Mark Scheme (Results)

October 2020

Pearson Edexcel International Advanced
Subsidiary
In Information Technology (WIT11/01)
Unit 1

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted. Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response

Question number	Answer	Additional Guidance	Mark
1 (a)	<p>Award one mark per point to a maximum of two marks.</p> <ul style="list-style-type: none"> • pay-per-click advertising (1) • paid advertising / product placement in the blog (articles) (1) • selling of customer data (1) • a subscription for access to the blog (e.g. extra articles, higher resolution images, access) (1) • asking for donations (1) • sponsored content (1) • selling / licensing content (images, text, or products) (1) 	Answers must be suitable for a blog	2

Question number	Answer	Additional Guidance	Mark
1 (b) i	C		1
1 (b) ii	A		1

Question number	Answer	Additional Guidance	Mark
1 (c)	<p>Award up to two marks each for one benefit and one drawback such as:</p> <p>Benefits:</p> <ul style="list-style-type: none"> • can be accessed from anywhere with internet (1) which means Gathii can blog while away from home / from a photo location (1) • Gathii does not need to purchase extra storage (at home / on his system) (1) saving money (1) (needs to have a description of the saving to be awarded this mark) • data security, assuming Gathii keeps copies at home as well as in the cloud / keeps photos on both sites (1) this means that Gathii does not need to worry about making backups / recovering from disasters e.g. his home storage device failing (1) <p>Drawbacks:</p> <ul style="list-style-type: none"> • requires internet access (1) which means Gathii may not always be able to get at his data (1) • there may be limitations on e.g. bandwidth, storage time, time before non-accessed accounts are deleted (1) which means Gathii may not always be able to access his files. (1) • cloud storage is 'someone else's' computer' (1) which means that Gathii has limited control over e.g. security, who can see the data (1) 	Allow 1 drawback mark for a general answer about security risk	4

	<ul style="list-style-type: none"> uploading and downloading files uses data allowance (1) which means that Gathii may incur extra costs / be penalised for exceeding his allowance / need to purchase extra data allowance (1) 		
Question number	Answer	Additional Guidance	Mark
1 (d)	<p>Award up to two marks for each of two descriptions such as:</p> <ul style="list-style-type: none"> can get feedback / criticism / comments on photos (1) which will help him improve technique / style / quality (1) can pick up ideas / suggestions for content/images (1) that can be exploited / written about in his blog (1) can build (professional) relationships with other photographers / possible clients (1) allowing him to sell/shoot images for money/other benefits can build a name/reputation for himself / his images (1) outside of his blog (1) can get support / answers to photography problems (1) from the combined experience of other forum members (1) can get support / answers to blog problems (1) from the combined experience of other forum members (1) can get information about events (1) in a photography related context e.g. exhibition, workshop (1) 	Do not accept answers about publicising the blog	4

Question number	Answer	Additional Guidance	Mark
1(e)	<p>Award one mark for each point up to a maximum of three marks for a linked explanation.</p> <ul style="list-style-type: none"> non-linear text contains links (from text / graphics, video) to other text / graphics, video / sound link can go to whole file/document or specific location within the file/document links can be anywhere on internet / world wide web providing the 'web strands' that create the world wide web <p>Example</p> <ul style="list-style-type: none"> Hypertext provides a link from one web page/document/text to another (1) the second text can be anywhere on the internet (1) this type of link forms the 'web' of the world wide web (1) 	Although this is not what the question asked, allow 1 mark for a good description of hypertext markup language	3

	<ul style="list-style-type: none"> • Hyperlinks are examples of non-linear text (1) which means that they hold links to pieces of text that do not immediately follow the hyperlink text (1) these links are what join up the world wide web/internet (1) • Hypertext links a piece of text to another piece of text (1) the second piece of text can be anywhere on the internet (1) and the link can be to any place within the second piece (1) 		
Total for Question 1			15

