## Pearson Edexcel International Advanced Level

Time 1 hour 30 minutes

Paper

reference

**WME02/01**

### Mathematics

#### International Advanced Subsidiary/Advanced Level Mechanics M2

**You must have:**

Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

#### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Whenever a numerical value of  $g$  is required, take  $g = 9.8 \text{ m s}^{-2}$ , and give your answer to either 2 significant figures or 3 significant figures.

#### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 8 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

#### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Q:1/1/

  
Pearson

7.

Figure 3

The template shown in Figure 3 is formed by joining together three separate laminas. All three laminas lie in the same plane.

- $PQUV$  is a uniform square lamina with sides of length  $3a$
- $URST$  is a uniform square lamina with sides of length  $6a$
- $QRU$  is a uniform triangular lamina with  $UQ = 3a$ ,  $UR = 6a$  and angle  $QUR = 90^\circ$

The mass per unit area of  $PQUV$  is  $k$ , where  $k$  is a constant.

The mass per unit area of  $URST$  is  $k$ .

The mass per unit area of  $QRU$  is  $2k$ .

The distance of the centre of mass of the template from  $QT$  is  $d$ .

(a) Show that  $d = \frac{29}{14}a$  (5)

The template is freely suspended from the point  $Q$  and hangs in equilibrium with  $QR$  at  $\theta^\circ$  to the downward vertical.

(b) Find the value of  $\theta$  (7)
