Paper 3 Practical Test	**May/June 2019**

MARK SCHEME

Maximum Mark: 30

Published

This document consists of **6** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

     the specific content of the mark scheme or the generic level descriptors for the question
     the specific skills defined in the mark scheme or in the generic level descriptors for the question
     the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

     marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
     marks are awarded when candidates clearly demonstrate what they know and can do
     marks are not deducted for errors
     marks are not deducted for omissions
     answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
1(a)	38.5 $\pm$ 2 s ;	**1**
1(b)(i)	35.1 $\pm$ 2 s **and** less than a ;	**1**
1(b)(ii)	30.7 $\pm$ 2 s ;	**1**
1(c)	The more distance D (between bosses) the less time T ;	**1**
1(d)	Faster (at centre of oscillation) so less time taken to pass through this point ;	**1**

Question	Answer	Marks
2(a)(i)	4.5 V / 5.1 V (when rounded) ;	**1**
2(a)(ii)	evidence of at least two t measurements averaged ;	**1**
	Between 2 s and 120 s ;	**1**
2(b)	evidence of at least two t measurements averaged **and** less than or equal to 50% of **(a)(ii)** ;	**1**
2(c)	less time **and** numerical statement consistent with results ;	**1**

Question	Answer	Marks
3(a)(i)	(θ =) 15° $\pm$ 3° ;	**1**
3(a)(ii)	From their value in a, with angles increasing to a maximum value between 40 and 45° ;	**1**
	constant increase in angle ;	**1**

3(b)	difficulty described e.g.
	
	    keeping protractor still
	    causing apparatus to move when measuring
	    parallax error due to space between protractor and beam
	
	improvement consistent with difficulty e.g.
	
	    fix the protractor to the apparatus
	    minimise the space between protractor and beam ;
		1

3(c)	parallel by eye to e.g. windowsill **or** equal distance between clamp and ruler at two positions **or** equal height above bench at each end ;	**1**

Question	Answer	Marks
4(a)	(l =) 27 mm $\pm$ 1 mm ;	**1**
	(d =) 17 mm $\pm$ 1 mm ;	**1**
4(b)	(l_i =) 55 mm $\pm$ 2 mm ;	**1**
	(d_i =) 34 mm $\pm$ 2 mm ;	
4(c)	headings and units ;	1
	at least 6 readings ;	**1**
	at least one h value at 4. to 5 cm AND one value at 15–16 cm AND no values lower than 4.0 and higher than 16.0 cm ;	**1**
	d_i and l_i increasing with increasing trend ;	**1**
4(d)	Axes labelled with units and correct orientation ;	**1**
	Suitable scale, $\geq$ ½ page in both directions ;	**1**
	Two points plotted correctly – check any **two** points at your discretion ;	**1**
	best fit curve and fine points or crosses ;	**1**
4(e)(i)	straight line from 8 to 12 cm on curve ;	**1**
4(e)(ii)	calculation of g to 2 or 3 s.f. **and** no unit ;	**1**
	from a large triangle ;	**1**
4(f)	Yes **and** justification (close enough / not close enough) **and** calculated values of d_i/l_i	**1**
	or results not clear enough to give indications and say why ;	
	correct – check one value.