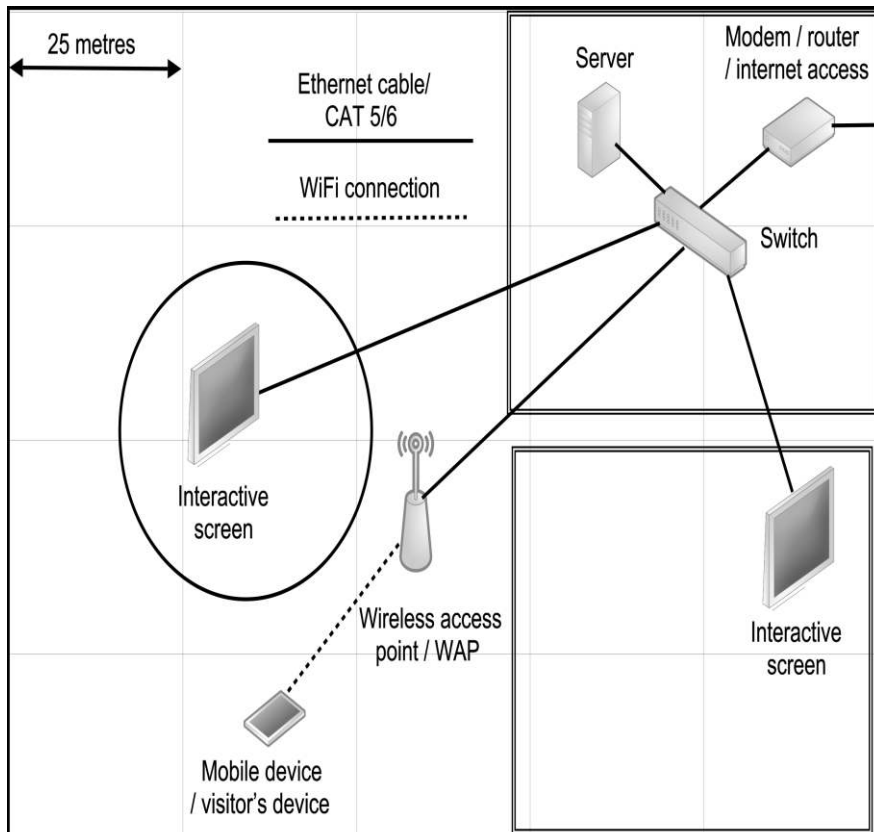

Question number	Answer	Additional Guidance	Mark
2(a)	Award one mark for each point up to a maximum of three marks. <ul style="list-style-type: none"> • position information (1) • alignment markings (1) • error correction information (1) • timing information (1) • QR code version (1) • QR code format (1) 	Although this is not what the question asked, allow 1 mark for 'contains a URL/link to web page'	3

Question number	Answer	Additional Guidance	Mark
2(b) i	Award one mark for each point up to a maximum of four marks for a linked description. <ul style="list-style-type: none"> • RIFD tag contains (digitally) stored information (1) • RIFD tag has an antenna (1) • RIFD reader sends (interrogation) signal (1) • any tag within range responds to the signal (1) • RIFD tag responds to signal by returning stored information (1) • RIFD tag gets power from broadcast radio waves (1) • RFID detector performs action as a result of exchange (1) Example <ul style="list-style-type: none"> • RIFD tags hold identification information (1) which is sent in response (1) to a reader sending a signal (1) the tag is powered by the reader's signal (1) • passive tags are powered by radio waves (1) which are sent by the RIFD reader (1) the tag sends identifying information (1) in response to signals from the reader 		4

	<ul style="list-style-type: none"> the tag works with a reader. The reader broadcasts a radio signal (1) and any tag within range responds (1) sending the code that is stored in the tag (1) the tag does not have a battery and gets its power from the radio signal (1). 		
2(b) ii	<p>Award one mark for any of:</p> <ul style="list-style-type: none"> selling a plant / checkout free payment stocktaking / stock checking / stock control / inventory control / order picking logging plant care e.g. watering schedule 	Do not allow theft related answers as this was given in the question	1

Question number	Answer	Additional Guidance	Mark
2(c) i	<p>Award up to two marks for each of two descriptions such as:</p> <ul style="list-style-type: none"> eavesdropping/listening in to (NFC transmission) (1) allows access to private/personal/financial data while card is making the connection to the reader (1) data corruption/manipulation (1) where the connecting signal is jammed/interfered with affecting/altering/preventing the transaction (1) man in the middle/signal interception (1) where an attacker intercepts the signal and alters it before sending it on (1) 		4
2(c) ii	<p>Award one mark for each point up to a maximum of two marks for:</p> <ul style="list-style-type: none"> (vendor/garden can) set up secure channels (this ensures communications are encrypted) (1) which prevents eavesdropping/data corruption/data theft (1) 	<p>Do not accept passive measures such as card shields Allow encryption for 1 mark</p>	2
Total for Question 2			14

Question number	Answer	Additional Guidance	Mark
3 (a)	<p>Award one mark for each of:</p> <ul style="list-style-type: none"> (a) Server/computer in offices (b) Server/computer connects to internet via max 1 switch and modem / router (c) Server/computer connects to all devices shown via one or more switches, by cable. (d) Interactive screens in exhibition area and engine shed, connected by cable. (e) Mobile device / user connected to WAP by WiFi (f) cable type identified, Ethernet / Cat5/6 / optical fibre 	<p>Accept reasonable alternative names for items. Accept WiFi links instead of cable for anything except server to switch. Accept a firewall in the modem /router /internet access for one mark</p>	6

