Summer 2019

Pearson Edexcel IAS In Economics (WEC01) Paper 01 Markets in Action

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>. standing of impact of immigration with effective application

### Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Summer 2019 Publications Code WEC01\_01\_1906\_MS All the material in this publication is copyright © Pearson Education Ltd 2019

#### **General Marking Guidance**

• All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

• Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

• Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.

• There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.

• All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

• Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

• When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.

• Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

# Section A: Supported multiple choice

NB: Candidates may achieve up to 3 explanation marks even if the incorrect option is selected.

NB: Candidates may achieve up to 3 marks (rejected marks) for explaining three incorrect options (provided three different reasons are offered and each option key is clearly rejected).

Question Number	Answer	Mark
1	<ul> <li>Answer C (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Definition of positive statement- e.g. value free/ objective/ based on evidence/ can be proven true or false (1)</li> </ul> </li> </ul>	
	<ul> <li>We can check whether health spending has risen in Sweden/ fallen in Ireland (1)</li> <li>Both statements positive as they include evidence/ have data to be tested/ Explicit reference to data (1)</li> </ul>	
	<ul> <li>Rejection marks Do not double award</li> <li>Option A: incorrect as neither statement has a value judgement so it cannot be normative (1)</li> <li>Option B: incorrect as statement 1 is not normative as it is stating evidence on health spending in Sweden that we can check (1)</li> <li>Option D: incorrect as statement 2 is not normative as it is stating evidence about health</li> </ul>	(4)
	normative as it is stating evidence about health spending in Ireland that we can check <b>(1)</b>	

Question Number	Answer	Mark
2	<ul> <li>Answer B (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Definition of production possibility frontiermaximum possible production using all available resources (1)</li> </ul> </li> <li>Population decline of 723 000 will mean there is less labour available/ size of workforce reduces (1) so will be able to produce fewer capital goods and consumer goods (1)</li> <li>An economy is efficient when no resources are wasted and it is on the PPF/X and Y are on the PPF showing no resources are wasted (1)</li> </ul>	
	<ul> <li>Rejection marks Do not double award</li> <li>Option A: incorrect because this shows the impact of population growth / this would happen if more people came in to the country (1)</li> <li>Option C: incorrect as the movement to Y is unobtainable/ production possibilities would rise and the PPF shift out (1)</li> <li>Option D: incorrect as the movement to Y shows the economy moving from efficiency to having unemployed resources/ inefficient outcome (1)</li> </ul>	(4)

Question	Mark	
Number		
3	<ul> <li>Answer B (1 mark)</li> <li>Definition or formula for price elasticity of demand- responsiveness of quantity demanded to a change in price or the value of PED is between 0 and -1 making demand inelastic (1)</li> </ul>	
	<ul> <li>So the gain in total revenue from the higher price is greater than the loss in total revenue from having less customers (1) so the result is an increase in total revenue (1)</li> </ul>	
	<ul> <li>When price rises consumers will respond less than proportionately to the change/ electricity shows it is seen as an essential good so quantity demanded does not respond much to a change in price (1)</li> </ul>	
	<ul> <li>Diagram showing change in original and new total revenue following a price rise. They may indicate the loss and gain but the diagram must show total revenue rising (1+1)</li> </ul>	
	Rejection marks	
	<ul> <li>Do not double award</li> <li>Option A: incorrect as an increase in income will lead to a less than proportionate increase in demand/ incorrect as the elasticity would need to be greater than 1 (1)</li> <li>Option C: incorrect as electricity has an income elasticity of +0.13 meaning it is a normal good and not inferior/ an inferior good would have a negative YED (1)</li> <li>Option D: incorrect as the price elasticity of demand is -0.07 making demand inelastic (1)</li> </ul>	(4)

Question Number	Answer	Mark
4	Answer D (1 mark)	
	<ul> <li>Explanation (up to 3 marks)</li> <li>Definition of derived demand- where the demand for labour is derived from the demand for the final product OR identification of labour as a derived demand (1)</li> </ul>	
	• As the sales of hybrid electric vehicle increases 25 900 more cars will need to be manufactured so the firms will need to employ more labour to fulfil the increased number of orders (1)	
	<ul> <li>With demand for labour increasing this will result in wage rate rising (1)</li> </ul>	
	<ul> <li>Diagram may be drawn showing demand for labour rising (1) and wage rate rising (1)</li> </ul>	
	Rejection marks Do not double award	
	• Option A: incorrect as employment will rise as more cars will need producing <b>(1)</b>	
	<ul> <li>Option B: incorrect as the higher demand is likely to cause people to move from unemployment to employment (1)</li> </ul>	(4)
	• Option C: incorrect as higher demand for labour will see wages rise (1)	

