Edexcel

Mark Scheme (Results)

November 2020

Pearson Edexcel International GCSE
In Geography (4GE1)
Paper 2: Human Geography

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(a) | <p style="text-align: center;">AO1 (1 mark)</p> <p>C energy from plants</p> <p>C is the correct answer as the other options are not related to biomass, i.e. biotic sources.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(b) | <p style="text-align: center;">AO1 (1 mark)</p> <ul style="list-style-type: none"> • The effort made to reduce the consumption of energy by using less of an energy source (1). • Reducing the amount of energy (coal / power / electricity etc) that is used by people in their homes or industry or transport (1). <p>Accept any other appropriate response.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(c) | <p style="text-align: center;">AO1 (1 mark)</p> <p>D burning natural gas</p> <p>D is the correct answer as the other options are renewable sources of energy</p> | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(d) | <p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for a basic evidence from the from the photo (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Looks like a well-protected deep-water port, e.g. harbour wall (1) so that large cargo ships can move / transport / unload freight (1). • Sea port for unloading container boxes (1) as it is likely to be an accessible location, e.g. by road (1). • Cranes for unloading containers (1) as it may be easy to transport them from here either by road, sea or rail (1) • Flat area for unloading (1) meaning that boxes / freight can be easily stored (1). <p>Accept any other appropriate response.</p> | (2) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(e) | <p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable type of primary sector employment identified.</p> <ul style="list-style-type: none"> • Farming (1) • Fishing (1) • Forestry (1) • Mining (1) <p>Accept other specific jobs relevant to this sector, i.e. extractive industries.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 1(f) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for a reason and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Increasing population (1) means that there is a greater demand for resources, e.g. food (1). • There is a strong relationship between population and resources (1) The growth and decline of population directly affects the use of resources (1). • The availability of natural resources, e.g. food availability (1) controls population growth rates by influencing health and fertility (1). • Malthus's theory states that population would grow exponentially (1) whereas food production would grow more slowly (linear growth) (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(g) | <p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of the change taking place and a further 2 marks for explanation of a reason, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • The decline in manufacturing employment for most countries, e.g. UK -47% (1) due to shifts away from labour-intensive industries (1) into higher tech and service sector-based industries (1). • The decline in manufacturing employment for most countries, e.g. Germany -24% (1) due to shifts into low cost countries, e.g. Indonesia, Thailand, Vietnam (1) where companies can be more productive and profitable (1). • Increased automation of tasks in manufacturing leads to decline in employment, e.g. France -34% (1) means that many economies need less workers to achieve comparable outputs (1) so employment rates decline (1). • South Korea and Taiwan has seen increases – 2% + 12% (1) due to government policy (1) encouraging training as well as supporting industries with tax breaks (1). <p>Accept any other appropriate response. Must use evidence from the resource.</p> | (3) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 1(h) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for a reason and a further expansion mark, up to a maximum of 2 marks each. Maximum 2 marks if no named megacity, or incorrect city named.</p> <ul style="list-style-type: none"> • [Kolkata, India] Workers in the informal tertiary sector choose this way of working (1) as it means they will have to pay less / no tax to the government (1). • [Jakarta, Indonesia] Lack of government authority or government corruption means that the state is unable to manage the informal sector efficiently (1) so many people are able to work in the informal sector without having to pay tax (1). • [Karachi, Pakistan] Large rural – urban migration in some countries means there are not enough legal / regular paid jobs in some cities (1) so workers are forced into informal employment (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Indicative content |
|-----------------|--|
| 1 (i) | <p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Candidates don't need to cover all energy types to reach level 3, but do need to include both renewable and non-renewable energy.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • The energy mix of a country / globally is the specific combination of different energy sources it uses to meet its energy consumption needs. • The change in the energy mix is a result of several separate and interrelated factors including energy / resource price, local availability, national and international government agreements, public attitudes, level of development and local geographies. • An important factor is how energy is used in transport, in the future oil will decrease due to a switch towards more efficient and electric cars. This may also be driven by higher energy prices. • Government attitudes and policies towards renewable energy (especially large countries and populous such as China and India) will be very important in determining the future energy mix. • Energy efficient and public attitudes in some places (e.g. California) will affect the future energy mix through political pressure in countries such as USA. • Future prices of different energy sources e.g. natural gas and oil, as well as energy security of supplies and geopolitical concerns will also be important. <p>AO4</p> <ul style="list-style-type: none"> • Figure 1c shows that coal historically has been a main component of the global energy mix. • On Figure 1c, it can be seen that in the future coal will decline to around 30% of global energy mix by 2040. • Figure 1c shows that renewable will be very important in the future, expected to be approaching 25% of total energy mix by 2040. |

