

Mark Scheme (Results)

Summer 2021

Pearson Edexcel International Advanced Subsidiary
In Information Technology (WIT14)
Unit 4

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question number	Answer	Additional Guidance	Mark	
1(a)(i)	Presence check and format check for contact_telephone			
	A1	Presence check on contact_telephone field Required set to yes OR validation rule of 'Is Not Null'	Does not need validation text as no mark for given that	1
	A2	Input mask or suitable validation rule on contact_telephone field Input mask 000000000000 Input mask 000000000000;;_	Accept alternatives e.g. suitable validation rule Must be for the format of the telephone number given in the database	1
			Total	2
1(a)(ii)	List check for quiz_day			
	A3	List box or combo box added to quiz_day field	Must see field it is applied to. Should be design view but can accept datasheet view.	1
	A4	Correct values Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday	Accept datasheet view so long as can see all the values. Accept any order of days. Accept spelling errors	1
	A5	Limit to list set to Yes		1
			Total	3
1(a)(iii)	Data type for wheelchair access			
	A6	Yes/No		1
			Total	1

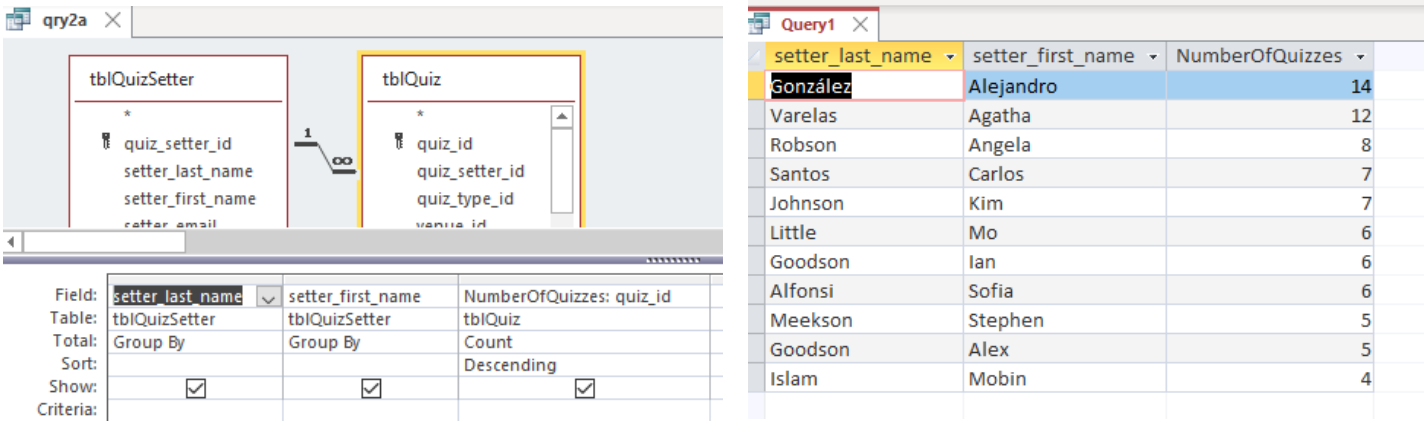

Question number	Answer	Additional Guidance	Mark	
1(b)	Edit venue form			
	B1	Form includes all of the fields from the venue table 		1
	B2	venue_id is disabled		1
	B3	Combo/List box has been added to select a venue address	Do not need to see any values for the combo box	1
	B4	One from: <ul style="list-style-type: none"> Form labels are appropriate (not database field names) Form has meaningful title Entry boxes on form are resized appropriately to reflect the data they will be used to enter Instructions on how to use Asterisk on any field except venue_id 		1
	B5	Form would update to show the venue details for the venue selected in the combo box	Must see design view method	1
	B6	Button present and suitably labelled e.g. Close		1
	B7	Suitable message would display to say the data has not been saved	Must see design view method	1
	B8	No more than one suitable message would appear ONLY if changes have been made.	Must see design view method	1
Total			8	