Question Number	Answer	Mark
5	<ul> <li>Answer D (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Habitual behaviour is where consumers will regularly/routinely complete an action (1)</li> <li>Customers will remain loyal to their gas and electricity supplier (1)</li> <li>Definition of rationality- where consumers seek to maximise utility/ irrationality- where the consumers do not seem to maximise their utility (1)</li> </ul> </li> </ul>	
	<ul> <li>A rational consumer would switch to be able to save AUD929 in Victoria and AUD532 (1)</li> <li>Rejection marks Do not double award <ul> <li>Option A: incorrect as if they were good at computation they would calculate the annual savings and switch (1)</li> <li>Option B: incorrect as immobility of labour is about why workers do not move locations or occupations (1)</li> <li>Option C: incorrect as if they felt undervalued they would be more likely to switch to a supplier who may value them more (1)</li> </ul> </li> </ul>	(4)

Question Number	Answer	Mark
-	<ul> <li>Answer A (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Definition of specialisation/ the division of labour- where tasks are broken down and each worker focuses on a specific task (1)</li> </ul> </li> <li>If workers focus on a specific task they will not need to keep changing tools (1) which will save them time allowing them to focus on production (1)</li> <li>If workers focus on one activity they will become more skilled at that activity (1) enabling them to produce more output (1)</li> </ul> Rejection marks Do not double award <ul> <li>Option B: incorrect as unit costs would fall as output per worker rises (1)</li> <li>Option C: incorrect as specialising will reduce the number of times they change tools and should help reduce the time taken to produce each book case (1)</li> <li>Option D: incorrect as firms used to need to</li> </ul>	Mark
	<ul> <li>Option D. Incorrect as infits used to need to train workers on all aspects but will now only need to train them on the specific task they will undertake (1)</li> </ul>	(4)

Question Number	Answer	Mark
7	<ul> <li>Answer B (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Definition of mixed economy- where economic decisions are made by both the price mechanism and government/ public and private sector (1)</li> <li>Definition of public goods- non-rival and non-excludable (1)</li> <li>The free rider problem means that consumers will use the good without paying (1) meaning forms find it difficult to profit from them so the government has to provide them (1)</li> <li>Public goods provided include street lights/ flood defences (1)</li> </ul> </li> </ul>	
	<ul> <li>Rejection marks Do not double award</li> <li>Option A: incorrect as goods with external costs would be taxed to discourage consumption (1)</li> <li>Option C: incorrect goods with external benefits will be subsidised to encourage production (1)</li> <li>Option D: incorrect as the price mechanism does not involve government intervention (1)</li> </ul>	(4)

Question Number	Answer	Mark
8	<ul> <li>Answer C (1 mark)</li> <li>Explanation (up to 3 marks) <ul> <li>Definition of tradable pollution permit scheme <ul> <li>where firms are allocated permits and then can buy and sell them as required (1)</li> </ul> </li> <li>If a firm reduces its carbon emissions below its permitted level it will be able to generate revenue by selling permits (1)</li> <li>If a firm pollutes at a level above its permitted level it will have the added costs of having to buy permits (1)</li> <li>This creates an incentive to reduce pollution to avoid added costs/ gain from additional revenue (1)</li> </ul> </li> <li>Rejection marks <ul> <li>Option A: incorrect as firms do not receive a subsidy when they pollute as part of a permit scheme (1)</li> <li>Option B: incorrect as if they pollute above their permits they will have to find other firms to buy from (1)</li> <li>Option D: incorrect as those that pollute above the permitted level will buy permits (1)</li> </ul></li></ul>	(4)

