GCE Statistics S3 (6691) Paper 1

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.

Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information, please call our GCE line on 0844 576 0025 or visit our website at www.edexcel.com.

If you have any subject specific questions about the content of this Mark Scheme that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

EDEXCEL GCE MATHEMATICS

General Instructions for Marking

- 1. The total number of marks for the paper is 75.
- 2. The Edexcel Mathematics mark schemes use the following types of marks:
 - M marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
 - A marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
 - B marks are unconditional accuracy marks (independent of M marks)
 - Marks should not be subdivided.

3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes and can be used if you are using the annotation facility on ePEN.

- bod benefit of doubt
- ft follow through
- the symbol will be used for correct ft
- cao correct answer only
- cso correct solution only. There must be no errors in this part of the question to obtain this mark
- isw ignore subsequent working
- awrt answers which round to
- SC: special case
- oe or equivalent (and appropriate)
- dep dependent
- indep independent
- dp decimal places
- sf significant figures
- * The answer is printed on the paper
- The second mark is dependent on gaining the first mark

	2^{nd} M1 for attempting d for their ranks. Must be using ranks. 3^{rd} M1 for attempting $\sum d^2$ (must be using ranks)	
	1 st A1 for sum of 28 (or 84) 4 th M1 for use of the correct formula with their $\sum d^2$. If answer is not	
	correct an expression is required. 2 nd A1 for awrt 0.5 (or -0.5)	
(b)	1 st B1 for both hypotheses in terms of ρ , H ₁ must be two tail.	
	2^{nd} B1 for cv of ± 0.7857 (or 0.7143 to ft from 1-tailed H ₁)	
	M1 for a correct statement relating their r_s with their cv but cv must	
	be such that cv <1	
	A1ft for a correct contextualised comment. Must mention "Councillor" and "claim" or "hardship" and "number of calls (to the emergency services)"	
	Follow through their r_s and their cv (provided it is $ cv < 1$	
	Condone use of "association" in conclusion for A1 Condone 'positive' in conclusion.
