

Mark Scheme (Results)

Summer 2022

Pearson Edexcel International GCSE
In Computer Science (4CP0/01)

Paper 01: Principles of Computer Science

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Additional Guidance	Mark
1(a)(i)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • An action/task that is carried out (by the CPU) (1) • An operation/code that is/will be executed (by the CPU) (1) • Something that tells the CPU/processor/device what to do (1) 	Allow examples	1
1 (a)(ii)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • A pointer/reference to/identification of a location in memory (1) • A pointer/reference to/location where data will be accessed from/stored (to)(1) 		1

Question Number	Answer	Additional Guidance	Mark
1(b)	<p>The only correct answer is D</p> <p><i>A is not correct because the address bus carries the address of the memory location</i></p> <p><i>B is not correct because the data bus carries but does not store data</i></p> <p><i>C is not correct because the control unit sends signals but does not handle the data</i></p>		1

Question Number	Answer	Additional Guidance	Mark
1(c)(i)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • More instructions can be carried out per second (1) • Processes run faster (1) • Programs executed faster (1) • Can run more complex programs (1) 		1
1(c)(ii)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • The CPU/computer could overheat (1) • More cooling required (1) • Needs more power (1) • CPU could become unstable/crash / its lifespan could be shortened (1) 		1

Question Number	Answer	Additional Guidance	Mark
1(d)	<p>The only correct answer is D</p> <p><i>A is not correct because it describes a method of accessing data from a secondary storage device</i></p> <p><i>B is not correct because it describes the multi-agent computational model</i></p> <p><i>C is not correct because it describes the parallel computational model</i></p>		1

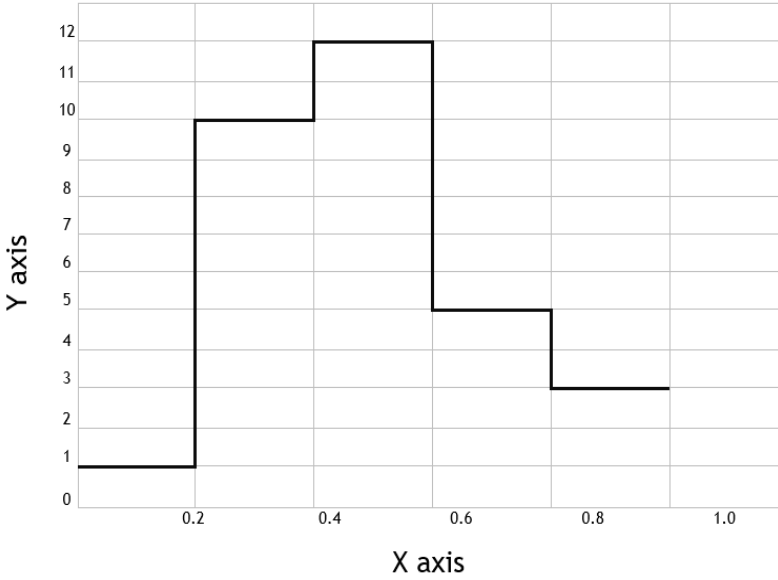

Question Number	Answer	Additional Guidance	Mark																		
1(e)(i)	Award one mark from: <ul style="list-style-type: none"> • When fast execution of the program is essential/gives faster execution (1) • When writing code to control a device / directly access the hardware (1) • To make efficient use of a device's limited storage/memory/power (1) • When writing code for a particular architecture/hardware/embedded system (1) 		1																		
1(e)(ii)	Award one mark for: <ul style="list-style-type: none"> • To translate/convert assembly language into machine/object code (1) 		1																		
1(e)(iii)	Award one mark for any two correct rows (1) Award two marks for any four correct rows (2) Award three marks for all five correct rows (3) <table border="1" data-bbox="331 1070 1021 1697"> <thead> <tr> <th>Description</th> <th>Compiler</th> <th>Interpreter</th> </tr> </thead> <tbody> <tr> <td>Translates the program each time it is executed</td> <td></td> <td><input type="checkbox"/></td> </tr> <tr> <td>Produces permanent object code</td> <td><input type="checkbox"/></td> <td></td> </tr> <tr> <td>Translates line by line</td> <td></td> <td><input type="checkbox"/></td> </tr> <tr> <td>Translates the whole program before it is run</td> <td><input type="checkbox"/></td> <td></td> </tr> <tr> <td>Generates a list of errors once the complete program has been translated</td> <td><input type="checkbox"/></td> <td></td> </tr> </tbody> </table>	Description	Compiler	Interpreter	Translates the program each time it is executed		<input type="checkbox"/>	Produces permanent object code	<input type="checkbox"/>		Translates line by line		<input type="checkbox"/>	Translates the whole program before it is run	<input type="checkbox"/>		Generates a list of errors once the complete program has been translated	<input type="checkbox"/>		Row can only be correct if there is only one tick.	3
Description	Compiler	Interpreter																			
Translates the program each time it is executed		<input type="checkbox"/>																			
Produces permanent object code	<input type="checkbox"/>																				
Translates line by line		<input type="checkbox"/>																			
Translates the whole program before it is run	<input type="checkbox"/>																				
Generates a list of errors once the complete program has been translated	<input type="checkbox"/>																				
Total for question 1			11																		