# Section B: Data response

NB: KAA marks relates to those awarded for AO1, AO2 and AO3

NB: Evaluation marks relates to those awarded for AO4

Question Number	With reference to Extract 1, explain why the price of butter increased between April 2016 and September 2017. Illustrate your answer with a supply and demand diagram Answer	Mark
9(a)	Knowledge, application and analysis	
	<ul> <li>(up to 6 marks)</li> <li>Price of butter increased from €2 500 per tonne in April 2016 to €4 500 in September 2017 / 80% increase in cost of butter (1)</li> <li>Demand increasing due to increased popularity of baking using butter/ experts have suggested butter is not as fattening as previously thought/ increased consumption of butter in China and Japan / 19% increase in consumer demand between 2016 and 2017. (1)</li> <li>Supply decreasing due to dairy farmers leaving the market/ less milk available (1)</li> <li>Original and final equilibrium (1)</li> <li>Shift in demand (1)</li> <li>Shift in supply (1)</li> </ul>	
	Price per tonne of butter $P_{e}$ $Q_{1}Q_{e}$ Quantity of butter (tonnes)	(6)

Question Number	With reference to Extract 1, evaluate the likely effects of the increase in the price of butter on food manufacturersMarkAnswerAnswer				
9(b)	Answei		(14)		
	annlicati	on and analysis – indicative content	(14)		
KIIOWIEdge,	<ul> <li>B</li> <li>C</li> <li>E</li> <li>b</li> <li>ir</li> <li>ir</li> <li>P</li> <li>n</li> <li>Q</li> <li>P</li> <li>n</li> <li>Q</li> <li>P</li> <li>a</li> <li>M</li> <li>a</li> <li>M</li> <li>P</li> <li>R</li> <li>A</li> <li>M</li> <li>P</li> <li>R</li> <li>A</li> <li>M</li> <li>A</li> <li>M</li> <li>A</li> <li>M</li> <li>A</li> <li>M</li> <li>A</li> <li></li></ul>	on and analysis – indicative content utter is used in the production of biscuits, akes, pastries and fudge xperienced an 80% rise in the cost of utter in one year/ costs per tonne acreased from \$2500 to \$4500 igher costs of production so supply falls bemand contracts rices rise- higher prices were inevitable/ o longer avoid prices rises puantity falls onsumer surplus falls roducer surplus falls roducer surplus falls rofit falls as they absorb increased costs nd avoid prices rises evenue falls lay substitute to cheaper alternatives such s margarine lay reduce the quantity of butter urchased/ may adjust recipes lay focus on less butter rich foods educed output may result in nemployment			
Level	Marks	Descriptor			
0	0	A completely inaccurate response.			
1	1-3	Shows some awareness of the impact of ris costs on manufacturers but information pro often irrelevant and lacks organisation. Fre punctuation and/or grammar errors are lik present and the writing is generally unclea	esented is equent ely to be r.		
2	4-6	Understanding of the impact of rising butter costs on manufacturers. This may be supported by an accurate diagram. Material is presented with some relevance but there are likely to be passages which lack proper organisation. Punctuation and/or grammar errors are likely to be present which affect the clarity and coherence.			
3	7-8	Clear understanding of the impact of rising on manufacturers relevant to context. This supported by an accurate diagram which is and applied effectively. Material is presenter relevant and logical way. Some punctuatio grammar errors may be found, but the wri overall clarity and coherence.	may be explained ed in a n and/or		

Evaluation – indicative content			
	<ul> <li>Magi €2 50</li> <li>Sma othe</li> <li>Time price reve</li> <li>Subs incre</li> <li>Reve rises</li> <li>Rese staff</li> </ul>	nitude – an 80% price rise is significant/ 00 to €4 500- likely to have significant impact Il proportion of total costs made up by butter/ r costs more significant e period: may have contracts meaning butter e fixed for some time/ prices may fall later rsing the effect stituting to margarine may avoid cost eases enues may rise if demand is inelastic and price

0	0	No evaluative comments.	
1	1-2	For identifying evaluative comments without explanation or for developing one evaluative comment.	
2	3-4	For developing evaluative comments supported by some reasoning and application to context.	
3	5-6	For well developed evaluative comments supported by relevant reasoning and clear application to context.	

