

# Markscheme

May 2018

Nature of Science

Standard level

Paper 1

14 pages

This markscheme is the property of the International Baccalaureate and must **not** be reproduced or distributed to any other person without the authorization of the IB Global Centre, Cardiff.

**Section A**

Question			Answers	Notes	Total
1.			C		1
2.			B		1
3.			D		1
4.			A		1
5.			A		1

Question		Answers	Notes	Total
6.	a	$1 \times (3 \times 10^8)^2 \checkmark$ $9 \times 10^{16} \text{ J}$ <b>OR</b> $9 \times 10^{16} \text{ kgm}^2\text{s}^{-2} \checkmark$	<i>Units required for M2.                      Accept answers with other correct units.</i>	2
6.	b	the process where the nucleus «of an atom» is split into several smaller fragments/atoms/particles «and neutrons» $\checkmark$ chain reaction $\checkmark$ the final total mass is less than the initial mass <b>OR</b> the difference in mass/mass deficit/mass amount of energy appears as energy $\checkmark$		2 max
6.	c	energy density in uranium-235/U-235 much greater than in fossil fuels $\checkmark$	OWTTE	1
7.		understanding of scientific processes for use of raw materials/invention of new materials required $\checkmark$ some very rare/important materials required for high tech products $\checkmark$ availability/accessibility/geographic location/some raw materials are rare $\checkmark$ economic such as supply and demand/cost <b>OR</b> political situation/ethical issues, <i>eg</i> wars $\checkmark$ energy cost for each material/economic factors $\checkmark$ purity/concentration of the ores $\checkmark$ environmental impact, <i>eg</i> carbon footprint, recycling, pollution $\checkmark$ sustainability $\checkmark$		3 max

Question		Answers	Notes	Total														
8.	a	Any one of: HIV, SARS, Ebola, bird/avian influenza, MERS/camel influenza, malaria, swine flu, cowpox, rabies ✓	Accept any other correct human disease. Accept "AIDS" for "HIV".	1														
8.	b	<table border="1"> <thead> <tr> <th>Correlative relationship</th> <th>Causal relationship</th> </tr> </thead> <tbody> <tr> <td>similar pattern or trend between the disease and other variable</td> <td>show a direct cause and effect evidence ✓</td> </tr> <tr> <td>eg Ebola cases increased with increased consumption of bush meat</td> <td>eg eating infected bush meat transfers the Ebola pathogen into humans and causes the disease ✓</td> </tr> <tr> <td>named disease will continue to spread if correlative factors are removed</td> <td>eradication of the cause stops the named disease from spreading ✓</td> </tr> </tbody> </table>	Correlative relationship	Causal relationship	similar pattern or trend between the disease and other variable	show a direct cause and effect evidence ✓	eg Ebola cases increased with increased consumption of bush meat	eg eating infected bush meat transfers the Ebola pathogen into humans and causes the disease ✓	named disease will continue to spread if correlative factors are removed	eradication of the cause stops the named disease from spreading ✓	Award [1 max] if disease not named. Each row is [1] mark. Need both parts in a row for mark.	2 max						
Correlative relationship	Causal relationship																	
similar pattern or trend between the disease and other variable	show a direct cause and effect evidence ✓																	
eg Ebola cases increased with increased consumption of bush meat	eg eating infected bush meat transfers the Ebola pathogen into humans and causes the disease ✓																	
named disease will continue to spread if correlative factors are removed	eradication of the cause stops the named disease from spreading ✓																	
8.	c	<table border="1"> <tbody> <tr> <td>poverty factor ✓</td> <td>name of disease ✓</td> </tr> <tr> <td colspan="2"><i>Examples could include:</i></td> </tr> <tr> <td>poor/lack of sanitation ✓</td> <td>cholera/typhoid ✓</td> </tr> <tr> <td>overcrowded/poor living conditions ✓</td> <td>tuberculosis/TB ✓</td> </tr> <tr> <td>unsafe sex/lack of education/access to condoms ✓</td> <td>AIDS ✓</td> </tr> <tr> <td>limited medical access contributes to progression from HIV infection to ✓</td> <td>AIDS ✓</td> </tr> <tr> <td>lack of protection against mosquitoes ✓</td> <td>malaria ✓</td> </tr> </tbody> </table>	poverty factor ✓	name of disease ✓	<i>Examples could include:</i>		poor/lack of sanitation ✓	cholera/typhoid ✓	overcrowded/poor living conditions ✓	tuberculosis/TB ✓	unsafe sex/lack of education/access to condoms ✓	AIDS ✓	limited medical access contributes to progression from HIV infection to ✓	AIDS ✓	lack of protection against mosquitoes ✓	malaria ✓	Accept "HIV" for "AIDS".	2 max
poverty factor ✓	name of disease ✓																	
<i>Examples could include:</i>																		
poor/lack of sanitation ✓	cholera/typhoid ✓																	
overcrowded/poor living conditions ✓	tuberculosis/TB ✓																	
unsafe sex/lack of education/access to condoms ✓	AIDS ✓																	
limited medical access contributes to progression from HIV infection to ✓	AIDS ✓																	
lack of protection against mosquitoes ✓	malaria ✓																	

(continued...)

