### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **ALL** questions in Sections A, B and C.
- Answer **ONE** question in Section D.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*

### Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*
- Calculators may be used.

### Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

## SECTION A

Answer ALL questions in this section.

Questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

1 Which **one** of the following will cause a movement along the demand curve in the market for rice?

- A An increase in the global population
- B An increase in real incomes
- C A decrease in the price of noodles
- D A decrease in the price of rice

(Total for Question 1 = 1 mark)

2 Which **one** of the following is an advantage of a free market economy?

- A The profit motive gives firms the incentive to be more efficient
- B Public goods may be under-provided by the price mechanism
- C Goods may be over-provided compared with the social optimum level of output
- D Government intervention leads to the correction of market failure

(Total for Question 2 = 1 mark)

3 Which **one** of the following is an example of market failure?

- A Government provision of flood defences that is greater than the social optimum output
- B Doctors prescribe too many medicines because the cost is covered by health insurance
- C Lower prices create an incentive for firms to switch production to more profitable activities
- D Unintended consequences that follow the introduction of an indirect tax

(Total for Question 3 = 1 mark)

4 The diagram shows the market for new house construction.

The housing construction industry is a major source of pollution.

Which **one** of the following can be deduced from the diagram?

- A The social optimum output is  $Q_1$
- B The market equilibrium output is  $Q_2$
- C Welfare loss is shown by the area UVT
- D Welfare loss is shown by the area UWV

(Total for Question 4 = 1 mark)

- 5 The table shows the percentage of electricity generated by different sources for Portugal in 2016.

	%
Coal	22
Gas	22
Hydro	24
Oil	2
Solar	2
Wind	22
Other renewable	6

(Source: <https://www.iea.org/countries/Portugal/>)

Which **one** of the following can be deduced from the table?

- A Portugal generated 44% of its electricity from non-renewable sources
- B Portugal generated 50% of its electricity from renewable sources
- C Portugal generated most of its electricity from renewable sources
- D Portugal generated most of its electricity from non-renewable sources

(Total for Question 5 = 1 mark)

- 6 The table shows the estimated price elasticity of demand for air travel. Short-haul is air travel within the same continent and long-haul is air travel to a different continent.

	Estimates of price elasticity of demand
Short-haul business travellers	-0.70
Long-haul business travellers	-0.27
Short-haul leisure travellers	-1.52
Long-haul leisure travellers	-1.04

(Source: [https://www.fin.gc.ca/consultresp/Airtravel/airtravStdy\\_-eng.asp](https://www.fin.gc.ca/consultresp/Airtravel/airtravStdy_-eng.asp))

Which **one** of the following can be deduced from the table?

- A** An increase in the price of flights for long-haul business travellers will increase total revenue for airlines
- B** An increase in the price of flights for short-haul leisure travellers will increase total revenue for airlines
- C** Long-haul business travellers are more responsive to a change in price than short-haul business travellers
- D** Long-haul leisure travellers are more responsive to a change in price than short-haul leisure travellers

## SECTION C

**Study Figures 1 and 2 and Extracts A, B and C in the Source Booklet before answering Question 12.**

**Write your answers in the space provided on the following pages.**

- 12** (a) Define the term 'substitutes' (Extract A, line 8). (2)
- (b) Explain what is meant by the term 'inelastic supply'. Refer to Figure 1 and Extract A in your answer. (4)
- (c) Analyse why the price of vanilla increased significantly between 2014 and 2018. Refer to Figure 2 and Extract A in your answer.  
Illustrate your answer with a supply and demand diagram. (6)
- (d) With reference to Extract C, examine two microeconomic effects of Finland's decision to remove the sugar tax. (8)
- (e) Discuss reasons why the 'quantity of education is below the social optimum level' (Extract B, lines 2 and 3). Refer to external benefits in your answer.  
Illustrate your answer with an appropriate diagram. (14)

The markets for vanilla, education and sugar

Figure 1 Estimated price elasticity of supply for vanilla in Madagascar and Indonesia

	Madagascar	Indonesia
Price elasticity of supply	0.48	0.52

Figure 2 US\$ price of vanilla per kilogram, 2008-2018

### **Extract A Vanilla price increases**

Madagascar grows 80% of the world's vanilla. Few other countries have the climate to be able to grow the crop. Between 2008 and 2011 the price was so low that some vanilla growers stopped production and grew other crops instead. However, the price of vanilla increased significantly between 2014 and 2018.

5

In 2017 a cyclone in Madagascar destroyed a large quantity of the vanilla crop. As a result some farmers will not see their vanilla crops recover fully until 2020.

There are artificial substitutes for vanilla such as vanillin. However, in recent years, consumers have shown an increased preference for natural vanilla. Vanilla is a key ingredient used in ice cream, sweets, chocolate and in cosmetic products. The demand for all of these products has increased rapidly in recent years.

10

The high price attracted farmers in other countries, such as Uganda, to start growing vanilla. However, it takes three years for the plantations to mature and produce vanilla crops.

### **Extract B Lack of education in Madagascar**

Adults in Madagascar have typically spent only 4.4 years at school. This quantity of education is below the social optimum level.

In 2012 it was estimated that 20 000 children aged 12 to 17 years old worked in the production of vanilla. This was 32% of the workforce employed in this industry. Many families need their children to work to earn an additional income. They cannot afford to lose this income by sending their children to school. Following the cyclone the price of food in Madagascar rose significantly. This increased the need for children to work.

5

Many primary schools are in a poor condition and are overcrowded. Teachers have limited or no training. Many schools are destroyed by the annual cyclones and public funds for education have been reduced.

10

### **Extract C Sugar tax removed in Finland**

In 2011 the Government of Finland introduced an indirect tax known as a sugar tax on sweets, chocolate, ice cream and fizzy drinks. This was charged at €0.95 per kilogram or €0.11 per litre. The tax raised revenue for the government and decreased consumption of these products by approximately 5%.

5

In 2017 Finland removed the sugar tax. It had been criticised as being unfair. Manufacturers of biscuits and cakes had been unaffected by the tax giving them a competitive advantage over sweet and chocolate manufacturers. The tax revenue that would have been raised was estimated to be €109 million per year.