Question Number	Answer	Additional Guidance	Mark
2(a)(i)	Award up to two marks for: <ul style="list-style-type: none"> 0100 (1) 1110 (1) 	Accept any number of leading zeros.	2
2(a)(ii)	The only correct answer is B <i>A is not correct because standard ASCII uses 7 bits, 64 characters would need only 6 bits</i> <i>C is not correct because standard ASCII uses 7 bits, 256 characters would need 8 bits</i> <i>D is not correct because standard ASCII uses 7 bits, 512 characters would need 9 bits</i>		1
2(a)(iii)	Award up to two marks for a linked explanation such as: All of the major languages/symbols/characters can be represented by Unicode (1) because it uses a minimum of 16 bits/more bits/32 bits/65536 characters (1) Unicode can represent all/more characters/any language (1) whereas ASCII can only represent English/Latin/128 characters/doesn't have enough characters (1) Unicode can represent all characters (1) because it uses 16 bits/2 bytes /more bits instead of 8 bits/1 byte (1)	Accept the reverse argument Allow examples of non-latin characters	2

Question Number	Answer	Additional Guidance	Mark
2(b)	1010 1011 Award up to two marks for: <ul style="list-style-type: none"> MSB = 1 (1) Rest of pattern correct 010 1011 (1) 		2

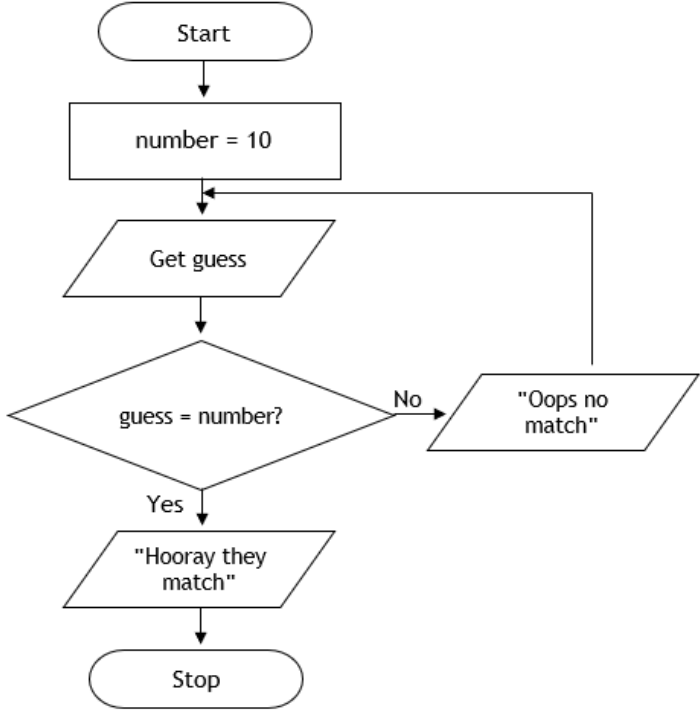

Question Number	Answer	Additional Guidance	Mark
2(c)	Award up to two marks for: <ul style="list-style-type: none"> 0100 (1) 1010 (1) 		2