| | |
|--|--|
| | <ul style="list-style-type: none">• Figure 1c shows that gas will remain constant from 2010 to 2040 whilst nuclear will drop from high levels in the 1990s to around 10% in 2040.• Figure 1c shows oil will have the biggest relative drop in use from a high of around 20% in 1970 to just 1-2% in 2040. |
|--|--|

| Level | Mark | Descriptor |
|----------------|------------|--|
| | 0 | No rewardable material. |
| Level 1 | 1-3 | <ul style="list-style-type: none"> Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3) Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4) |
| Level 2 | 4-6 | <ul style="list-style-type: none"> Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4) |
| Level 3 | 7-8 | <ul style="list-style-type: none"> Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3) Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4) |

| Question number | Answer | Mark |
|-----------------|--|------|
| 2(a) | <p>A the outward growth of urban development</p> <p>A is the correct answer as the other options are related to other processes, e.g. urbanisation</p> | (1) |

| Question number | Answer | Mark |
|-----------------|--|------|
| 2(b) | <p style="text-align: center;">AO1 (1 mark)</p> <ul style="list-style-type: none"> • A set of factors or reasons as to why a rural area might go into continued decline (1). • (Government) spending money and not getting full value or financial return from the initial outlay (1). <p>Accept any other appropriate responses.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|---|------|
| 2(c) | <p style="text-align: center;">AO1 (1 mark)</p> <p>A intergovernmental organisation</p> <p>A is the correct answer as the other options are not the correct meaning for IGO.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 2(d) | <p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for a basic evidence from the from the image (AO3) and a further 1mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • A good supply of rainfall based on the colour of the grass (1) means good growth for grasslands for grazing (1). • The ground is quite steep (1) so it would be difficult to use machines to harvest and arable crop (1). • Appears to be an exposed area (1) so it's too windy for arable crops to grow (1). • It looks poor quality on the steeper slopes (1) so it's not fertile enough to support cereal or arable crop production (1). <p>Accept any other appropriate responses.</p> | (2) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 2(e) | <p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable way identified.</p> <ul style="list-style-type: none"> • Add fertilizers to soils (1) • Improve field or soil drainage (1) • Improve soil texture (1) • Use of GM crops (1) • Introduce better crop rotation and management systems (1) • Crop change for a more appropriate crop type / nitrogenous crop (1). <p>Accept any other appropriate response.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 2(f) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for a reason and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Increased mechanisation of agriculture (1) means that machines replace people for some agricultural tasks (1). • Farming systems have become more efficient and profitable (1) and as a result they have been able to reduce their workforce (1). • Changes in farm operations / systems, e.g. production of biofuels (1) means that there may be a reduction in the workforce required (1). • External pressure to be more competitive and profitable, e.g. from supermarkets (1) mean that some farmers have reduced number of workers in order to remain operational (1). • Workers have been placed on short term contracts (1) so that agricultural operations can be more flexible and profitable (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 2(g) | <p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of a trend and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • There has been an increase in average farm size between 2009-2016 (approximately 420 to 440 acres) (1) as larger farms are more efficient with mechanisation (1) allowing greater profitability per unit land (1). • There has been a decrease in the number of farms (2.17m to 206m in 2016) (1) as farms grow in size (merging with smaller farms) (1) in an attempt to be more profitable (1). <p>Accept any other appropriate response.</p> | (3) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 2(h) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for initial explanation and an additional 1 mark for development through further explanation or exemplification. Maximum of 2 marks total when no named developed country is used in context.</p> <p>A range of countries and strategies could be chosen.</p> <ul style="list-style-type: none"> • [Vineyard] In Surrey, UK the conversion of cereal crops to grapes for wine (1) has increased the farms profitability per unit area of land (1). • [Camping] In France many farmers have converted parts of their farm to cater for campers (1) which has allowed them to offer special family-friendly holidays, close to nature (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Indicative content |
|-----------------|---|
| 2 (i) | <p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • Biomes are large-scale environments that are distinguished by characteristic temperature ranges and amounts of precipitation. • These two variables are, in most instances, the dominant controls which affect the types of vegetation and animal life that can exist in those areas. • Because each biome is defined by climate, the same biome can occur in geographically distinct areas with similar climates. • Other local factors may also be important in limiting distribution such as altitude and the direction a slope is facing (aspect). • The influence of people and human activity (e.g. deforestation, land drainage, soil improvement etc) can also disrupt the model that is presented in Figure 2c. <p>AO4</p> <ul style="list-style-type: none"> • Figure 2c shows temperature and precipitation control types of biome found globally. • On Figure 2c there are eight major terrestrial biomes: tropical rainforests, savannas, subtropical deserts, chaparral, temperate grasslands, temperate forests, boreal forests, and Arctic tundra. • On Figure 2c, there is