No part of this product may be reproduced in any form or by any electronic or mechanical means, including information storage and retrieval systems, without written permission from the IB.

Additionally, the license tied with this product prohibits commercial use of any selected files or extracts from this product. Use by third parties, including but not limited to publishers, private teachers, tutoring or study services, preparatory schools, vendors operating curriculum mapping services or teacher resource digital platforms and app developers, is not permitted and is subject to the IB's prior written consent via a license. More information on how to request a license can be obtained from <http://www.ibo.org/contact-the-ib/media-inquiries/for-publishers/guidance-for-third-party-publishers-and-providers/how-to-apply-for-a-license>.

Aucune partie de ce produit ne peut être reproduite sous quelque forme ni par quelque moyen que ce soit, électronique ou mécanique, y compris des systèmes de stockage et de récupération d'informations, sans l'autorisation écrite de l'IB.

De plus, la licence associée à ce produit interdit toute utilisation commerciale de tout fichier ou extrait sélectionné dans ce produit. L'utilisation par des tiers, y compris, sans toutefois s'y limiter, des éditeurs, des professeurs particuliers, des services de tutorat ou d'aide aux études, des établissements de préparation à l'enseignement supérieur, des fournisseurs de services de planification des programmes d'études, des gestionnaires de plateformes pédagogiques en ligne, et des développeurs d'applications, n'est pas autorisée et est soumise au consentement écrit préalable de l'IB par l'intermédiaire d'une licence. Pour plus d'informations sur la procédure à suivre pour demander une licence, rendez-vous à l'adresse <http://www.ibo.org/fr/contact-the-ib/media-inquiries/for-publishers/guidance-for-third-party-publishers-and-providers/how-to-apply-for-a-license>.

No se podrá reproducir ninguna parte de este producto de ninguna forma ni por ningún medio electrónico o mecánico, incluidos los sistemas de almacenamiento y recuperación de información, sin que medie la autorización escrita del IB.

Además, la licencia vinculada a este producto prohíbe el uso con fines comerciales de todo archivo o fragmento seleccionado de este producto. El uso por parte de terceros —lo que incluye, a título enunciativo, editoriales, profesores particulares, servicios de apoyo académico o ayuda para el estudio, colegios preparatorios, desarrolladores de aplicaciones y entidades que presten servicios de planificación curricular u ofrezcan recursos para docentes mediante plataformas digitales— no está permitido y estará sujeto al otorgamiento previo de una licencia escrita por parte del IB. En este enlace encontrará más información sobre cómo solicitar una licencia: <http://www.ibo.org/es/contact-the-ib/media-inquiries/for-publishers/guidance-for-third-party-publishers-and-providers/how-to-apply-for-a-license>.

Information technology in a global society
Higher level and standard level
Paper 2 – article

Monday 18 November 2019 (morning)

1 hour 15 minutes

Instructions to candidates

- Do not turn over this sheet until instructed to do so.
- This sheet contains the article required for information technology in a global society higher level and standard level paper 2.

2 pages

8819–5514
© International Baccalaureate Organization 2019

Theme: Health

IT system: Virtual reality simulators

Students at the Medical University of Mokopane, South Africa who wish to become surgeons* must currently undergo training that involves:

- observing experienced surgeons operating on real patients
- practising basic surgical techniques on dummies

- 5 • carrying out simple parts of the surgery on real-life patients under the very close supervision of experienced surgeons.

Dr Elisa Gerber, the principal surgeon at the university, is working with *Virtual Surgery Solutions* (VSS) to develop a virtual reality (VR) simulator that would recreate the experience of carrying out surgery. Dr Gerber and her team are performing the final tests on the six different surgery

- 10 simulations that will initially be available at the university. These simulations will use a variety of hand controls designed by VSS.

The VR simulator includes a headset with a screen that displays a single, 360 degree computer-generated image in three dimensions (3D), and has hand controls for the trainee surgeon to use (see **Figure 1**). Audio instructions are provided for the trainee surgeon to follow, and the system

- 15 also has sensors that gather data from the trainee's head and hand movements. Senior surgeons can watch the progress of the trainee on a monitor in real time.

During the training, screen capturing software is used to record the virtual surgery performed by the trainee surgeon so it can be analysed later by the trainee or a senior surgeon. Dr Gerber can see great potential for improving the quality of the surgical training in her hospital with the VR

- 20 training system. She also believes that sharing the video recordings generated during the training sessions could benefit other hospitals in southern Africa.
