Pearson Edexcel IAL Accounting In Accounting (WAC12) Paper 01 Corporate and Management Accounting

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websitesat <u>www.edexcel.com</u>or <u>www.btec.co.uk</u>.Alternatively, you can get in touch with us using the details on our contact us page at<u>www.edexcel.com/contactus</u>.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

• All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

• Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

• Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.

• There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.

• All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

• Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

• When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.

• Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question Number | Answer | Mark |
|--------------------|---|------|
| 1 (a) | AO1 (5) AO1: Five marks for correct calculation of purchase price of Roseberry plc. | |
| | | (5) |

Number of shares in Roseberry = $38\ 000\ 000\ x\ 4 = 152\ 000\ 000\ (1)\ AO1$ Number of shares to be awarded in Tittan = $\frac{152\ 000\ 000}{5}$ = $30\ 400\ 000\ (1\ of)$ AO1

Two shares trading at £1.95 per share = 30 400 000x 2 x1.95= £118 560 000 (1 of) AO1 Plus 0.32 pence cash = 30 400 000 x 0.3 = $\underline{$ £9 728 000 (1 of) AO1 Purchase price = £128 288 000 (1 of) AO1

| Question Number | Indicative Content | Mark |
|-----------------------------|--|------|
| Question Number 1 (e) | AO1 (1), AO2 (1), AO3 (4), AO4 (6) Answers may include: <u>For Purchase</u> Tittan may see an increase in their market share in the chocolate/confectionary market. Tittan may enjoy economies of scale eg bulk buying of materials, machinery etc. Tittan may enjoy benefits of vertical integration as in both companies are in the same line of business. Assets and liabilities taken over have been given agreed/market values by both sets of directors, so Tittan should not be overpaying for assets purchased. Roseberry appears to be in a healthy financial state. eg large positive figure for retained earnings. Liquidity position of Roseberry is good as they | Mark |
| | appear to have a healthy working capital ratio. Roseberry should not be a drain on the liquid resources of Tittan, especially as Tittan is not taking over tax bill and trade payables. Some shareholders may like the proactive decision- making of the board, which should increase profits and returns to shareholders. <u>Against Purchase</u> | |
| | Shareholders in Roseberry have been paid goodwill of nearly £14.5 million. More shareholders means a dilution of ownership and voting power for existing shareholders in Tittan. Some shareholders may not like the closure of the factory and the redundancy, especially after a long history of being in the same location. Some shareholders may not like the reduction of size in the products, and the bad publicity, which often comes with these decisions. | |
| | <u>Other points</u> We do not know the market price of Tittan shares after the purchase. The market will indicate whether the purchase, and the money paid, was a good idea. | |
| | <u>Decision</u> Overall, the take-over is potentially a good decision | |
| | | (12) |

| Level | Mark | Descriptor |
|---------|---------|---|
| | 0 | A completely incorrect response. |
| Level 1 | 1-3 | Isolated elements of knowledge and understanding recall based. Weak or no relevant application to the scenario set. Generic assertions may be present. |
| Level 2 | 4 - 6 | Elements of knowledge and understanding, which are applied to the scenario. Chains of reasoning are present, but may be incomplete or invalid. A generic or superficial assessment is present. |
| Level 3 | 7 - 9 | Accurate and thorough understanding, supported throughout by relevant application to the scenario. Some analytical perspectives are present, with developed chains of reasoning, showing causes and/or effects. An attempt at an assessment is presented, using financial and non-financial information, in an appropriate format and communicates reasoned explanations. |
| Level 4 | 10 - 12 | Accurate and thorough knowledge and understanding, supported throughout by relevant and effective application to the scenario. A coherent and logical chain of reasoning, showing causes and effects. Assessment is balanced, wide ranging and well contextualised using financial and non-financial information and makes informed recommendations and decisions. |

| Question Number | Answer | Mark |
|--------------------|---|------|
| 2 (a)(i) | AO2(2), AO3 (1) AO2: Two marks for standard hourly pay and budgeted labour cost of production. AO3: One mark for correct calculation of budgeted labour time. | |
| | Budgeted labour cost | |
| | $= (462 \times \frac{40}{60})(1) \text{ AO3} \times \text{\pounds}7.20(1) \text{ AO2}$ | |
| | = £2 217.60(1) AO2 | (3) |