Question Number	With reference to Figure 1, explain the effect of the increase in the price of butter on the demand for margarine in the UK Answer	Mark
9(c)	Knowledge, application (Up to 4 marks):	
	<ul> <li>Knowledge (2 marks):</li> <li>Define substitutes- goods that can be used in place of each other/ that meet the same want or need (1)</li> </ul>	
	<ul> <li>XED is positive/ XED&gt;0 (1)</li> </ul>	
	<ul> <li>Diagram showing relationship between price of butter and demand for margarine (1)</li> </ul>	
	<ul> <li>Application (2 marks):</li> <li>You can use margarine or butter in making a cake / use butter or margarines in a sandwich/ on toast/ pastries/ biscuits (1)</li> </ul>	
	<ul> <li>So if price of butter increases the demand for margarine will increase (1)</li> </ul>	
	<ul> <li>XED is +0.08 so it is a substitute/ butter and margarine are substitutes (1)</li> </ul>	
	• A 10% increase in the price of butter will lead to a 0.8% rise in demand for margarine (1)	
	<ul> <li>Data suggests they are not strong/ good substitutes/ they are weak substitutes as it has a highly inelastic XED (1+1)</li> </ul>	(4)
	<ul> <li>There will be less than proportionate affect on demand (1)</li> </ul>	

Question Number	With reference to Extract 2, to what extent is it likely that a buffer stock scheme will reduce price fluctuations of butter?	Mark
	Answer	
9(d)		(10)
Knowledge,	<ul> <li>application and analysis – indicative content</li> <li>Definition or explanation of buffer stock scheme – where government sets a maximum (ceiling) and minimum (floor) price</li> <li>When price goes above ceiling price they will sell stocks/ When the price goes below floor price they will buy stocks</li> <li>This is to stabilise the price of butter</li> <li>Helps customers in ensuring price does not go too high</li> <li>Helps producers in ensuring incomes do not go too low</li> <li>The EU will pay the floor (minimum) price when there is over production and the price is below the floor</li> <li>High price of butter will see the EU release stocks from its buffer stock</li> <li>Q1-Q will be sold by the scheme</li> <li>The EU will earn revenue from selling the buttergrey area in the diagram</li> <li>This will keep price at or below maximum price</li> <li>This will limit any further increases in costs for manufacturers</li> <li>Price of butter</li> <li>Price of butter</li> <li>P floor</li> <li>P floor</li> <li>Alternative relevant diagrams should be rewarded-including diagram to show what will happen when price below floor price</li> </ul>	

Level	Marks	Descriptor				
0	0	A completely inaccurate response.

	e, applica	ation a	nd analysis – indicative content	<u> </u>
	р	arties	external costs- negative impacts on third ution exceeds safe limits- damages health-	
		•	articles affect respiratory system on health services in treating health	
			ns- leads to costs to government	
	le		on firms- lower productivity due to higher illness and absence- adds to the costs of s	
	• T	here v	vill be over-production $Q_{ME}$ - $Q_{SO}$	
		-	ce in the market is lower than the social	
		ptimu Velfare	e loss due to over-production of the good	
	c	osts and	MSC	
		enefits		
			Welfare loss MPC	
		P SO		
		P ME		
			MPB=MSB	
		0		
			Q <sub>SO</sub> Q <sub>ME</sub> Quantity	
Level	Marks	Desc	riptor	
0	0	A cor	npletely inaccurate response.	
1	1-3		vs some awareness of external costs. Diagram li	,
			inaccurate or incomplete. Material presented is want and lacks organisation. Frequent punctuat	
		and/	or grammar errors are likely to be present and t	
2	4-6		ng is generally unclear. Prstanding of external costs, with some applicati	on to
			ext. Diagram likely to be accurate but may be	
			nplete.	
			rial is presented with some relevance but there to be passages which lack proper organisation.	
L	1			

		Dup studies and/or supremary arrays are likely to be				
		Punctuation and/or grammar errors are likely to be				
		present which affect the clarity and coherence.				
3	7-8	Clear understanding of external costs and linked to				
		context. Diagram is accurate and used to explain externation	al			
		costs. Material is presented in a relevant and logical way.				
		Some punctuation and/or grammar errors may be found,	,			
		but the writing has overall clarity and coherence.				
Evaluation	n – indica	ative content				
	• N	1agnitude- they have the second highest recorded				
	le	evels/ 10 x higher than recommended amount				
	• E	external costs may take time to emerge				
	• A	ir pollution could be caused by vehicle exhaust firms				
		ind desert dust				
	• N	leasuring the size of the external costs is difficult				
	• T	here may be significant private and external				
	b	enefits associated with this construction				
Level	Marks	Descriptor				
0	0	No evaluative comments.				
1	1-2	For identifying evaluative comments without explanation				
		or for developing one evaluative comment.				
2	3-4	For developing evaluative comments supported by some				
		reasoning and application to context.				
3	5-6	For well developed evaluative comments supported by				
		relevant reasoning and clear application to context.
