General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme – not according to their perception of where the grade boundaries may lie.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification/indicative content will not be exhaustive.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, a senior examiner must be consulted before a mark is given.
- Crossed out work should be marked **unless** the candidate has replaced it with an alternative response.

Specific Marking Guidance

When deciding how to reward an answer, examiners should consult both the indicative content and the associated marking grid(s). When using a levels-based mark scheme, the 'best fit' approach should be used.

- Examiners should first decide which descriptor most closely matches the answer and place it in that level.
- The mark awarded within the level will be decided based on the quality of the answer and will be modified according to how securely all bullet points are displayed at that level.
- Indicative content is exactly that – they are factual points that candidates are likely to use to construct their answer.
- It is possible for an answer to be constructed without mentioning some or all of these points, as long as they provide alternative responses to the indicative content that fulfils the requirements of the question. It is the examiner's responsibility to apply their professional judgement to the candidate's response in determining if the answer fulfils the requirements of the question.

Level	Mark	AO1 = bullet point 1	AO2 = bullet points 2, 3, 4	AO3 = bullet point 5	AO4 = bullet point 6
	0	No rewardable material.			
Level 1	1–6	<p>Descriptive</p> <ul style="list-style-type: none"> • Knowledge of methods of language analysis is largely unassimilated. Recalls limited range of terminology and makes frequent errors and technical lapses. • Knowledge of concepts is limited. • Knowledge of issues is limited. • Uses a descriptive approach or paraphrases with little evidence of applying understanding to the data. • Lists contextual factors and language features. Makes limited links between these and the construction of meaning in the data. • Makes no connections between the data. 			
Level 2	7–12	<p>General understanding</p> <ul style="list-style-type: none"> • Uses methods of language analysis that show general understanding. Organises and expresses ideas with some clarity, though has lapses in use of terminology. • Summarises basic concepts. • Summarises basic issues. • Applies some of this understanding when discussing data. • Describes construction of meaning in the data. Uses examples of contextual factors or language features to support this. • Gives obvious similarities and differences. Makes links between the data and applies basic theories and concepts. 			
Level 3	13–18	<p>Clear relevant application</p> <ul style="list-style-type: none"> • Applies relevant methods of language analysis to data with clear examples. Ideas are structured logically and expressed with few lapses in clarity and transitioning. Clear use of terminology. • Clear understanding of relevant concept. • Clear understanding of relevant issues. • Clear application of this understanding to the data. • Explains construction of meaning in data by making relevant links to contextual factors and language features. • Identifies relevant connections across data. Mostly supported by clear application of theories, concepts and methods. 			
Level 4	19–24	<p>Discriminating controlled application</p> <ul style="list-style-type: none"> • Controlled application of methods of language analysis supported with use of discriminating examples. Controls the structure of response with effective transitions, carefully chosen language and use of terminology. • Discriminating selection of a range of relevant concepts. • Discriminating selection of a range of relevant issues. • Discriminating application of this understanding to the data. • Makes inferences about the construction of meaning in data by examining relevant links to contextual factors and language features. • Analyses connections across data. Carefully selects and embeds use of theories, concepts and methods to draw conclusions about the data. 			

Level 5	25–30	Critical and evaluative <ul style="list-style-type: none">• Critical application of methods of language analysis with sustained examples. Uses sophisticated structure and expression with appropriate register and style, including use of appropriate terminology.• Evaluative selection of a wide range of relevant concepts.• Evaluative selection of a wide range of relevant issues.• Evaluative application of this selection to the data.• Critically examines relevant links to contextual factors and language features. Evaluates construction of meaning in data.• Evaluates connections across data. Critically applies theories, concepts and methods to data.
