Paper 1 Short Answer and Data Response

October/November 2021

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **22** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED**Social Science-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks	Notes
1(a)	<p>Identify <u>two</u> features of a sole trader.</p> <p>Award 1 mark per feature.</p> <p>Points might include:</p> <ul style="list-style-type: none"> • Keeps all the profit • Unlimited liability • Unincorporated / no separate legal identity • Takes all decisions / own boss • Has total ownership of business / owned by one person • Few legal requirements <p>Other appropriate responses should also be credited.</p>	2	Do not credit in private sector as this applies to many forms of business organisation.
1(b)	<p>Define ‘working capital’.</p> <p>Award 2 marks for a full definition. Award 1 mark for a partial definition.</p> <p>Amount of capital available to a business to pay its day-to-day expenses/costs [2]</p> <p>OR The capital needed to finance the day to day running expenses (and pay the short-term debts of the business) [2]</p> <p>OR Current assets – current liabilities [2]</p> <p>Partial definition e.g. funds used to buy inventory [1]</p>	2	Do not credit examples.

Question	Answer	Marks	Notes
1(c)	<p>Outline <u>two</u> ways that break-even information can help Jerome's business.</p> <p>Award 1 mark for each relevant way.</p> <p>Award 1 mark for each relevant reference to this business.</p> <p>Points might include:</p> <ul style="list-style-type: none"> • He knows the level of output needed to make a profit / cover costs [k] for his (low sugar) drink [app] • Helps planning/forecasting/decision-making [k] such as how best to increase added value [app] • Help apply for finance [k] as so far only borrowed from friends and family [app] • Can see what will happen if costs/prices change [k] • Helps identify the expected level of profit/loss at different levels of output [k] • Help identify the margin of safety [k] based on the 10000 units sold [app] <p>Other appropriate responses should also be credited.</p>	4	<p>Note: To use words from the stem as application, the reference must be appropriate (i.e. make sense) in relation to the point being made.</p> <p>The following words are likely to be appropriate for this question:</p> <ul style="list-style-type: none"> • (low sugar) drinks • 200 units above break-even • 10 000 / 9800 units sold • Added value • Family and friends <p>Other appropriate examples in context can still be credited.</p> <p>Do not award points such as shows costs/sales/revenue/profit on own as this is too vague.</p>

PUBLISHED

Question	Answer	Marks	Notes
1(d)	<p>Explain how each of the following can help Jerome increase added value:</p> <ul style="list-style-type: none"> • Change the packaging • Use cheaper materials <p>Award 1 mark for identification of each relevant point (max 2).</p> <p>Award 1 mark for each relevant reference made to this business (max 2).</p> <p>Award 1 mark for each relevant explanation (max 2).</p> <p>Points might include:</p> <p>Change the packaging:</p> <ul style="list-style-type: none"> • This will allow Jerome to be able to increase the price [k] of his drink [app] increasing the gap between price and costs [an] • Customers can perceive the product to be worth more [k] so may be prepared to pay more for the same product [an] <p>Use cheaper materials:</p> <ul style="list-style-type: none"> • This will help lower input costs [k] when making 10 000 units [app] increasing the gap between cost and price [an] • Lower costs [k] can lead to higher profit per unit sold [an] <p>Other appropriate responses should also be credited.</p>	6	<p>Note: To use words from the stem as application, the reference must be appropriate (i.e. make sense) in relation to the point being made.</p> <p>The following words are likely to be appropriate for this question:</p> <ul style="list-style-type: none"> • (low sugar) drinks • 200 units above break-even • 10 000 units sold • 9800 (break-even) <p>Other appropriate examples in context can still be credited.</p>