(Question 8 continued)

8.	d		<b>Preventative treatments</b>	<b>Curative treatments</b>	<p><i>Each row is [1] mark.</i></p> <p><i>Need to have one comparison and one difference for [2] marks.</i></p> <p><i>Need both parts in a row for [1] mark.</i></p>	<b>2 max</b>
			may have side effects ✓			
			same aim to improve health ✓			
			both based on scientific understanding/science ✓			
			may influence life style ✓			
			maintains health/prevents disease	cures the disease ✓		
			reduces health costs	costs to health system/society may be higher ✓		
			reduces the spread/incidence of the disease	does not reduce the spread/incidence of the disease ✓		
			before infection	after infection ✓		

**Section B**

Question		Answers	Notes	Total
9.	a	attraction to/gravity/pull of Earth/like the moon ✓ they do not fall to Earth because of curvature of Earth's surface/Earth is a sphere ✓ «Newton's Law of gravitation states that» attraction between two masses/attraction between mass of satellite and mass of the Earth/centripetal force ✓ Newton's first law/inertia ✓		2 max
9.	b	takes 24 hours to complete one orbit at this altitude <b>OR</b> appears stationary ✓ follows the rotation of the Earth <b>OR</b> satellite is located at the same point above the Earth all the time ✓ that height/altitude is the only one that gives the required speed ✓ send signals from one country to another "in real time" ✓ allows a large area to be covered <b>OR</b> $\frac{1}{3}$ of Earth's surface covered ✓		2 max

(continued...)

(Question 9 continued)

9.	c	transmits signals «consistently» to the same place ✓ fixed antennae on Earth/no need for antennae to track satellite ✓ signals reach a large area on Earth/signals have a big footprint ✓		2 max
9.	d	weather satellites ✓ telephone ✓ internet <b>OR</b> digital radio ✓ monitoring/listening to communications ✓	Accept any other correct answer.	2 max
9.	e	large costs/waste of money <b>OR</b> better use for the money ✓ spying on individuals/companies/governments ✓ spy cameras can take detailed photos ✓ satellites can eavesdrop on telephone/internet communications ✓ satellites pass over airspace of other/many countries' space ✓ broadcasting TV/radio to countries without permission ✓ who is responsible for Space junk/thousands of disused satellites/bits of satellites orbiting about that can cause danger to human piloted spacecraft ✓ pollution/«rocket» launch emissions ✓		3 max

(continued...)

(Question 9 continued)

<p>9.</p>	<p>f</p>	<p><b>Impact:</b>  light produced from electricity/electricity produced mainly from fossil fuels  <b>OR</b>  electricity production causes pollution ✓  release CO<sub>2</sub> which is a greenhouse gas/contributes to global warming/climate change ✓  «waste» heat produced ✓  light pollution  <b>OR</b>  stars cannot be seen ✓  impact on ecosystems/nocturnal animals/populations ✓  <b>Reducing impact:</b>  regulations «national governments/international» on power use and time ✓  reduce use of electricity by using more efficient bulbs/LEDs/turn lights off ✓  use renewable sources of energy such as wind/solar/geothermal so less fossil fuels burned ✓</p>	<p>Award <b>[2 max]</b> unless both parts addressed.</p>	<p><b>3 max</b></p>
-----------	----------	--	--	---------------------

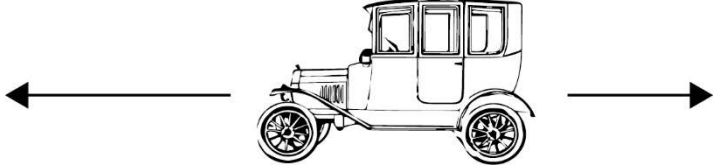

Question		Answers	Notes	Total
10	a	«optical» telescope ✓ diffraction grating/spectrometer ✓		2
10	b	a spectrum is like a finger print/barcode <b>OR</b> «the spectrum from the star» is a mixture of different elements ✓ the spectrum from the star is compared with the spectra from known elements on Earth ✓ overlapping spectra identify the element ✓		2 max
10	c	hydrogen and helium ✓		1
10	d	moving away from the Earth ✓ universe is expanding ✓ red shift is different in size for all four spectra indicating they are all travelling at different speeds/velocities <b>OR</b> the furthest ones are travelling the fastest ✓		3 max