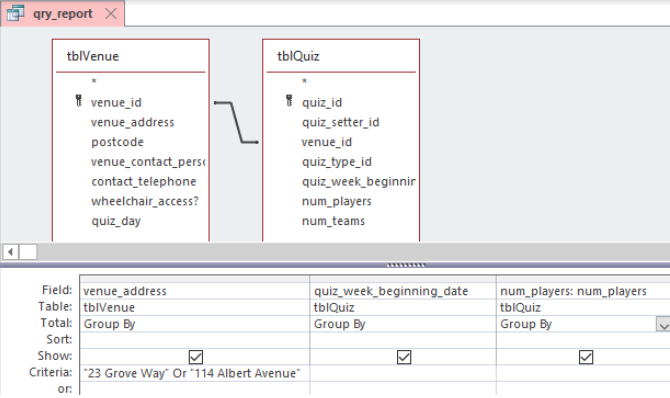

Question number	Answer	Additional Guidance	Mark
1(c)	<p>Indicative content</p> <p><i>Analysis</i></p> <ul style="list-style-type: none"> • Field called quiz_day in the table. • It is atomic as it only has one day of the week in it. • It has a list check on it that means the user can only select 1 day of the week as the value for it. • Primary key of venue_id cannot be repeated in the table so cannot add another row for a venue that needs quizzes on more than one day. • If the primary key was removed and further rows added for each venue that has quizzes on more than one day there would be redundant data. <p><i>Recommendations</i></p> <ul style="list-style-type: none"> • Create a new table called quiz days. • Remove the quiz_day field from the venue table • Have a composite primary key of venue_id and quiz_day so that the venue_id could be repeated as many times as needed so long as the day of the week was different • Could keep the list check on the quiz_day field 		9

