Summer 2012

GCE Accounting (6002) Paper 01

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at <a href="https://www.edexcel.com">www.edexcel.com</a>.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

www.edexcel.com/contactus

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <a href="https://www.pearson.com/uk">www.pearson.com/uk</a>

## **General Marking Guidance**

- All candidates must receive the same treatment.
   Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark
1(b)	Answers may include:	
	The fireworks activities should be shown as Continued Operations $$ in the accounts next year. All revenues and expenses relating to these should be shown separately. $$	
	For usefulness This will benefit users of accounts because they can see that profits or losses from the Discontinued Operations will not be expected to be realised in the future√√ This allows reader to predict more accurately future expected performance. √ This may help future potential investors /shareholders /creditors √ etc with decision making. Eg buy more shares/allow credit√ Should be beneficial if required to be shown √ by FRS3 / IFRS 5 √	
	<b>Against usefulness</b> Adds more figures and details to the accounts $\sqrt{\ }$ so makes them more difficult to understand. $\sqrt{\ }$ especially for those with little accounting knowledge. $\sqrt{\ }$ Takes time to add extra detail $\sqrt{\ }$ and therefore this means extra expense $\sqrt{\ }$	
	Maximum for arguing only one side $8 \times \sqrt{} = 4$ marks	
	<b>Evaluation</b> Should conclude that it is beneficial to show Discontinued Activities. $\sqrt{\checkmark}$	(12)

Question Number	Answer	Mark
2(a)	(i) Kilograms of clay per tile = $341\ 120\ \sqrt{} = 4.1\ \text{kilos}\ \sqrt{}$ 83 200 $\sqrt{}$	
	(ii) Cost per kilogram of clay = $\frac{£17\ 056}{341\ 120\ }$ = 0.05 pence per kilo $$	
	(iii) Standard time to produce budgeted output = $\frac{83\ 200}{40}\ \sqrt{=}$	
	2 080 hours √	
	(iv) Actual wage rate per hour = $\frac{£12792}{2132} \sqrt{=£6.00}$ per hour $\sqrt{2132}$	(12)

Question Number	Answer	Mark
2(b)(i)	Material Usage Variance = (Actual Usage - Standard Usage) $x$ Standard Price $\sqrt{}$	
	= $(4.1 \text{ o/f} - 4.0) \times 83\ 200 \sqrt{\times 0.06} \sqrt{\times 0.06}$	
	= £499.20 o/f Adverse √	
	Materials Price Variance = (Actual Price - Standard Price) $x$ Actual Usage $\sqrt{}$	
	= $(0.05 \text{ o/f} - 0.06) \sqrt{x} 341 120 \sqrt{x}$	
	= £3 411.20 o/f Favourable √	
	Material Cost Variance = (Actual Usage $x$ Actual Price) - (Standard Usage $x$ Standard Price) $\sqrt{}$	
	= $(341\ 120\ \times\ 0.05\ \text{o/f})\ \sqrt{\ }$ - $(332\ 800\ \times\ 0.06)\ \sqrt{\ }$	
	= £17 056 - £19 968 = £2 912 o/f Favourable $\sqrt{}$	(12)

Question Number	Answer	Mark
2(b)(ii)	Labour Efficiency Variance = (Actual Hours - Standard Hours) $x$ Standard Rate $\sqrt{}$	
	$= (2 132 - 2 080 \text{ o/f}) \sqrt{\text{x } £5.85} \sqrt{}$	
	= £304.20 o/f Adverse √	
	Labour Rate Variance = (Actual Rate - Standard Rate) $x$ Actual Hours $\sqrt{}$	
	= $(£6.00 \text{ o/f} - £5.85) \sqrt{\times 2132} $	
	= $(£0.15 \times 2 132)$ = £319.80 o/f Adverse $\sqrt{}$	
	Total Labour Variance = (Actual Hours x Actual Rate) - (Standard Hours x Standard Rate) $\sqrt{}$	
	= $(2\ 132\ x\ £6.00o/f)\ \sqrt{\ -\ (2\ 080\ x\ £5.85)}\ \sqrt{\ }$	
	= £12 792 - £12 168 = £624 o/f Adverse √	(12)

Question Number	Answer		Mark
2(c)	Sales (83 200 x 0.75) =	£62 400 √	
	Material cost	£17 056	
	Labour cost	£12 792	
	Fixed cost	£12 500 (√ all 3)	
	Total cost	£42 348	
	Profit for month	£20 052 √o/f√C	(4)

Question	Answer	Mark
2(d)	Evaluation Answers may include:  For statement  If this is a cost variance \(  \) then expenditure has been more than expected \(  \)  If budget is realistic, this is bad \(  \) and may be caused by:  Workers not working as hard as they could \(  \)  Workers being paid more than a market rate wage \(  \)  Inefficient machinery \(  \)  Materials being wasted \(  \)  Paying more than the market rate for materials \(  \)  If this is a sales variance, \(  \) then revenue is less than expected \(  \)  This could be caused by:  Sales volume being less than expected \(  \)  Sales price being less than expected \(  \)	
	Against statement  Budget set may be unrealistic √ and actually the business has performed well. √  There may be a positive aspect to the adverse variance eg:  Material prices have risen on the world market, √ but our buyers are still getting a comparatively good price √  Adverse variances may be due to production being greater than expected √ which is good for the business √  Maximum of 8 marks for one side of argument.	
	Statement is (correct)/not correct $\sqrt{}$	(12)

Question Number	Answer			Mark
3(a)		Created by	Used for / Utilised examples	
	(i) Retained earnings	Trading profits built up over past and present years	Dividends paid to ordinary shareholders	
	(ii) General reserve	Transfer from Retained earnings/ profits	Any, perhaps unspecified, use. Issue bonus shares Transfer back to Retained earnings	
	(iii) Share premium reserve	Issue of ordinary shares above their nominal value	Write off preliminary expenses on formation of company or a share issue. Pay premium on redemption of shares or debentures Issue Bonus Shares	
	(iv) Capital redemption reserve	Transfer from revenue reserves √ when shares are redeemed. √	Acts as creditors buffer.	
	(v) Revaluation reserve	Upward revaluation of non-current asset.	When asset is sold √ transferred to Income statement/ retained earnings. √	(12)
	One √ per box for o	ne example, except whe	re shown otherwise.