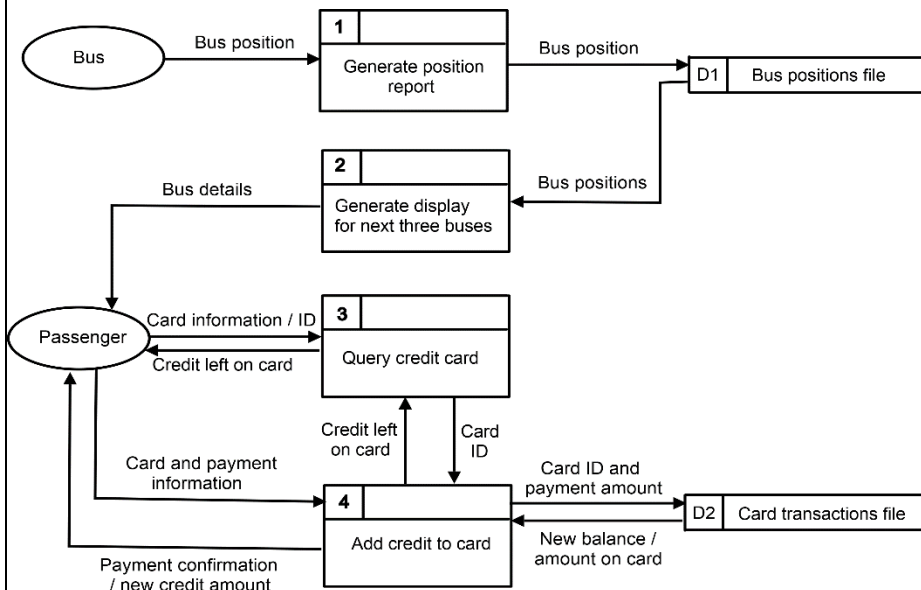

Question number	Answer	Additional Guidance	Mark
3(b)	Firewall, on router or a separate hardware. <ul style="list-style-type: none"> • Check for open ports, with port scanner • Close all ports except those needed for e.g. email, browser • Keep firewall patched / up to date Server / data stores. <ul style="list-style-type: none"> • Encrypt data • Set access levels, user rights, passwords on files • Enforce strong passwords / two factor authentication • Set up anti-malware, keep it updated • Ensure OS, and other software is patched up to date Other. <ul style="list-style-type: none"> • Switch off internet access out of hours • Train staff on security, e.g. avoiding phishing, mailworms, etc. • Hire white hat/ethical hackers to probe the system for weak points • Ensure router/modem password is changed from default to something more robust 		6
Level	Mark	Descriptor	
	0	No rewardable material.	
Level 1	1-2	<ul style="list-style-type: none"> • Demonstrates limited knowledge and understanding, some of which may be inaccurate. • Applies understanding with limited coherence to produce a superficial and unbalanced discussion. 	
Level 2	3-4	<ul style="list-style-type: none"> • Demonstrates knowledge and understanding which is mostly relevant but may include some inaccuracies. • Applies understanding to make some coherent connections, leading to a discussion that shows some development, but may be unbalanced. 	
Level 3	5-6	<ul style="list-style-type: none"> • Demonstrates accurate and relevant knowledge and understanding throughout. • Applies understanding coherently to produce a balanced and fully developed discussion. 	
Total for Question 3			12

Question number	Answer	Additional Guidance	Mark
4(a)	<p>Award one mark for each of:</p> <ul style="list-style-type: none"> • at least three correct relationships (the lines) • at least three correct relationship types • at least three correct primary keys in Student, Teacher, Subject, Class • correct composite primary key in Registration • correctly identified foreign keys in Class • correctly identified foreign keys in Registration 		6

Question number	Indicative content	Additional Guidance	Mark
4(b)	<p>Responses should be in relationship to the context of the question. (Discuss why a relational database is suitable for handling structured data.)</p> <p>Structured data</p> <ul style="list-style-type: none"> • is readable by machine • using simple algorithms <p>Databases in general</p> <ul style="list-style-type: none"> • long established (over 40 years) method of holding data • so well understood / tested / unlikely to produce unexpected errors <p>Type of database / using RDBMS</p> <ul style="list-style-type: none"> • reduces data duplication / enforces integrity • stores data in tables / records / fields • allows linking of tables through keys • tables / records / fields are machine readable with simple algorithms <p>Database queries</p> <ul style="list-style-type: none"> • database designed for efficient queries / machine readable with simple algorithms • many programming languages have built-in functions/libraries to deal with database structures • SQL is simple, widespread, and popular / easy for non-technical users to learn/use 		6
Level	Mark	Descriptor	
	0	No rewardable material.	
Level 1	1–2	<ul style="list-style-type: none"> • Demonstrates limited knowledge and understanding, some of which may be inaccurate. • Applies understanding with limited coherence to produce a superficial and unbalanced discussion. 	
Level 2	3–4	<ul style="list-style-type: none"> • Demonstrates knowledge and understanding which is mostly relevant but may include some inaccuracies. • Applies understanding to make some coherent connections, leading to a discussion that shows some development, but may be unbalanced.