a relationship between biome type and both precipitation and temperature. • On Figure 2c deserts are found in the driest and hottest locations whereas tundra is found only in moderately dry and cold environments. • Figure 2c shows that tropical and temperate rainforests need lots of precipitation and warm temperatures. |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 3(a) | AO1 (1 mark) D increasing proportion of people living in urban areas D is the correct answer as the other options are incorrect definitions | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 3(b) | AO1 (1 mark) Award 1 mark for an appropriate definition. <ul style="list-style-type: none"> • An area on the outskirts / outside / periphery of the main urban area (1). • Landscape interface between town and country (1). • Where the town / city and the rural area / countryside mix (1). Accept the population shift from rural to urban residency / living / dwelling | (1) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 3(c) | AO1 (1 mark) A a location that has been previously built-on A is the correct answer as the other options are incorrect definitions | (1) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 3(d) | <p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for a basic evidence from the from the photograph (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Very high density high rise housing (1) which means that there is a shortage of land to build on as land values are high (1). • Few green spaces in the picture (1) meaning that there is limited public amenity spaces for exercise and recreational activity (1). • Appears to be a high density urban area with lots of housing and apartments (1) so this can lead to problems of litter and even transferable diseases (1). <p>Accept any other appropriate response.</p> | (2) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 3(e) | <p style="text-align: center;">AO1 (1 mark)</p> <p>Award one mark for suitable group.</p> <ul style="list-style-type: none"> • NGOs (1) • Government (1) • Planners (1) • Charities (1) • World Bank, UNESCO / WHO, other IGOs (1) <p>Accept any other appropriate response.</p> | (1) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 3(f) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for a reason and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Prices of land typically increase towards the city centre (1) therefore only certain land-uses and activities can afford the rents / spaces (1). • Historic reasons such as growth of urban areas next to a river bridging point (1) can mean that the core CBD is in a particular / unusual location (1). • Transport routeways and nodes can influence land-use patterns (1) as these offer points of access which means that housing or industry can develop next to points of accessibility (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 3(g) | <p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of the change taking place and a further 2 marks for explanation of a reason, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • There has been an increase from 0.7m to 2.3m (1) as governments have encouraged lower emissions in cities (1) which means that cars have been taxed so people use bicycles (1). • There has been an increase from 0.7m to 2.3m (1) as people have become frustrated by congestion in cities (1) which means bikes are often the quickest way to get around (1). • There has been an increase from 0.7m to 2.3m (1). Governments incentivised through cheap hire models bicycle usage (1) which means more bikes have been installed to keep up with rising consumer demand (1). <p>Accept any other appropriate response.</p> | (3) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 3(h) | <p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for initial explanation and an additional 1 mark for development through further explanation or exemplification. Maximum of 2 marks when no named developing or emerging country is used in context.</p> <p>A range of countries and examples could be chosen, based on either waste, housing, transport, education e.g. with policies and incentives, working with NGOs as well as legislation.</p> <ul style="list-style-type: none"> • [Brazil] In some urban areas of Brazil, the government have promoted the use of solar panels to generate electricity (1) and this has allowed poorer people to use tablet technology in order to better their schooling and education (1). • [Afghanistan] Some NGOs have used education to train self-help groups (1) so that they can develop business skills, as well as finding out about nutrition and hygiene (1). • [Kenya] The local government and UNESCO have put money into health education in Kibera (1) in order to improve women's reproductive health so that education can in turn be improved (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Indicative content |
|-----------------|--|
| 3 (i) | <p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • Patterns of urbanisation are controlled by a number of complex factors linked to development. • Urban areas have better provision of education and services which attract people from rural areas; the speed of this process may be limited by transport, housing technology etc. This would be the case in Sub-Saharan Africa. • Physical geography, resource, e.g. coal and access to trade and markets would have controlled population growth and rates of urbanisation and the number of cities over 500,000. • Political governance influences rural urban migration, e.g. growth of Chinese cities in recent years and the country has seen rapid population movement to urban areas – now 54%. • There may be push factors operating especially in Asia and Africa: conflict, natural disasters, food and famine, lack of services and healthcare etc. <p>AO4</p> <ul style="list-style-type: none"> • On Figure 3c, it can be seen that the three regions / countries have big differences in both number of cities and proportion of urban and rural dwellers. • Figure 3c shows the highest urban populations are in Europe at 73% and the lowest in sub-Saharan Africa at 37%. • Figure 3c shows that China has a roughly equal number of rural and urban population numbers. • Africa has the fewest number of cities over 0.5m and over at 55, whereas Europe and China are much higher. |

