Pearson Edexcel<br>International Advanced Subsidiary Level in Chemistry (WCH03)<br>Paper 01 Chemistry Laboratory Skills I

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## Using the Mark Scheme

Examiners should look for qualities to reward rather than faults to penalise. This does NOT mean giving credit for incorrect or inadequate answers, but it does mean allowing candidates to be rewarded for answers showing correct application of principles and knowledge. Examiners should therefore read carefully and consider every response: even if it is not what is expected it may be worthy of credit.

The mark scheme gives examiners:

- an idea of the types of response expected
- how individual marks are to be awarded
- the total mark for each question
- examples of responses that should NOT receive credit.
/ means that the responses are alternatives and either answer should receive full credit.
( ) means that a phrase/word is not essential for the award of the mark, but helps the examiner to get the sense of the expected answer.
Phrases/words in bold indicate that the meaning of the phrase or the actual word is essential to the answer.
ecf/TE/cq (error carried forward) means that a wrong answer given in an earlier part of a question is used correctly in answer to a later part of the same question.

Candidates must make their meaning clear to the examiner to gain the mark. Make sure that the answer makes sense. Do not give credit for correct words/phrases which are put together in a meaningless manner. Answers must be in the correct context.

## Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

- write legibly, with accurate use of spelling, grammar and punctuation in order to make the meaning clear
- select and use a form and style of writing appropriate to purpose and to complex subject matter
- organise information clearly and coherently, using specialist vocabulary when appropriate.
Full marks will be awarded if the candidate has demonstrated the above abilities.
Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 ( a )}$ | (Observation with potassium <br> chloride) lilac / purple / mauve / <br> violet | Chlorine gas in <br> addition but only <br> penalise once | (1) |

For 1(d) Mark the gases separately from the observations. Deduct a mark for incorrect information, eg in (d) hydrogen chloride and hydrogen would not score M1 (+1-1=0) but hydrogen bromide, bromine and hydrogen sulfide would score M3. (+2-1 = 1)

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 1(b) | (Observation with potassium sulfate) white precipitate / ppt <br> ALLOW white solid / white crystals <br> IGNORE names of precipitate even if incorrect <br> (Observation with potassium carbonate) fizzing / bubbles / effervescence / turns limewater cloudy <br> AND <br> carbon dioxide / $\mathrm{CO}_{2}$ <br> IGNORE <br> References to <br> NO white precipitate / NO white solid / <br> NO white crystals <br> (1) | Just 'turns white' <br> Any bubbles / any named gas / any gas released <br> Any precipitate | 2 |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 1(c) | (Observation with ammonium sulfate) (red litmus paper turns) blue <br> STAND ALONE MARK <br> (due to formation of) ammonia / $\mathrm{NH}_{3}$ <br> (Observation with potassium sulfate) <br> No change / no reaction / no observation /litmus paper remains red / no gas evolved / no ammonia / no $\mathrm{NH}_{3}$ / nothing <br> IGNORE <br> temperature change / dissolves | White smoke/ any precipitate <br> Ammonium / $\mathrm{NH}_{4}$ <br> $\mathrm{SO}_{2}$ /gas evolved/bubbl es/ effervescence / any precipitate | 3 |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 1(d) | Mark observations and gases independently (Observation with sodium chloride) <br> M1: <br> hydrogen chloride / HCl <br> M2: <br> Misty / steamy / white fumes <br> OR <br> white smoke with ammonia <br> OR <br> damp blue litmus paper red <br> IGNORE <br> Effervescence throughout <br> (Observation with sodium bromide) <br> M3: <br> Bromine / $\mathrm{Br}_{2}$ <br> M4: <br> brown (fumes) / orange (fumes) <br> ALLOW <br> Red as a qualifier or red qualified by brown or orange, eg red-brown, orange-red <br> (1) <br> OR <br> M3: <br> hydrogen bromide / HBr <br> M4: <br> Misty / steamy / white fumes <br> OR <br> white smoke with ammonia <br> OR <br> damp blue litmus paper red <br> OR <br> M3: $\mathrm{SO}_{2}$ / sulfur dioxide <br> M4: <br> (acidified) $\mathrm{K}_{2} \mathrm{Cr}_{2} \mathrm{O}_{7}$ from orange to green / damp blue litmus paper red <br> (1) | Chlorine / sulfur dioxide <br> Just white smoke Yellow / green gas <br> Any additional incorrect products e.g. $\mathrm{H}_{2} \mathrm{~S} / \mathrm{S}$ <br> Just 'Red fumes/gas' <br> Coloured fumes eg creamy <br> Hydrogen sulfide / $\mathrm{H}_{2} \mathrm{~S}$ | 4 |