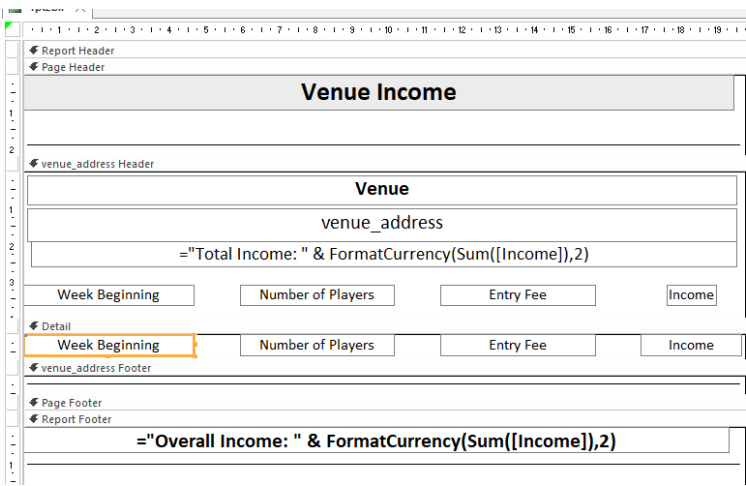

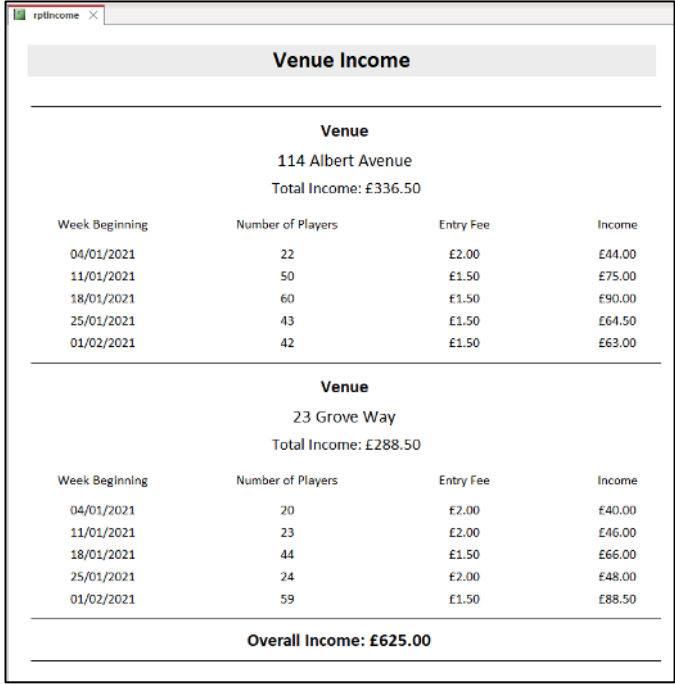

Level	Mark	Descriptor
	0	No Awardable content
Level 1	1-3	<ul style="list-style-type: none"> • Analysis is flawed or superficial, containing simple statements that show limited understanding of the subject matter. • Solution may contain some aspects that are appropriate, but is generally ineffective.
Level 2	4-6	<ul style="list-style-type: none"> • Analysis is sound, containing minor inaccuracies or omissions, showing some understanding of the given issue. • Solution is workable but may have minor issues.
Level 3	7-9	<ul style="list-style-type: none"> • Analysis is sound and developed, containing ideas that are linked together in a fluent and logical way, showing a thorough understanding of the given issue. • Solution is appropriate and workable.

2(a)	Quiz setter and quizzes set query																																																														
 <p>The screenshot displays two windows from Microsoft Access. The left window, titled 'qry2a', is in Design View, showing a relationship between 'tblQuizSetter' and 'tblQuiz'. The 'tblQuizSetter' table has fields: quiz_setter_id, setter_last_name, setter_first_name, and setter_email. The 'tblQuiz' table has fields: quiz_id, quiz_setter_id, quiz_type_id, and venue_id. A one-to-many relationship is shown between 'quiz_setter_id' in 'tblQuizSetter' and 'quiz_setter_id' in 'tblQuiz'. Below the design view is a field table with the following content:</p> <table border="1" data-bbox="472 504 1155 647"> <thead> <tr> <th>Field:</th> <th>setter_last_name</th> <th>setter_first_name</th> <th>NumberOfQuizzes: quiz_id</th> </tr> </thead> <tbody> <tr> <td>Table:</td> <td>tblQuizSetter</td> <td>tblQuizSetter</td> <td>tblQuiz</td> </tr> <tr> <td>Total:</td> <td>Group By</td> <td>Group By</td> <td>Count</td> </tr> <tr> <td>Sort:</td> <td></td> <td></td> <td>Descending</td> </tr> <tr> <td>Show:</td> <td><input checked="" type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> </tr> <tr> <td>Criteria:</td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <p>The right window, titled 'Query1', is in Datasheet View, showing the results of the query. The columns are 'setter_last_name', 'setter_first_name', and 'NumberOfQuizzes'. The data is as follows:</p> <table border="1" data-bbox="1178 225 1861 647"> <thead> <tr> <th>setter_last_name</th> <th>setter_first_name</th> <th>NumberOfQuizzes</th> </tr> </thead> <tbody> <tr><td>González</td><td>Alejandro</td><td>14</td></tr> <tr><td>Varelas</td><td>Agatha</td><td>12</td></tr> <tr><td>Robson</td><td>Angela</td><td>8</td></tr> <tr><td>Santos</td><td>Carlos</td><td>7</td></tr> <tr><td>Johnson</td><td>Kim</td><td>7</td></tr> <tr><td>Little</td><td>Mo</td><td>6</td></tr> <tr><td>Goodson</td><td>Ian</td><td>6</td></tr> <tr><td>Alfonsi</td><td>Sofia</td><td>6</td></tr> <tr><td>Meekson</td><td>Stephen</td><td>5</td></tr> <tr><td>Goodson</td><td>Alex</td><td>5</td></tr> <tr><td>Islam</td><td>Mobin</td><td>4</td></tr> </tbody> </table>				Field:	setter_last_name	setter_first_name	NumberOfQuizzes: quiz_id	Table:	tblQuizSetter	tblQuizSetter	tblQuiz	Total:	Group By	Group By	Count	Sort:			Descending	Show:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Criteria:				setter_last_name	setter_first_name	NumberOfQuizzes	González	Alejandro	14	Varelas	Agatha	12	Robson	Angela	8	Santos	Carlos	7	Johnson	Kim	7	Little	Mo	6	Goodson	Ian	6	Alfonsi	Sofia	6	Meekson	Stephen	5	Goodson	Alex	5	Islam	Mobin	4
