Total Marks 

--

### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Without sufficient working, correct answers may be awarded no marks.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*

### Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

PEARSON

Answer all TEN questions.

Write your answers in the spaces provided.

You must write down all stages in your working.

1

Diagram NOT accurately drawn

Figure 1

In triangle  $ABC$ ,  $AB = x$  cm,  $AC = 2x$  cm and  $\angle ABC = 100^\circ$ , as shown in Figure 1.

(a) Find, in degrees to the nearest  $0.1^\circ$ , the size of  $\angle BAC$ .

(4)

Given that the area of triangle  $ABC$  is  $16 \text{ cm}^2$ ,

(b) find, to 3 significant figures, the value of  $x$ .

(Total for Question 5 is 8 marks)

6 The equation  $2x^2 + px - 3 = 0$ , where  $p$  is a constant, has roots  $\alpha$  and  $\beta$ .

(a) Find the value of

(i)  $\alpha\beta$

(ii)  $\left(\alpha + \frac{1}{\beta}\right)\left(\beta + \frac{1}{\alpha}\right)$  (4)

(b) Find, in terms of  $p$ ,

(i)  $\alpha + \beta$

(ii)  $\left(\alpha + \frac{1}{\beta}\right) + \left(\beta + \frac{1}{\alpha}\right)$  (4)

Given that  $\left(\alpha + \frac{1}{\beta}\right) + \left(\beta + \frac{1}{\alpha}\right) = 2\left(\alpha + \frac{1}{\beta}\right)\left(\beta + \frac{1}{\alpha}\right)$

(c) find the value of  $p$ .

(1)

(d) Using the value of  $p$  found in part (c), find a quadratic equation, with integer

coefficients, which has roots  $\left(\alpha + \frac{1}{\beta}\right)$  and  $\left(\beta + \frac{1}{\alpha}\right)$ . (2)

Diagram NOT accurately drawn

Figure 2

Figure 2 shows a triangular pyramid  $ABCD$ .  
 $AB = BC = CA = 10$  cm and  $DA = DB = DC = 13$  cm.  
The point  $E$  is the midpoint of  $AC$ .

- (a) Find the exact length of
  - (i)  $DE$
  - (ii)  $BE$

(4)
- (b) Find, in degrees to 1 decimal place, the size of the angle between the line  $BD$  and the line  $DE$ .

(3)
- (c) Find, in degrees to 1 decimal place, the size of the angle between the line  $BD$  and the plane  $ABC$ .

(3)
- (d) Find, in degrees to 1 decimal place, the size of the angle between the plane  $ADC$  and the plane  $ABC$ .

(2)
- (e) Find, to 3 significant figures, the volume of the pyramid  $ABCD$ .

Diagram **NOT** accurately drawn

**Figure 3**

Figure 3 shows the curve  $C$  with equation  $y = 9x^3 - 18x^2 - 8x + 24$ .  
 The curve cuts the  $y$ -axis at the point  $P$  with coordinates  $(0, 24)$ .  
 The point  $Q$  lies on  $C$  and the line  $PQ$  is the tangent to  $C$  at  $P$ .

(a) Find an equation of  $PQ$ . (4)

(b) Find the coordinates of  $Q$ . (5)

The point  $R$  lies on  $C$  and  $S$  is the point such that  $PQRS$  is a parallelogram.  
 Given that  $RS$  is the tangent to  $C$  at  $R$ ,

(c) find the coordinates of  $R$ , (4)

(d) find the coordinates of  $S$ . (2)

(e) Show that  $S$  lies on  $C$ . (2)