| Question Number | Answer | Mark |
|--------------------|---|------|
| 2 (a)(ii) | AO1(3), AO3 (1) AO1: Three marks for correct calculation of normal rate pay and total actual cost of production. AO3: One mark for calculation of overtime paid. | |
| | 6 workers x 44 hours x £7.20= £1 900.80 (1)AO1 | |
| | 1 worker x 28 hours x \pounds 7.20 = \pounds 201.60(1) AO1 | |
| | Overtime hours $(5 + 6 + 4) \times \pounds 9.60 = \pounds 144.00(1) \text{AO3}$ | |
| | Actual cost = $\pounds 2 \ 246.40(1) \ AO1$ | (4) |

| Question Number | Answer | Mark |
|--------------------|--|------|
| 2 (a)(iii) | AO2(3), AO3 (1) AO2: Three marks forcorrect calculation of budgeted hours, budgeted rate and labour efficiency variance. AO3: One mark for correct calculation of total hours worked. | |
| | Labour efficiency variance = (Actual hours - Budgeted hours) x Budgeted rate = (307 (1) AO3-308 (1) AO2) x £7.20(1) AO2 | |
| | $= \pounds 7.20 \text{ Fav} (1) \text{ AO2}$ | (4) |

|--------------------|--|------|
| 2 (c)(i) | AO1 (2) AO1: Two marks for correct calculation of total budgeted cost. | |
| | Total budgeted cost = budgeted labour + budgeted material | |
| | $= (\pounds 2\ 217.60 + \pounds 776.16) (1 \text{ of}) \text{ AO1}$ | |
| | = £2993.76 (1 of) AO1 | |
| | | (2) |

| Question Number | Answer | Mark |
|--------------------|--|------|
| 2 (c)(ii) | AO1 (2) AO1: Two marks for correct calculation of total actual cost. | |
| | Total actual cost = actual labour + actual material | |
| | = (£2246.40 + £869.70) (1 of) AO1 | |
| | = £3 116.10 (1 of) AO1 | |
| | | (2) |

| Question Number | Answer | Mark |
|--------------------|---|------|
| 2 (c)(iii) | AO1 (3) AO1: Three marks for correct calculation of total variance. | |
| | Total variance = Actual total cost - Budgeted total cost | |
| | = (£3 116.10(1of)AO1 - £2993.76(1of)AO1) | |
| | = £122.34 Adverse (1of) AO1 | |
| | | (3) |

| 2 (d) AO1 (1), AO2 (1), AO3 (4), AO4 (6) Performed poorly Labour rate variance is adverse. This is due to having to pay overtime at a higher rate to meet production target, to cover an absence. Possible solutions may include paying overtime at budgeted rate, especially if the target has not been met. Alternatively, transferring workers who work elsewhere in the company, to the Curtains section, having previously trained them. Other solutions could include having a reserve pool of temporary labour the company can call upon to step in to make curtains. Or use an agency to supply temporary workers. Material usage variance is adverse. Solutions could include better training of staff, or buying better quality material to reduce wastage, or new machinery to reduce production problems. Performed well Labour efficiency variance is favourable. This maybe due to workers completing the job quickly during overtime. Material price variance is favourable. This was because there was still material in inventory that had been purchased at a price of 27 pence a metre, lower than the budgeted price of 28 pence per metre. However, new material has been bought at 29 pence per metre. This may result in the budgeted price being raised for the next week. Other solutions could be to find alternative suppliers, negotiate better prices, or pay quickly to ensure discounts. Section may be efficient, it is just that the budget set is unrealistic. Maybe they are not reviewed regularly in which case review and change the budget. However, if they are set for one week at a time, it appears they are reviewed regularly. Decision Curtains section has a total cost variance that is adverse. Most of this figure consists of the material usage | Question Number | Indicative Content | Mark |