Question Number	Answer	Additional Guidance	Mark												
2(d)(i)	<p>Award up to two marks for:</p> <ul style="list-style-type: none"> • 3 bits used for all patterns (1)/ • No pattern repeated (1) <p>Example:</p> <table border="1"> <thead> <tr> <th>Colour</th> <th>Binary pattern</th> </tr> </thead> <tbody> <tr> <td>Green</td> <td>000</td> </tr> <tr> <td>Black</td> <td>001</td> </tr> <tr> <td>White</td> <td>010</td> </tr> <tr> <td>Red</td> <td>011</td> </tr> <tr> <td>Blue</td> <td>100</td> </tr> </tbody> </table>	Colour	Binary pattern	Green	000	Black	001	White	010	Red	011	Blue	100		2
Colour	Binary pattern														
Green	000														
Black	001														
White	010														
Red	011														
Blue	100														
2(d)(ii)	<p>Award one mark for each of:</p> <ul style="list-style-type: none"> • $3579 \times 6128 \times 32$ (1) • $\div 8$ (1) • $+ 732$ (1) • $\div (1000 \times 1000)$ (1) <p>Examples</p> $\frac{3579 \times 6128 \times 32}{8} + 732$ $\frac{1000 \times 1000}{((3579 \times 6128 \times 32) \div 8) + 732}$ $\frac{1000 \times 1000}{(3579 \times 6128 \times 4) + 732}$	<ul style="list-style-type: none"> • Units are not required • Equivalent expressions are accepted • Calculations not explicit but expressed gain the mark • Award 1 mark for correct calculated answer of 87.73 if no other marks awarded 	4												
Total for question 2			15												

Question Number	Answer	Additional Guidance	Mark												
3(a)(i)	<p>Award one mark for each of:</p> <ul style="list-style-type: none"> At least four conversions plotted at the correct amplitude (1) Correct start point (1) 0 – 1 digital. 0 – 0 analogue Digital sound wave drawn (1) using candidate's plots <table border="1" data-bbox="580 551 895 840"> <thead> <tr> <th>Sample number</th> <th>Denary value</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>1</td> </tr> <tr> <td>2</td> <td>10</td> </tr> <tr> <td>3</td> <td>12</td> </tr> <tr> <td>4</td> <td>5</td> </tr> <tr> <td>5</td> <td>3</td> </tr> </tbody> </table> 	Sample number	Denary value	1	1	2	10	3	12	4	5	5	3	MP1 does not have to start at 0.2 - 1	3
Sample number	Denary value														
1	1														
2	10														
3	12														
4	5														
5	3														
3(a)(ii)	<p>Award one mark for:</p> <ul style="list-style-type: none"> Time (1) Sample interval/period (1) Seconds (1) 		1												
3(a)(iii)	<p>Award one mark for:</p> <ul style="list-style-type: none"> Amplitude / sound level / volume (1) Metres/centimetres/nanometres (1) m/cm/nm (1) 		1												

Question Number	Answer	Additional Guidance	Mark								
3(b)(i)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • Transfer time would be longer (1) • Larger file size / less compression (1) • Takes up more storage space (1) • Uses more of her data allocation (1) 		1								
3(b)(ii)	<p>Award up to two marks for a linked explanation such as:</p> <ul style="list-style-type: none"> • Storage capacity can be scaled up and down (1) so no need to buy more secondary storage / only pay for what is used/needed (1) • Will have the files all in one place (1) rather than scattered across many secondary storage devices (1) • Files can be uploaded/downloaded anytime/anywhere/on any device (1) so long as there is an internet connection (1) • Can be set up to automatically backup / synchronise with mobile devices (1) therefore if any files/devices are lost/stolen her files will be available on the server (1) 	Do not award a mark for cheaper without expansion.	2								
3(b)(iii)	<p>Award one mark from:</p> <ul style="list-style-type: none"> • Storage host could be targeted by hackers (1) • Alyssa has less control over her files (1) • An untrustworthy employee (of the cloud storage provider) could steal her files (1) • Reliant on the storage provider for security / safekeeping (1) • Files could be intercepted/corrupted during upload/download (1) 		1								
3(b)(iv)	<p>Award one mark for each of:</p> <table border="1" data-bbox="347 1787 1034 2072"> <thead> <tr> <th>URL component</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>https</td> <td>Protocol / scheme (1)</td> </tr> <tr> <td>www.cloudisfab.com</td> <td>Domain (name) / host / name of website (1)</td> </tr> <tr> <td>re12</td> <td>Folder/directory (on the website) / path / part of path(1)</td> </tr> </tbody> </table>	URL component	Description	https	Protocol / scheme (1)	www.cloudisfab.com	Domain (name) / host / name of website (1)	re12	Folder/directory (on the website) / path / part of path(1)		4
URL component	Description										
https	Protocol / scheme (1)										
www.cloudisfab.com	Domain (name) / host / name of website (1)										
re12	Folder/directory (on the website) / path / part of path(1)