| 8(b)(iii) | <p style="text-align: center;">AO2 (2 marks) / AO3 (2 marks)</p> <p>Award 1 mark for the identification of a possible reason for the pattern shown on Figure 8a (AO3) and a further mark for an explanation of the reason (AO2), up to a maximum of 2marks per idea.</p> <ul style="list-style-type: none"> • High rates of trade in place like Australia due to the government promoting overseas trade (1) therefore increasing productivity per person (1). • Trade is linked (correlated) to economic growth (1) so places which are more developed and wealthier will have more trade per capita (1). • Frictionless borders, e.g. much of Europe (1) so that workers and their family can freely move for work which increases (directly or indirectly) trade per capita (1). • Low levels of political interference and corruption (1) means it's a good place for businesses to trade therefore increasing trade per capita (1). • Relatively low population, but high trade (1) means that the figure per capita, e.g. Australia is relatively high (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 8(c) | <p style="text-align: center;">AO1 (2 marks) / AO2 (2 marks)</p> <p>Award 1 mark (AO1) for identification of effect and a further mark (AO2) for an explanation of the reason, up to a maximum of 2 marks per idea.</p> <ul style="list-style-type: none"> • Deforestation and clearance of land for tourism development (1) means that there is a reduction in local wildlife biodiversity (1). • Air pollution associated with travel and transport (1) means that more tourism travel has a negative impact of the environment and air quality (1). • Increased numbers of tourist places demand in areas for valuable water resources (1) which may have negative impacts on local agriculture or ecosystems (1). • Knock-on effects may be increased global awareness for a "mega event", e.g. royal wedding (1) encouraging more visits and greater congestion / overcrowding in the area. (1). <p>Accept any other appropriate response.</p> | (4) |

| Question number | Answer | Mark |
|-----------------|--|------------|
| 8(d)(i) | <p style="text-align: center;">AO4 (2 marks)</p> <p>Award 1 mark for a correct answer and one mark for working:</p> <p>Total = 320 (accept 290 – 350) / 5</p> <p>Mean = 64.0 (accept 60 – 70 (1))</p> | (2) |

| Question number | Answer | Mark |
|-----------------|---|------------|
| 8(d)(ii) | <p style="text-align: center;">AO3 (2 marks)</p> <p>Award 1 mark for the initial description and 1 mark for further detail through development or use of supporting data from the resource, up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • There is considerable increase over time (1) but not always at a steady rate (1). • Generally, it has increased rapidly (1) but the rate of increase is steepest between 2012 and 2015 (1). • The slowest rate of increase was between 1995 and 2005 (1), since then it has increased exponentially (1). <p>Accept any other appropriate response.</p> | (2) |