Question		Answers	Notes	Total
11	a	prevents «some» infectious diseases <b>OR</b> cures bacterial diseases ✓ less feed required/promotes growth ✓ less time for full growth saves money ✓ buildup of antibiotic resistance in bacteria ✓ antibiotic enters human food chain ✓		3 max
11	b	less reliance/demand on animal products <b>OR</b> more reliance/demand on vegetables ✓ some animal feedstuff may be eaten directly by humans ✓ more «varied» vegetarian products available ✓ less water/land used for meat production/more water/land available ✓ transfer of land use not always possible ✓ change from meat to vegetable production ✓ eat lower on food chain/more efficiently ✓ more food available ✓ technology developments for more «artificial» meat-like products ✓		3 max

(continued...)

(Question 11 continued)

Question		Answers	Notes	Total
11	c	large amount wasted «20%-30%» ✓ food lost during planting/harvesting/storage/transport ✓ food wasted at retail/consumption stage ✓ more efficient food system would reduce losses and increase total food available ✓ poverty and not enough food in some places <b>OR</b> poor distribution ✓		2 max

Question		Answers	Notes	Total												
12	a	<p>forces both horizontal and opposite ✓                      the forward arrow is longer than the backwards arrow ✓</p> 		2												
12	b	<p>reduce drag/air flow ✓                      increase streamlining/make more aerodynamic ✓</p>		1 max												
12	c	<table border="1"> <thead> <tr> <th>Internal combustion</th> <th>All-electric</th> </tr> </thead> <tbody> <tr> <td colspan="2">heats up atmosphere/pollution ✓</td> </tr> <tr> <td>burns fossil fuel that emits CO<sub>2</sub> contributing to enhanced global warming</td> <td>CO<sub>2</sub> emissions depend on whether electricity is produced from fossil fuels, renewable sources or a mixture ✓</td> </tr> <tr> <td>harmful chemical emissions</td> <td>no chemical emissions from car itself ✓</td> </tr> <tr> <td>noisy</td> <td>less noise ✓</td> </tr> <tr> <td>highly polluting</td> <td>less total pollution «in production and use» ✓</td> </tr> </tbody> </table>	Internal combustion	All-electric	heats up atmosphere/pollution ✓		burns fossil fuel that emits CO <sub>2</sub> contributing to enhanced global warming	CO <sub>2</sub> emissions depend on whether electricity is produced from fossil fuels, renewable sources or a mixture ✓	harmful chemical emissions	no chemical emissions from car itself ✓	noisy	less noise ✓	highly polluting	less total pollution «in production and use» ✓	<p>Each row is [1] mark.                      Need to include one comparison and one difference to get [2] marks.                      Need both parts in a row for [1] mark.</p>	2 max
Internal combustion	All-electric															
heats up atmosphere/pollution ✓																
burns fossil fuel that emits CO <sub>2</sub> contributing to enhanced global warming	CO <sub>2</sub> emissions depend on whether electricity is produced from fossil fuels, renewable sources or a mixture ✓															
harmful chemical emissions	no chemical emissions from car itself ✓															
noisy	less noise ✓															
highly polluting	less total pollution «in production and use» ✓															

(continued...)

(Question 12 continued)

Question			Answers	Notes	Total
12	d	i	energy from fossil fuels used to build the factory/CO <sub>2</sub> emissions ✓ energy from fossil fuels used to build the solar cells/CO <sub>2</sub> emissions ✓ water usage/waste ✓ displaces wild life ✓;		1 max
12	d	ii	energy from fossil fuels used to transport the batteries/materials to build the batteries ✓ energy from fossil fuels to mine for and refine lithium ✓ lithium-ion batteries difficult to dispose safely «because lithium is toxic/flammable» ✓		1 max
12	e		use electric cars powered from renewable sources ✓ use hydrogen fuel cell car ✓ make internal combustion engine more efficient/less emissions ✓ ban internal combustion engine ✓ use car less/use a bike/walk ✓ share own car/use taxis/rent a car/car sharing schemes/public transport ✓ work at home/teleworking <b>OR</b> live closer to work ✓ speed limits <b>OR</b> drive slower ✓ open windows instead of air conditioning ✓		3 max