| Question <br> Number | Correct Answer | Reject | Mark |  |
| :--- | :--- | ---: | :--- | :---: |
| 2(a) | Mark Independently <br> (Test) <br> (dilute) nitric acid / $\mathrm{HNO}_{3}$ | (1) | Conc. $\mathrm{HNO}_{3}$ | 2 |
|  | (Inference) <br> chlorine / Cl | $\mathrm{Cl}^{-} /$'chloride' / <br> chlorine ion |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 2(b) | (Test any gas evolved with) <br> $($ concentrated / dilute) ammonia / <br> $\mathrm{NH}_{3} / \mathrm{NH}_{3}(\mathrm{~g}) / \mathrm{NH}_{3}(\mathrm{aq})$ | $\mathrm{NH}_{4}$ <br> Ammonium | $\mathbf{2}$ |
|  | (1) | (Inference) <br> $\mathrm{NH}_{4} \mathrm{Cl}$ | Ammonium <br> chloride <br> NH 3 Cl |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 2(c) | (Observation) <br> stays orange <br> ALLOW <br> does not turn (from orange to) <br> green / no visible change / no <br> colour change | Just 'no reaction' <br> stays yellow | 2 |
|  | (Inference) <br> tertiary / 3 (alcohol) <br> ALLOW <br> Recognisable near miss-spelling | (1) |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 2(d) |  <br> ALLOW <br> Displayed formula / skeletal formula $/\left(\mathrm{CH}_{3}\right)_{3} \mathrm{COH} / \mathrm{C}\left(\mathrm{CH}_{3}\right)_{3} \mathrm{OH} /$ <br> $\mathrm{CH}_{3}-$ rather than $\mathrm{H}_{3} \mathrm{C}-$ <br> IGNORE <br> Position of connectivity on vertical bond to OH . | $\mathrm{OH}-\mathrm{C}$ | 1 |

(Total for Question 2 = 7 marks)

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( a ) ( i )}$ | $(4.20 \div 84.0=) 0.05(00)$ |  | $\mathbf{1}$ |
| Question <br> Number Acceptable Answers Reject Mark <br> $\mathbf{3 ( a ) ( i i )}$ $(50.0 \times 4.18 \times 7.0=) 1463(J)$ <br> IGNORE SF except 1 SF -1463 $\mathbf{1}$ |  |  |  | |  |
| :--- |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 3(a)(iii) | FIRST, CHECK THE ANSWER ON ANSWER LINE <br> IF $\Delta H_{1}=+29.3\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> 1st mark: $1463 \div 0.05=29260\left(\mathrm{~J} \mathrm{~mol}^{-1}\right)$ <br> OR $1.463 \div 0.05=29.260(\mathrm{~kJ}$ $\mathrm{mol}^{-1}$ ) <br> TE for answer to (a)(ii) $\div(a)(i)$ <br> 2nd mark: <br> Round answer to 3 SF and in kJ $\mathrm{mol}^{-1}$ <br> 3rd mark: <br> + sign needed for final answer but may be shown before the answer line |  | 3 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( b ) ( i )}$ | Answers may be given in either <br> order: |  | 2 |
|  | 1st way: <br> Temperature decreases for $\mathrm{NaHCO}_{3}$ <br> /reaction 1 <br> and <br> Temperature increases for $\mathrm{Na}_{2} \mathrm{CO}_{3} /$ <br> reaction 2 <br> IGNORE <br> Endothermic (reaction 1) and <br> exothermic (reaction 2) <br> 2nd way: <br> (Magnitude of) $\Delta T$ for $\mathrm{NaHCO}_{3}$ <br> Smaller <br> than that for $\mathrm{Na}_{2} \mathrm{CO}_{3}$ |  |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 3(b)(ii) | No heat / energy lost / gained (to/from the surroundings) <br> OR <br> Reactions go to completion <br> OR <br> S.H.C. of solution / $\mathrm{HCl}(\mathrm{aq})$ is the same as that of water /is $4.18 \mathrm{~J} \mathrm{~g}^{-1}$ ${ }^{\circ} \mathrm{C}^{-1}$ <br> OR <br> Density of solution / $\mathrm{HCl}(\mathrm{aq})$ is 1 g $\mathrm{cm}^{-3}$ <br> OR <br> Mass solution is 50 g | No transfer losses <br> 100 \% purity of chemicals <br> No side reactions / other products formed | 1 |