| Question number | Indicative content |
|-----------------|--|
| 8(e) | <p style="text-align: center;">A03 (3 marks)/A04 (3 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>A03</p> <ul style="list-style-type: none"> • The most important factors for people are likely to be increased transport which has been facilitated by technology (not on Figure 8c). • The ranking of factors may not be very useful as several factors are interlinked and there can be a chain of events that encourage globalisation. • Some may argue that the role of TNCs and linked capital flows are very much the important drivers in the 21st century. • Globalisation drivers will vary temporally as well as spatially and trader barriers for example could have significant impacts on the way in which globalisation works in some places or regions. • There could be some factors that in some regions e.g. physical geography, location (core vs periphery), cultural factors which are not on 8c but have still contributed towards globalisation. <p>A04</p> <ul style="list-style-type: none"> • Figure 8c shows a range of factors that have facilitated globalisation. • Figure 8c shows factors that operate at different scales and with different ranked importance. • Figure 8c indicates that there is only a limited number of factors. |

| Level | Mark | Descriptor |
|----------------|------|--|
| | 0 | No rewardable material. |
| Level 1 | 1-3 | <ul style="list-style-type: none"> • Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3) • Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4) |
| Level 2 | 4-6 | <ul style="list-style-type: none"> • Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) • Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4) |

| Question number | Indicative content |
|-----------------|--|
| 8 (f) | <p style="text-align: center;">AO2 (4 marks), AO3 (4 marks), AO4 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO2</p> <ul style="list-style-type: none"> • Trade involves the transfer of goods or services from one person or entity to another, often in exchange for money. A system or network that allows trade is called a market. This market can be between a number of different countries, countries or individuals. • Globalisation can also be considered the degree of connectivity (people, money, resources etc) between countries and regions. • Global institutions include WTO, IMF as well as individual TNCs that operate across international borders. <p>AO3</p> <ul style="list-style-type: none"> • Globalisation is a complex set of ideas driven by processes and flows. • Some many suggest that the drivers are not necessarily in the correct order and say technology, for instance, is the most important factor. • An alternative argument is that is it governments and trade agreements that have facilitated globalisation allow more frictionless trade between places and regions. • Migration is an important driver of the process since people carry with them, skills, ideas and resources that facilitate change. • Others might argue that technology is the most important driver, allow people, goods and money to move more easily between distant places, rather than global institutions. • TNCs and trade agreements (bilateral and regional) are very important as are rules around free markets and access to their economies. <p>AO4</p> <ul style="list-style-type: none"> • Figure 8a shows trade per capita variations at a global scale. • Figure 8a shows that some places, e.g. India and sub Saharan Africa have low levels of trade 0-\$500. • Figure 8a shows that in general, the north has much higher levels of trade per capita than the global south. • Figure 8c shows a range of factors that have facilitated globalisation. • Figure 8c shows factors that operate at different scales and with different importance. |

|-----------------|--|
| 9 (f) | <p style="text-align: center;">AO2 (4 marks), AO3 (4 marks), AO4 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO2</p> <ul style="list-style-type: none"> • There are a range of ways to measure development and human welfare including HDI, GDP, and separate indices: education, inequality and measures of political corruption. • The Gini co-efficient can be used to measure inequality as it analyses the distribution of wealth across citizens in a country. • Different factors contribute to the development of a country / region: cultural, technological, social, economic as well as wider measures such as stability and water availability. <p>AO3</p> <ul style="list-style-type: none"> • The Gini co-efficient is not a measure of a particular country's income, rather it's distribution across citizens, so does not necessarily provide an indication of economic development. It also only focuses on wealth. • Patterns of inequality can vary temporally as well as spatially and are therefore not fixed. • A significant disadvantage of many indicators such as an index of income inequality or GDP is that they can go out of date. In addition, these indicators do not take into account living standards which is an important social measure to consider for human welfare. • Many would argue that indices are better (e.g. HDI) than single indicators since they use a composite measure. These can also be weighted for which carries the greatest importance. HDI includes social indicators. • Development and human welfare are complex, with different elements which can be measured. Using a range of indicators can provide a more complete understanding of the development of a country and the welfare of its residents. <p>AO4</p> <ul style="list-style-type: none"> • Figure 9a shows that there are large variations in income equality (indicated by the Gini coefficient). |
