 and 6 | 2 and 4 |

38 A piece of wire has a resistance of $8.0 \Omega$.
The length of the wire is doubled and the diameter of the wire is halved.
What is the new resistance of the wire?
A $2.0 \Omega$
B $4.0 \Omega$
C $8.0 \Omega$
D $64 \Omega$

39 Four ammeters $\mathrm{V}, \mathrm{W}, \mathrm{X}$ and Y are connected in the circuit shown.

Which ammeters have the same reading as each other?
A V and W only
B V and Y only
C $X$ and $Y$ only
D $\quad \mathrm{V}, \mathrm{W}, \mathrm{X}$ and Y

40 There is a current $I$ in a lamp. The potential difference across the lamp is $V$ and the power produced by the lamp is $P$.

In a second lamp, the current is $2 I$ and the potential difference across it is $\frac{V}{2}$.
What is the power produced by this other lamp?
A $\frac{P}{4}$
B $\frac{P}{2}$
C $P$
D $2 P$

[^0]The Periodic Table of Elements
