CHEMISTRY 5070/31

Paper 3 Practical Test

May/June 2019

CONFIDENTIAL INSTRUCTIONS

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.

email info@cambridgeinternational.org

phone +44 1223 553554 fax +44 1223 553558

This document consists of **7** printed pages and **1** blank page.

## **General information about practical exams**

Centres must follow the guidance on science practical exams given in the Cambridge Handbook.

## Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

C corrosive
 HH health hazard
 F flammable
 MH moderate hazard
 T acutely toxic
 O oxidising

**N** hazardous to the aquatic environment

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

#### Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

### **During the exam**

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor must perform the experiments and record the results as instructed. This must be done out of sight of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

## After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
  - the scripts of the candidates specified on the bar code label provided
  - the supervisor's results relevant to these candidates
  - the supervisor's reports relevant to these candidates
  - seating plans for each practical session, referring to each candidate by candidate number
  - the attendance register.

## Specific information for this practical exam

During the exam, the supervisor (NOT the invigilator) must do all the experiments and record the results on a spare copy of the question paper, clearly labelled "supervisor's results".

If chemicals are prepared in more than one batch, clearly labelled supervisor's results must be provided for each batch. The candidates using each batch must be listed on the supervisor's report.

#### **Apparatus**

The apparatus listed must be provided to each candidate.

- 1 × 25 cm<sup>3</sup> measuring cylinder
- $1 \times 25 \,\mathrm{cm}^3$  pipette
- 1 × pipette filler
- $1 \times 50 \, \text{cm}^3$  burette
- 1 × burette stand
- 1 × burette clamp
- 1 × funnel for filling burette
- 1 × white tile
- 1 × conical flask or other suitable vessel for titration
- a supply of test-tubes
- 1 × test-tube rack
- 1 × test-tube holder
- 1 × stirring rod
- 2 × boiling tubes
- 1 × Bunsen burner
- 1 × heat-proof mat
- 2 × teat/dropping pipettes
- 1 × wash bottle containing distilled water

paper towels

red and blue litmus papers or Universal Indicator paper

wooden splints

the apparatus normally used in the centre in testing for carbon dioxide with limewater

The materials listed in the table must be provided to each candidate. Materials

Materials

The materials

Marning:

Warning: small amounts of SO<sub>2</sub> [C] [T], which can cause respiratory distress in some people, may be produced. The laboratory must be well ventilated.

notes	Dissolve 5.0g anhydrous sodium sulfite, Na <sub>2</sub> SO <sub>3</sub> , <b>[C] [MH]</b> or 10.1g hydrated sodium sulfite, Na <sub>2</sub> SO <sub>3</sub> •7H <sub>2</sub> O, <b>[C] [MH]</b> in 1 dm <sup>3</sup> of distilled water. A fresh supply of sodium sulfite i.e. an unopened bottle should be used. The solution should be freshly prepared as close as possible to the time of the exam.	See preparation instructions in the current syllabus.	See preparation instructions in the current syllabus.	Supervisors are asked to carry out a standard acid/base titration between solutions $\mathbf{P}$ and $\mathbf{Q}$ to ensure that the concentrations of the two solutions fall within the given range. It is essential that $25.0  \text{cm}^3$ of $\mathbf{P}$ reacts with between $16.0  \text{cm}^3$ and $21.0  \text{cm}^3$ of $\mathbf{Q}$ .	Dissolve 58 g hydrated zinc sulfate, ZnSO <sub>4</sub> •7H <sub>2</sub> O, <b>[C] [MH] [N]</b> in 1 dm <sup>3</sup> of distilled water.	Dissolve 40 g hydrated manganese(II) chloride, $\mathrm{MnC}_{L_2}$ -4H <sub>2</sub> O, <b>[MH]</b> in 1 dm <sup>3</sup> of distilled water.	Dilute 100 cm <sup>3</sup> of concentrated (100 volume) hydrogen peroxide <b>[C]</b> to 1 dm <sup>3</sup> . Use a fresh supply of 100 volume hydrogen peroxide.
identity	0.04 mol/dm³ sodium sulfite solution	0.02 mol/dm³ potassium manganate(VII) solution	0.5 mol/dm <sup>3</sup> sulfuric acid	id/base titration between solution cm <sup>3</sup> of <b>P</b> reacts with between 10	0.2 mol/dm³ zinc sulfate	0.2 mol/dm³ manganese(II) chloride	10 volume hydrogen peroxide solution

	label	per candidate	identity	notes
	dilute hydrochloric acid	10 cm <sup>3</sup>	1.0 mol/dm³ HCl	
[]	dilute nitric acid	10 cm <sup>3</sup>	1.0 mol/dm <sup>3</sup> HNO <sub>3</sub>	
[MH]	dilute sulfuric acid	10 cm <sup>3</sup>	$0.5  \mathrm{mol/dm^3  H_2SO_4}$	ought a to a to a contraction in the contraction of
[MH] [N]	aqueous ammonia	10 cm <sup>3</sup>	1.0 mol/dm <sup>3</sup> NH <sub>3</sub>	See preparation instructions in the current synapus.
<u></u>	aqueous sodium hydroxide	10 cm <sup>3</sup>	1.0 mol/dm <sup>3</sup> NaOH	If necessary, each of these reagents can be provided as a communal supply for groups of up to 6 candidates.
	aqueous barium nitrate	10 cm <sup>3</sup>	$0.1  \mathrm{mol/dm^3}  \mathrm{BaC} l_2$ or $0.1  \mathrm{mol/dm^3}  \mathrm{Ba(NO_3)_2}$	Invigilators must be alert to the risk of contamination and the opportunity for malpractice when using a communal supply.
	aqueous silver nitrate	10 cm <sup>3</sup>	$0.05\mathrm{mol/dm^3AgNO_3}$	
[MH]	limewater	10 cm <sup>3</sup>	saturated aqueous calcium hydroxide, Ca(OH) <sub>2</sub>	

An excess of at least 10% of each material must be prepared to cover accidental loss.

All solutions must be thoroughly mixed.

If you are unable to source any of these chemicals, you must contact Cambridge International as far as possible in advance of the exam for

Materials must be labelled only as specified in the 'label' column. The identities of chemicals labelled with letter codes, e.g. P, may be different from their descriptions in the question paper. Candidates must use the descriptions given in the question paper.

## Supervisor's report

Syllabus and component number			/				
Centre number							
Centre name	 	 		 	 	 	
Time of the practical session	 	 		 	 	 	
Laboratory name/number	 	 		 	 	 	

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

0
If chemicals have been prepared in more than one batch, list the candidates using each batch.

## Declaration

1	Eac	h packet that I am returning to Cambridge International contains the following items:
		the scripts of the candidates specified on the bar code label provided
		the supervisor's results relevant to these candidates
		the supervisor's reports relevant to these candidates
		seating plans for each practical session, referring to each candidate by candidate number
		the attendance register
2	labe	ere the practical exam has taken place in more than one practical session, I have clearly elled the supervisor's results, supervisor's reports and seating plans with the time and tratory name/number for each practical session.
3		ve included details of difficulties relating to each practical session experienced by the centre y candidates.
4		ve reported any other adverse circumstances affecting candidates, e.g. illness, bereavement emporary injury, directly to Cambridge International on a <i>special consideration form</i> .