| Question Number | Answer | Mark |
|--------------------|---|------|
| 5 (a)(i) | AO1 (4), AO2 (7) AO1: Fourmarks for calculation of site rent, electricity, total fixed costs, and variable costs per unit. AO2: Seven marks for correct calculation of warehouse rent, depreciation, loan interest, contribution per unit, and break-even point | (11) |

| <u>Fixed Costs - per year</u> | <u>Variable costs per unit</u> (0.20 + 0.11 + 0.01) |
|---|--|
| Rent $(\pounds 460 \times 7) = \pounds 3 \ 220 \ (1) \ AO1$ Insurance $= \pounds 1 \ 250$ | Total £0.32 per unit (1) AO1 |
| Warehouse $(\pounds 275 \times 4) = \pounds 1 \ 100 \ (1) \ both \ AO2$ Depreciation $\pounds 2700 \times 5 = \pounds 1 \ 500 \ (1) \ AO2$ 9 | |
| Electricity $(\pounds 35 \times 12) = \pounds 420$ both Loan $(\pounds 285 \times 12) = \pounds 3420(1)$ AO2 Total FC $\pounds 10$ 910 (1 of) AO1 | |
| <u>Contribution per unit</u> (£0.55 - £0.32) (1 of)AO2= £0.23 (1 of) AO1 | |
| Break Even Point = $\frac{\pounds 10\ 910}{\pounds 0.23}(1\ \text{of})\ \text{AO2} = 42$ | 7 435 drinks (1 of) AO2 |

| Question Number | Answer | Mark |
|--------------------|--|------|
| 5 (a)(ii) | AO2 (5) AO2: Five marks for correct calculation of profit for 2019 | (5) |

Profit for 2018

Sales = (110 + 210 + 175 + 180) x 200 = 135 000 units (1) AO2 Sales revenue = 135 000 x 0.55 = £74 250 (1 of) AO2 Less VC = 135 000 x 0.32 o/f = (£43 200) (1 of) AO2 Less FC = (£10 910) (1 of) AO2 Profit = £20 140 (1 of) AO2

| Question Number | Answer | Mark |
|--------------------|---|------|
| 5 (b)(i) | A01 (1) AO3 (4) AO1: One mark for totalling target profit and fixed costs. AO3: Four marks for including target profit and fixed costs, and three marks for calculating the required contribution per unit | (5) |

Target profit = $\pounds 21 \ 400$ + Fixed costs = $\pounds 11 \ 000 \ (1) \ AO3 \ \pounds 32 \ 400 \ (1) \ AO1$

135 000 o/f x Contribution per unit = \pounds 32 400 (1) AO3

Contribution per unit = $\frac{£32 \ 400}{135 \ 000}$ (1 of) AO3 = £0.24 (1 of) AO3 135 000

| Question Number | Answer | Mark |
|--------------------|---|------|
| 5 (b)(ii) | AO3 (3) AO3: Three marks for calculating a selling price 38 pence above labour cost (as long as labour cost is above 20 pence) | |
| | | (3) |

Selling price – Variable costs = Contribution

SP - (Labour cost per drink + 0.12 + 0.02) = £0.24 (1) AO3

So selling price must be £0.38 higher than labour cost (1) AO3

For example Selling price £0.60 and labour cost £0.22 (1) AO3

(Accept any answer where selling price is $\pounds 0.38$ higher than labour cost, as long as labour cost is above 20 pence ($\pounds 0.20$))

| Question Number | Indicativ | ve Content | Mark |
|--------------------|---|---|------|
| 5 (c) | AO4 (6) <u>Case for</u> The town authorities could see a true and fair view of the number of drinks sold by the business. This would allow them to charge an accurate tax on Jacinda's business. Jacinda is assured she is meeting all necessary requirements and disclosures, which may ensure future contracts for Jacinda. It will help Jacinda ensure a smooth running of the business helping her e.g. control costs, planning, decision making. <u>Case against</u> The town authorities would have to pay a member of staff to study the audited accounts, which would cost time and money. Jacinda has to go to the time and expense of having her accounts audited. Loss of confidentiality by Jacinda. <u>Decision</u> It would be worthwhile for the town authorities to study the audited financial statements of Jacinda. | | |