| Questio <br> n <br> Number | Acceptable Answers | Rejec t | $\begin{aligned} & \hline \text { Mar } \\ & \mathrm{k} \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| 3(c)(i) | Correct species and balancing <br> Correct state symbols Dependent on all correct species with no extra species |  | 2 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( c ) ( i i )}$ | $\Delta H_{\text {reaction }}=\mathbf{2 \Delta H} H_{1}-\Delta H_{2}$ | $=\Delta H_{1}-\Delta H_{2}$ | $\mathbf{1}$ |
|  | $\Delta H_{\text {reaction }}=\mathbf{2 \Delta H}+\left(-\Delta H_{2}\right)$ |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( c ) ( \text { iii } )}$ | $\Delta H_{\text {reaction }}=(2 \times+29.3)-(-36.0)$ <br> $=(+) 94.6\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ |  | $\mathbf{1}$ |
|  | ALLOW <br> TE on BOTH value of $\Delta H_{1}$ previously <br> calculated and the equation given in <br> (c)(ii) | If $\left.\Delta H_{\text {reaction }=\Delta H_{1}-\Delta H_{2} \text { then }}^{(+) 65.26(\mathrm{~kJ} \mathrm{~mol}}{ }^{-1}\right)$ scores 1 | If $\Delta H_{1}=29.26$ then $(+) 94.5(\mathrm{~kJ}$ <br> mol $\left.{ }^{-1}\right)$ scores 1 <br> IGNORE SF except 1 SF |

(Total for Question 3 = 12 marks)

| Question <br> Number | Acceptable Answers | Reject | Mark |  |
| :--- | :--- | ---: | :--- | :---: |
| 4(a) | (From) colourless | (1) | 'clear' for colourless | $\mathbf{2}$ |
|  | (To) (pale) pink | red / purple / magenta |  |  |
|  | ALLOW | (1) | red-pink / purple-pink etc. |  |
|  | (1) for "pink to colourless" |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 4(b)(i) | Ticks under titres 2 and 3 (1) |  | 2 |
|  | Check answer line first (1) <br> $23.55\left(\mathrm{~cm}^{3}\right)$ | One DP for final answer |  |$\quad$| Allow correct mean for any |
| :--- |
| combination of at least two |
| ticked titres for the second |
| mark |$\quad$|  |
| :--- |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 4(b)(ii) | Shape of the meniscus <br> correctly drawn. <br> Allow any downward arc | V shaped <br> Mercury meniscus <br> Straight line | 2 |
|  | Bottom of 'meniscus' or top <br> of upside down 'meniscus' <br> mid-way between 23.60 and <br> 23.70 | (1) |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 4(c)(i) | $\frac{0.05(00) \times 25(.0)}{1000}$ <br> $=0.00125 / 1.25 \times 10^{-3}$ <br> $(m o l)$ <br> IGNORE SF except 1 SF |  | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
