

Question 4 continued

Ruled area with horizontal lines for writing.

Leave blank

Question 5 continued

A series of horizontal lines for writing the answer to Question 5.

(Total 6 marks)

Q5

A small rectangular box for marking the score for Question 5.

6.

Figure 1

Figure 1 shows the graph of the curve with equation

$$y = \frac{16}{x^2} - \frac{x}{2} + 1, \quad x > 0$$

The finite region R , bounded by the lines $x = 1$, the x -axis and the curve, is shown shaded in Figure 1. The curve crosses the x -axis at the point $(4, 0)$.

(a) Complete the table with the values of y corresponding to $x = 2$ and 2.5

x	1	1.5	2	2.5	3	3.5	4
y	16.5	7.361			1.278	0.556	0

(2)

(b) Use the trapezium rule with all the values in the completed table to find an approximate value for the area of R , giving your answer to 2 decimal places.

(4)

(c) Use integration to find the exact value for the area of R .

(5)

7.

Figure 2

Figure 2 shows ABC , a sector of a circle of radius 6 cm with centre A . Given that the size of angle BAC is 0.95 radians, find

- (a) the length of the arc BC , (2)
- (b) the area of the sector ABC . (2)

The point D lies on the line AC and is such that $AD = BD$. The region R , shown shaded in Figure 2, is bounded by the lines CD, DB and the arc BC .

- (c) Show that the length of AD is 5.16 cm to 3 significant figures. (2)

Find

- (d) the perimeter of R , (2)
- (e) the area of R , giving your answer to 2 significant figures. (4)

Question 7 continued

Blank lined writing area for student response.

Question 7 continued

Lined area for writing the answer to Question 7.

Q7

(Total 12 marks)

8.

Figure 3

Figure 3 shows a flowerbed. Its shape is a quarter of a circle of radius x metres with two equal rectangles attached to it along its radii. Each rectangle has length equal to x metres and width equal to y metres.

Given that the area of the flowerbed is 4 m^2 ,

(a) show that

$$y = \frac{16 - \pi x^2}{8x} \tag{3}$$

(b) Hence show that the perimeter P metres of the flowerbed is given by the equation

$$P = \frac{8}{x} + 2x \tag{3}$$

(c) Use calculus to find the minimum value of P . (5)

(d) Find the width of each rectangle when the perimeter is a minimum.
Give your answer to the nearest centimetre. (2)

9. (i) Find the solutions of the equation $\sin(3x - 15^\circ) = \frac{1}{2}$, for which $0 \leq x \leq 180^\circ$

(6)

(ii)

Figure 4

Figure 4 shows part of the curve with equation

$$y = \sin(ax - b), \text{ where } a > 0, 0 < b < \pi$$

The curve cuts the x -axis at the points P , Q and R as shown.

Given that the coordinates of P , Q and R are $(\frac{\pi}{10}, 0)$, $(\frac{3\pi}{5}, 0)$ and $(\frac{11\pi}{10}, 0)$ respectively, find the values of a and b .

(4)
