Economics

Level 1/2

Paper 1: Microeconomics and Business Economics

You do not need any other materials.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- Calculators may be used.
- You are advised to **show all your working out** with **your answer clearly identified** at the **end of your solution**.

Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Pearson

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box . If you change your mind about an answer, put a line through the box and then mark your new answer with a cross .

- 1 (a) Which **one** of the following is the term for the next best alternative given up when a choice is made? (1)

- A Business competition
 B Capital investment
 C Opportunity cost
 D Spare capacity

- (b) Which **one** of the following options shows the effects on the market for motorcycle helmets after a fall in the price of motorcycles? (1)

A

B

C

D

Private facilities in which swimmers can change clothes are available at the swimming pool in Ciney, Belgium. The quantity demanded for these facilities during each of the first three months of 2019 is shown in Figure 1.

Month	Quantity of private facilities demanded
January	3,600
February	3,200
March	3,100

Figure 1

- (f) Calculate the **excess demand** for private changing facilities for the first three months of 2019 if the quantity supplied during each month was 3,000 (9,000 in total). You are advised to show your working.

(2)

.....

.....

Coffee is a popular drink in many countries around the world. Beans are picked by hand from coffee plants once the fruit is ready to harvest. It is then put through a process which includes sorting the type of bean and transforming it from its natural state. It can be sold as a bean, ground to make coffee or even as the instant product. Machines are used for most of the process but cannot identify which beans are ready to pick.

- (i) With reference to the data above and your knowledge of economics, analyse why all four factors of production might be used to produce coffee.

(6)

Area with horizontal dotted lines for writing the answer to question (i).

Market share by firm for a market in Azerbaijan

Firm 1
 Firm 2
 Firm 3
 Firm 4

Figure 3

(a) Which **one** of the following options is the most suitable term for the type of market shown in Figure 3?

(1)

- A Cartel
- B Oligopoly
- C Monopoly
- D Competitive

(b) Which **one** of the following is a reason why consumers may not maximise their benefit?

(1)

- A Consumers may accurately calculate the satisfaction they gain
- B Consumers may have habits that are hard to give up
- C Consumers are always rational when making decisions
- D Consumers never copy the behaviour of others

(c) State the formula for price elasticity of supply (PES).

(1)

Figure 4 shows some of the production costs in the month of May for a firm manufacturing football souvenirs in Qatar, in preparation for the 2022 World Cup.

Production costs	Qatari Riyal (QR)
Rent	5 000
Raw materials	2 000
Advertising	500
Labour (paid according to output)	15 000

Figure 4

(d) Calculate the **total variable costs** for the firm in the month of May. You are advised to show your working.

(2)

.....

.....

.....

.....

.....

.....

(e) Define the term takeover.

(1)

.....

.....

.....

(f) Describe **one** reason why demand for a product usually becomes more price elastic over time.

Some countries, such as Cuba, rely mostly on public sector ownership to provide goods and services. Others, such as Japan rely more on private sector ownership. In Japan, health, education and street lighting are often provided by public sector ownership but Japan also produces a high quantity of electronic goods used for entertainment.

- (h) With reference to the data above and your knowledge of economics, assess how effective public sector ownership and private sector ownership are likely to be in solving the economic problem.

3 (a) Which **one** of the following is most likely to cause a shift to the left in the supply curve?

(1)

- A Increased indirect taxes
- B Cost reductions
- C Increased subsidies
- D Decreased advertising

(b) Which **one** of the following best describes an income elasticity of demand (YED) of 2.6?

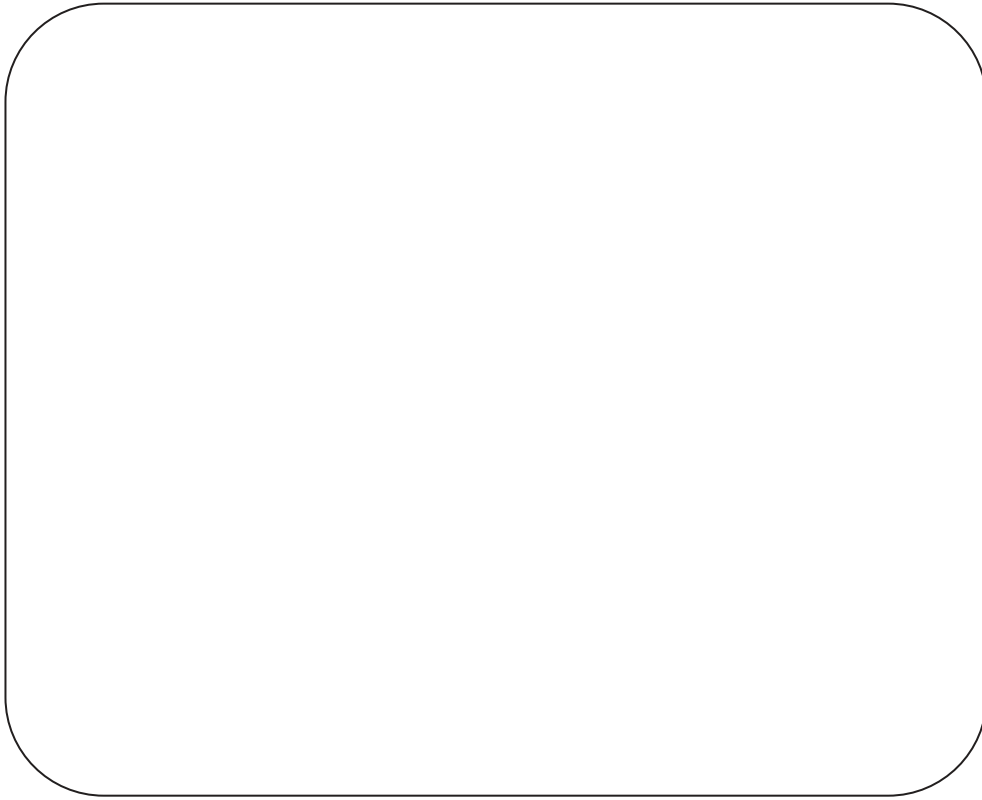

(1)

- A Inferior
- B Unitary
- C Luxury
- D Inelastic

(c) In the box below, draw a production possibility frontier (PPF) for a firm that can produce diaries and/or calendars. On your PPF, draw what would happen if production of calendars increased.

Tony Simpson is an artist whose income comes from selling his paintings to small craft shops. However, sales have recently fallen due to the closure of many of these types of shops. To avoid the risk of unemployment, he is considering training to become an art teacher by applying to a government scheme. This would provide an income while Tony is training to be a teacher.

- (b) With reference to the data above and your knowledge of economics, analyse how an increased ability to move to different types of employment might affect the supply of labour.
