**Thursday 7 January 2021**

Morning (Time: 1 hour 30 minutes)

Paper Reference **WMA14/01**

**Mathematics**

**International Advanced Subsidiary/Advanced Level**  
**Pure Mathematics P4**

**You must have:**

Mathematical Formulae and Statistical Tables (Lilac), calculator

Total Marks

|  |
|--|

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

1/1/1/

Pearson

1. (a) Find the first 4 terms, in ascending powers of  $x$ , of the binomial expansion of

$$\left(\frac{1}{4} - 5x\right)^{\frac{1}{2}} \quad |x| < \frac{1}{20}$$

giving each coefficient in its simplest form.

(5)

By substituting  $x = \frac{1}{100}$  into the answer for (a),

- (b) find an approximation for  $\sqrt{5}$

Give your answer in the form  $\frac{a}{b}$  where  $a$  and  $b$  are integers to be found.

2.

Figure 1

Figure 1 shows a sketch of parallelogram  $ABCD$ .

Given that  $\vec{AB} = 6\mathbf{i} - 2\mathbf{j} + 3\mathbf{k}$  and  $\vec{BC} = 2\mathbf{i} + 5\mathbf{j} + 8\mathbf{k}$

(a) find the size of angle  $ABC$ , giving your answer in degrees, to 2 decimal places. (3)

(b) Find the area of parallelogram  $ABCD$ , giving your answer to one decimal place. (2)

4. The curve  $C$  is defined by the parametric equations

$$x = \frac{1}{t} + 2 \quad y = \frac{1 - 2t}{3 + t} \quad t > 0$$

(a) Show that the equation of  $C$  can be written in the form  $y = g(x)$  where  $g$  is the function

$$g(x) = \frac{ax + b}{cx + d} \quad x > k$$

where  $a, b, c, d$  and  $k$  are integers to be found.

(5)

(b) Hence, or otherwise, state the range of  $g$ .

5. **In this question you should show all stages of your working.**  
**Solutions relying on calculator technology are not acceptable.**

Using the substitution  $u = 3 + \sqrt{2x - 1}$  find the exact value of

$$\int_1^{13} \frac{4}{3 + \sqrt{2x - 1}} dx$$

giving your answer in the form  $p + q \ln 2$ , where  $p$  and  $q$  are integers to be found. **(8)**
